FOURTH SCHEDULE (ss 37 and 122.)

DETERMINATION OF VALUE OF IMPORTED GOODS LIABLE TO
AD VALOREM IMPORT DUTY

PART I

INTERPRETATION:

1. (1) In this Schedule-

"customs value of imported goods" means the value of goods for the purposes of levying ad valorem duties of customs on imported goods;

"identical goods" means goods which are same in all respects, including physical characteristics, quality and reputation. Minor differences in appearance shall not preclude goods otherwise conforming to the definition from being regarded as identical;

"similar goods" means goods which, although not alike in all respects, have like characteristics and like component materials which enable them to perform the same functions and to be commercially interchangeable. The quality of the goods, their reputation and the existence of a trademark are among the factors to be considered in determining whether goods are similar.

"identical goods" and "similar goods" do not include, as the case may be, goods which incorporate or reflect engineering, development, artwork, design work, and plans and sketches for which no adjustment has been made under subparagraph (1)(b)(iv) or paragraph 9 because such elements were undertaken in the Partner States;

"produced" includes grown, manufactured and mined.

(2) For the purposes of this Schedule-

(a) goods shall not be regarded as "identical goods" or "similar goods" unless they were produced in the same country as the goods being valued;

(b) goods produced by different persons shall be taken into account only when there are no identical goods or similar goods, as the case may be, produced by the same person as the goods being valued.

(3) For the purpose of this Schedule, persons shall be deemed to be related only if:

(a) they are officers or directors of one another's businesses;
(b) they are legally recognized partners in business;
(b) they have an employer and employee relationship;
In determining whether the transaction value is acceptable for the purposes of subparagraph (2), the fact that the buyer and the seller are related within the meaning of Paragraph (1) shall not in itself be a ground for regarding the transaction value as unacceptable. In such case the circumstances surrounding the sale shall be examined and transaction value shall be accepted provided that the relationship did not influence the price. If, in light of information provided by the importer or otherwise, the proper officer has grounds for considering that the relationship influenced the price, he shall communicate his grounds to the importer and such importer shall be given reasonable opportunity to respond and where the importer so requests, the communication of the grounds shall be in writing.

2.(1) The customs value of imported goods shall be the transaction value, which is the price actually paid or payable for the goods when sold for export to the Partner State adjusted in accordance with the provisions of Paragraph 9, but where-

(a) there are no restrictions as to the disposition or use of the goods by the buyer other than restrictions which:

(i) are imposed or required by law or by the public authorities in the Partner State;
(ii) limit the geographical area in which the goods may be resold; or
(iii) do not substantially affect the value of the goods;

(b) the sale or price is not subject to some condition or consideration for which a value cannot be determined with respect to the goods being valued;

(c) no part of the proceeds of any subsequent resale, disposal or use of the goods by the buyer will accrue directly or indirectly to the seller, unless an appropriate adjustment can be made in accordance with the provisions of Paragraph 9, and

(d) the buyer and seller are not related, or where the buyer and seller are related, that the transaction value is acceptable for customs purposes under the provisions of subparagraph (2).

(2) (a) In determining whether the transaction value is acceptable for the purposes of subparagraph (1), the fact that the buyer and the seller are related within the meaning of Paragraph (1) shall not in itself be a ground for regarding the transaction value as unacceptable. In such case the circumstances surrounding the sale shall be examined and transaction value shall be accepted provided that the relationship did not influence the price. If, in light of information provided by the importer or otherwise, the proper officer has grounds for considering that the relationship influenced the price, he shall communicate his grounds to the importer and such importer shall be given reasonable opportunity to respond and where the importer so requests, the communication of the grounds shall be in writing.
(b) In the sale between related persons, the transaction value shall be accepted and the goods valued in accordance with the provisions of subparagraph (1) whenever the importer demonstrates that such value closely approximates one of the following accruing at or about the same time.

(i) the transaction value in sales to unrelated buyers of identical or similar goods for export to the Partner State;

(ii) the customs value of identical or similar goods as determined under the provisions of Paragraph 6;

(iii) the customs value of identical or similar goods as determined under the provisions of Paragraph 7.

Provided that, in applying the provisions under subparagraph (2)(a) and (b) of this paragraph, due account shall be taken of demonstrated differences in commercial levels, quantity levels, the elements enumerated in paragraph 9 and costs incurred by the seller in sales in which the seller and the buyer are not related that are not incurred by the seller in sales in which the seller and the buyer are related.

The tests set forth in subparagraph (2)(b) are to be used at the initiative of the importer and only for comparison purposes. Substitute values may not be established under the provisions of subparagraph (2)(b).

**TRANSACTION VALUE OF IDENTICAL GOODS**

3. -(1) (a) Where the customs value of the imported goods cannot be determined under the provisions of paragraph 2, the customs value shall be the transaction value of identical goods sold for export to the Partner State and exported at or about the same time as the goods being valued:

(b) In applying the provisions of this paragraph, the transaction value of identical goods in a sale at the same commercial level and in substantially the same quantity as the goods being valued shall be used to determine the customs value and where no such sale is found, the transaction value of identical goods sold at the different commercial level or in different quantities, adjusted to take account of differences attributable to commercial level or to quantity, shall be used, provided that such adjustments can be made on the basis of demonstrated evidence which clearly establishes the reasonableness and accuracy of the adjustment, whether the adjustment leads to an increase or decrease in the value;

(2) Where the costs and charges referred to in paragraph 9(2) are included in the transaction value, an adjustment shall be made to take account of significant differences in such costs and charges between the imported goods and the identical goods in question arising from differences in distances and modes of transport.

162
(3) Where in applying the provisions of this paragraph, more than one transaction value of identical goods is found, the lowest such value shall be used to determine the customs value of the imported goods.

TRANSACTION VALUE OF SIMILAR GOODS

4. (1) (a) Where the customs value of the imported goods cannot be determined under the provisions of Paragraph 2 and 3, the customs value shall be the transaction value of similar goods sold for export to the Partner State and exported at or about the same time as the goods being valued;

(b) In applying this Paragraph, the transaction value of similar goods in a sale at the same commercial level and in substantially the same quantity as the goods being valued shall be used to determine the customs value. Where no such sale is found, the transaction value of similar goods sold at a different commercial level and/or in different quantities, adjusted to take account of differences attributable to commercial level and/or to quantity, shall be used, provided that such adjustments can be made on the basis of demonstrated evidence which clearly establishes the reasonableness and accuracy of the adjustment, whether the adjustment leads to an increase or a decrease in the value.

(2) Where the costs and charges referred to in subparagraph (2) of Paragraph 9 are included in the transaction value, an adjustment shall be made to take account of significant differences in such costs and charges between the imported goods and the similar goods in question arising from differences in distances and modes of transport.

(3) Where, in applying the provisions of this paragraph, more than one transaction value of similar goods is found, the lowest such value shall be used to determine the customs value of the imported goods.

REVERSAL OF ORDER OF APPLICATION OF DEDUCTIVE VALUE AND COMPUTED VALUES

5. Where the customs value of the imported goods cannot be determined under the provisions of paragraphs 2, 3 and 4, the customs value shall be determined under the provisions of paragraph 6 or, when the customs value cannot be determined under that paragraph, under the provisions of paragraph 7 save that, at the request of the importer, the order of application of paragraphs 6 and 7 shall be reversed.

DEDUCTIVE VALUE

6.-(1) (a) Where the imported goods or identical or similar imported goods are sold in the Partner State in the condition as imported, the customs value of the imported goods under the provisions of this paragraph shall be based on the unit price at which the imported goods or identical or similar
imported goods are so sold in the greatest aggregate quantity, at or about the time of the importation of the goods being valued, to persons who are not related to the persons from whom they buy such goods, subject to deductions for the following:

(i) either the commissions usually paid or agreed to be paid or the additions usually made for profit and general expenses in connection with the sales in such country of imported goods of the same class or kind;
(ii) the usual costs of transport and insurance and associated costs incurred within the Partner State;
(iii) where appropriate, the costs and charges referred to in paragraph 9(2); and
(iv) the customs duties and other national taxes payable in the Partner State by reason of importation or sale of the goods.

(b) Where neither the imported goods nor identical nor similar imported goods are sold at or about the time of importation of the goods being valued, the customs value shall, subject to the provisions of subparagraph (1)(a), be based on the unit price at which the imported goods or identical or similar imported goods are sold in the Partner State in the condition as imported at the earliest date after the importation of the goods being valued but before the expiration of 90 days after such importation.

(2) Where neither the imported goods nor identical nor similar imported are sold in the Partner State in the condition as imported, then, if the importer so requests, the customs value shall be based on the unit price at which the imported goods, after further processing, are sold in the greatest aggregate quantity to persons in the Partner State who are not related to the persons from whom they buy such goods, due allowance being made for the value added by such processing and the deductions provided for in subparagraph (1)(a).

COMPUTED VALUE

7.- (1) The customs value of imported goods under the provisions of this Paragraph shall be based on a computed value which shall consist of the sum of:

(a) the cost or value of materials and fabrication or other processing employed in producing the imported goods;
(b) an amount for profit and general expenses equal to that usually reflected in sales of goods of the same class or kind as the goods being valued which are made by producers in the country of exportation for export to the Partner State;
(c) the cost or value of all other expenses necessary to reflect the costs added under paragraph 9(2).
Where the imported goods or identical or similar imported goods are sold in the Partner State in the condition as imported, the customs value of the imported goods under the provisions of this paragraph shall be based on the unit price at which the imported goods or identical or similar

(ii) the customs value of identical or similar goods as determined under the provisions of Paragraph 6;

(iii) the customs value of identical or similar goods as determined under the provisions of Paragraph 7.

Provided that, in applying the provisions under subparagraph (2)(a) and (b) of this paragraph, due account shall be taken of demonstrated differences in commercial levels, quantity levels, the elements enumerated in paragraph 9 and costs incurred by the seller in sales in which the seller and the buyer are not related that are not incurred by the seller in sales in which the seller and the buyer are related.

The tests set forth in subparagraph (2)(b) are to be used at the initiative of the importer and only for comparison purposes. Substitute values may not be established under the provisions of subparagraph (2)(b).

**TRANSACTION VALUE OF IDENTICAL GOODS**

3. -(1) (a) Where the customs value of the imported goods cannot be determined under the provisions of paragraph 2, the customs value shall be the transaction value of identical goods sold for export to the Partner State and exported at or about the same time as the goods being valued:

(b) In applying the provisions of this paragraph, the transaction value of identical goods in a sale at the same commercial level and at substantially the same quantity as the goods being valued shall be used to determine the customs value and where no such sale is found, the transaction value of identical goods sold at the different commercial level or in different quantities, adjusted to take account of differences attributable to commercial level or to quantity, shall be used, provided that such adjustments can be made on the basis of demonstrated evidence which clearly establishes the reasonableness and accuracy of the adjustment, whether the adjustment leads to an increase or decrease in the value;

(2) Where the costs and charges referred to in paragraph 9(2) are included in the transaction value, an adjustment shall be made to take account of significant differences in such costs and charges between the imported goods and the identical goods in question arising from differences in distances and modes of transport.

The tests set forth in subparagraph (2) (b) are to be used at the initiative of the importer and only for comparison purposes. Substitute values may not be established under the provisions of subparagraph (2) (b).

TRANSACTION VALUE OF IDENTICAL GOODS

3. -(1) (a) Where the customs value of the imported goods cannot be determined under the provisions of paragraph 2, the customs value shall be the transaction value of identical goods sold for export to the Partner State and exported at or about the same time as the goods being valued:

(b) In applying the provisions of this paragraph, the transaction value of identical goods in a sale at the same commercial level and in substantially the same quantity as the goods being valued shall be used to determine the customs value and where no such sale is found, the transaction value of identical goods sold at the different commercial level or in different quantities, adjusted to take account of differences attributable to commercial level or to quantity, shall be used, provided that such adjustments can be made on the basis of demonstrated evidence which clearly establishes the reasonableness and accuracy of the adjustment, whether the adjustment leads to an increase or decrease in the value;

(2) Where the costs and charges referred to in paragraph 9(2) are included in the transaction value, an adjustment shall be made to take account of significant differences in such costs and charges between the imported goods and the identical goods in question arising from differences in distances and modes of transport.
In determining whether the transaction value is acceptable for the purposes of subparagraph (1), the fact that the buyer and the seller are related within the meaning of Paragraph (1) shall not in itself be a ground for regarding the transaction value as unacceptable. In such case the circumstances surrounding the sale shall be examined and transaction value shall be accepted provided that the relationship did not influence the price. If, in light of information provided by the importer or otherwise, the proper officer has grounds for considering that the relationship influenced the price, he shall communicate his grounds to the importer and such importer shall be given reasonable opportunity to respond and where the importer so requests, the communication of the grounds shall be in writing;

(3) Exemption of duty under paragraph (1) and (2) is made on the condition that:

(a) it applies only to motor vehicles and parts imported or purchased for use by bona fide rally drivers resident in a Partner State who have been approved and recommended to the Commissioner or a person authorised by him or her in writing, by the rally authorities and accepted as such by him;

(b) where the motor vehicle or parts ceased to be used or, in the case of parts, to be reassigned for use, for rally purposes or are disposed off in a Partner State to persons not entitled to exemption from, or remission of duty, duty shall, immediately become payable at the appropriate rate; and

(c) where the motor vehicle parts cease to be used, or in the case of parts, to be assigned for use, for rally purposes or are disposed off in a Partner State to persons not entitled to exemption from, or remission of duty, duty shall subject to paragraph (5), immediately become payable at the appropriate rate.

(2) One motor vehicle which the ministry responsible for foreign affairs of a Partner State is satisfied as having been imported as a replacement for a motor vehicle...
7. In cases where the production of the element in question involves a number of countries and over a period of time, the adjustment should be limited to the value actually added to that element outside the Partner State.

Subparagraph (1)(c)

1. The royalties and license fees referred to in paragraph 9(1)(c) may include, among other things, payments in respect of patents, trademarks and copyrights. However, the charges for the right to reproduce the imported goods in the Partner State shall not be added to the price actually paid or payable for the imported goods in determining the customs value.

2. Payments made by the buyer for the right to distribute or resell the imported goods shall not be added to the price actually paid or payable for the imported goods if such payments are not a condition of the sale for export to the Partner State of the imported goods.

Subparagraph 3

Where objective and quantifiable data do not exist with regard to the additions required to be made under the provisions of paragraph 9, the transaction value cannot be determined under the provisions of paragraph 2. As an illustration of this, a royalty is paid on the basis of the price in a sale in the importing country of a litre of a particular product that was imported by the kilogram and made up into a solution after importation. If the royalty is based partially on the imported goods and partially on other factors which have nothing to do with the imported goods such as when the imported goods are mixed with domestic ingredients and are no longer separately identifiable, or when the royalty cannot be distinguished from special financial arrangements between the buyer and the seller, it would be inappropriate to attempt to make an addition for the royalty. However, if the amount of this royalty is based only on the imported goods and can be readily quantified, an addition to the price actually paid or payable can be made.
6. Variations in the above circumstances will be of course, require different factors to be considered in determining the proper method of allocation.

4. As an illustration of the above, an importer provides the producer with a mould to be used in the production of the imported goods and contracts with the producer to buy 10,000 units. By the time of arrival of the first shipment of 1,000 units the producer has already produced 4,000 units. The importer may request the proper officer to apportion the value of the mould over 1,000 units, 4,000 units or 10,000 units.

Subparagraph 1(b)(iv)

1. Additions for the elements specified in paragraph 9(1)(b)(iv) should be based on objective and quantifiable data. In order to minimize the burden for both the importer and proper officer in determining the values to be added, data readily available in the buyer's commercial record system should be used in so far as possible.

2. For those elements supplied by the buyer, which were purchased or leased by the buyer, the addition would be the cost of the purchase or the lease. No addition shall be made for those elements available in the public domain, other than the cost of obtaining copies of them.

3. The ease with which it may be possible to calculate the valued to be added will depend on a particular firm's structure and management practice, as well as its accounting methods.

4. It is possible for example, that a firm which imports a variety of products from several countries maintains the records of its design centre outside The Partner State in such a way as to show accurately the costs attributable to a given product. In such cases, a direct adjustment may appropriately be made under the provisions of paragraph 9.

5. In another case, a firm may carry the cost of the design centre outside the Partner State as a general overhead expense without allocation to specific products. In this instance, an appropriate adjustment could be made under the provisions of paragraph 9 with respect to the imported goods by apportioning total design centre costs over total production benefiting from the design centre and adding such apportioned cost on a unit basis to imports.

6. Variations in the above circumstances will be of course, require different factors to be considered in determining the proper method of allocation.
2. The methods of valuation to be employed under paragraph 8 should be those laid down in paragraphs 2, 3, 4, 5, 6 and 7 but a reasonable flexibility in the application of such methods would be in conformity with the aims and provisions of paragraph 8.

Some examples of reasonable flexibility are as follows:

(a) Identical goods - the requirement that the identical goods should be exported at or about the same time as the goods being valued could be flexibly interpreted; identical imported goods produced in a country other than the country of exportation of the goods being valued could be the basis for customs valuation; customs values of identical imported goods already determined under the provisions of paragraphs 6 and 7 could be used.

(b) Similar goods - the requirement that the similar goods should be exported at or about the same time as the goods being valued could be flexibly interpreted; similar imported goods produced in a country other than the country of exportation of the goods being valued could be the basis for customs valuation; customs values of similar imported goods already determined under the provisions of paragraphs 6 and 7 could be used.

(c) Deductive methods - the requirement that the goods shall have been sold in the "condition as imported" in paragraph 6(1)(a) could be flexibly interpreted; the "90 days" requirement could be administered flexibly.

Note to Paragraph 9

Subparagraph (1)(a)(i)

The term "buying commissions" means fees paid by importer to the importer's agent for the service of representing the importer abroad in the purchase of the goods being valued.

Subparagraph (1)(b)(ii)

1. There are two factors involved in the apportionment of the elements specified in paragraph 9(1)(b)(ii) to the imported goods - the value of the element itself and the way in which that value is to be apportioned to the imported goods. The apportionment of these elements should be made in a reasonable manner appropriate to the circumstances and in accordance with generally accepted accounting principles.

2. Concerning the value of the element, if the importer acquires the element from a seller not related to the importer at a given cost, the value of the element is that cost. If the element was produced by the importer or by a person related to the importer, its value would be the cost of producing it. If the element had been previously used by the importer, regardless of whether it had been acquired or produced by such importer, the original cost of acquisition or production would have to be adjusted downward to reflect its use in order to arrive at the value of the element.
