

EACREEE holds 2nd Executive Meeting in Kampala, Uganda

East African Community Secretariat; Arusha, Tanzania; 15 August 2017:

The 2nd Executive Board meeting of the East African Centre for Renewable Energy and Energy Efficiency (EACREEE) was held in Kampala, Uganda on 11th August, 2017.

The well-attended board meeting from Partner States except the Republic of South Sudan was the follow up of the first meeting which was held on June 10, 2016.

Addressing the board members, the Chairman of the Executive Board and Permanent Secretary in the Ministry of Energy and Mineral Development, Uganda, Dr. Steven Isabalija, hailed the continued support of the United Nations Industrial Development Organization (UNIDO) and the Austrian Development Agency (ADA) to the East African Community in the Energy and more specifically in Renewable Energy and Energy Efficiency.

He acknowledged the challenges faced by EACREEE in its early stages of operation and urged collective efforts among stakeholders in addressing the same.

On his part, the EAC

Deputy Secretary General in charge of the Productive and Social Sectors, Hon Christophe Bazivamo, informed the board that the EAC integration was business oriented, adding that energy was key to promoting business in the region.

"Low energy access rates, expensive electricity, poor cooking solutions have been hampering the region's development," said Hon Bazivamo.

He reminded the meeting that the original plan of EAC was to have EACREEE as an EAC institution, however due to financial constraints other innovative ways were devised and hence College of Engineering, Design, Art and Technology (CEDAT) was selected to host EACREEE as a Centre of Excellence.

Hon. Bazivamo disclosed that efforts were underway for the EAC through the Inter -University Council of East Africa to ensure effective management of the EAC Centers of Excellence through the harmonization of management guidelines.

The Principal of CEDAT, Prof Henry Alinaitwe, thanked the EAC Council of Ministers for selecting CEDAT to host EACREEE and commended the support of UNIDO and ADA towards the Centre. Prof. Alinaitwe revealed that since its inauguration, CEDAT has been working with several stakeholders to advance the Centre's activities.

During the deliberations, the meeting took note of the progress report and of the challenges experienced by College of Engineering, Art, Design and Technology (CEDAT) in the implementation process especially in regards to the registration of EACREEE as a legal entity handling programmes that are regional in nature.

The meeting agreed on the need for formulation of a Roadmap/Transitional document on how and when the Centre will graduate from being hosted in CEDAT to be a fully-fledged Centre of EAC.

Against the above observations and to take matters forward, the meeting arrived at the following resolutions:

1. Urged Makerere University CEDAT in collaboration with EAC Secretariat to expedite implementation of the decision of the 33rd meeting of Council by registering a semi-autonomous EACREEE under CEDAT.
2. Urged CEDAT to open a separate account under Makerere University CEDAT in the name of EACREEE by 30th September 2017;
3. Requested the EAC Secretariat in collaboration with CEDAT to work on the transitional roadmap in line with decisions of the 33rd Meeting of the Council of Ministers.
4. The Executive Board to continue managing EACREEE under the current set up and;
5. The Sectoral Council to reconsider the governing structure of EACREEE.

The meeting also took note of the proposal presented by UNIDO on the tentative agenda for conducting a sustainable energy forum for EAC by EACREEE in February 2018. The meeting commended the initiative by UNIDO and requested the formation of a joint organizing committee. The Forum will be organized in one of the EAC Partner States that were requested to support the forum. The meeting requested Partner States to express interest in hosting this conference by 30th September, 2017.

The Technical Committee and National Focal Institutions (NFI) for EACREEE as well as launching the Centre on 11th June, 2016.

- ENDS -

Notes to Editor:

The 33rd Meeting of the Council of Ministers held on 29th February 2016 designated the College of Engineering, Art, Design and Technology (CEDAT), Makerere University, Kampala, Uganda as a Centre of Excellence for renewable Energy and Energy Efficiency (EACREEE) and directed that CEDAT collaborates with other institutions dealing with Renewable Energy and Energy Efficiency

within the Partner States. Based on the approved Project Document, the 11th Sectoral Council on Energy directed the EAC Secretariat to implement the directive of the council by constituting the Executive Board.
