EXECUTIVE SUMMARY

CHAPTER 1: INTRODUCTION ON EAST AFRICAN COMMUNITY INTEGRATION PROCESS

1.1 Background

The East African Community (EAC) is an intergovernmental regional body comprising of Kenya, Tanzania and Uganda whose agenda is to attain economic, social and political integration of East Africa. Following the collapse of the first East African Community in 1977, the desire for close cooperation among the people of East Africa finally resulted in an agreement establishing the Permanent Tripartite Commission for East African Cooperation that was signed by the Heads of State in November 1993. The Heads of States agreed to transform the Cooperation Agreement into a Treaty and the negotiations commenced in earnest resulting into a Treaty for the Establishment of the East African Community which was signed on 30th November 1999 and entered into force on 7th July 2000 following its ratification by the Partner States of, Kenya, Tanzania and Uganda.

The mandate and framework for cooperation by the Partner States is set forth in the Treaty. Article 5 (1) of The Treaty states that “The objectives of the Community shall be to develop policies and programmes aimed at widening and deepening cooperation among the Partner States in political, economic, social and cultural fields, research and technology, defence, security and legal and judicial affairs for the mutual benefit.”

The key building blocks towards economic, social and political integration of the East African Community are clearly articulated in the Article 5 (2) of the Treaty which states that the “.... the Partner States undertake to establish among themselves and in accordance with the provisions of this Treaty, a Customs Union, a Common Market, subsequently a Monetary Union and ultimately a Political Federation in order to strengthen and regulate the industrial, commercial, infrastructural, cultural, social, political and other relations of the Partner States to the end that there shall be accelerated, harmonious and balanced development and sustained expansion of economic activities, the benefit of which shall be equally shared.”

The Treaty under Article 2(2) sets the Customs Union as the first transitional stage (entry point) of the integration process and as an integral part of the Community. The Treaty further provides under Article 75 for a Protocol on the Establishment of the East African Community Customs Union which was negotiated in four years and concluded in March

2004. The negotiations on the protocol to establish a common market by 2010 have commenced.

The EAC participates in the tripartite meetings with COMESA and SADC in pursuit of harmonising their policies to foster closer integration.

1.2 Extent of Implementation of the Customs Union

The main purpose of the customs union is to deepen the integration process through liberalization and promotion of intra-regional trade that is mutually beneficial to all Partner States, promotion of efficiency in production, enhancement of domestic, cross border and foreign investment and promote industry diversification and economic development. Implementation of the EAC Customs Union commenced on 1st January 2005. The basic elements of the customs union under implementation are:

(i) Common External Tariff

The duty structure is according to category of goods with raw material and capital goods at 0 percent, intermediate goods at 10 percent and finished goods at 25 percent. Exceptional rates above maximum rate of 25 percent are applied on selected items in order to protect production of such goods in the region. The sensitive list includes such goods as maize, rice, cement, cotton fabrics, and sugar, milk and dairy products.

(ii) Programme for Elimination of Internal Tariff.

One of the main features of a Customs Union is the dismantling of the internal tariff. In this context EAC adopted an asymmetrical tariff reduction programme for a transitional period of five years. The first round of tariff reduction was attained with effect from January 2006.

Tariff rates on Kenyan goods into Uganda have reduced to 8 percent in 2006 from 10 percent in 2005 on 413 products (which is 7.5 percent of the total tradable goods). Tariff rates reductions on Kenyan goods into Tanzania are reported in Table 1.1.

Table 1.1: Tariff Rates Reductions on Kenyan Goods into Tanzania

No. of Tariff lines	2005	2006
146	25%	20%
15	20%	15%
20	15%	12%
513	10%	8%
112	5%	4%
54	3%	2%

(iii) EAC Rules of Origin (RoO).

Instruments for EAC RoO were developed. These include the Certificate of Origin, and the Simplified Certificate of Origin whose implementation, is expected to commence on 1st July 2007.

(iv) EAC Customs Management Act 2004

The above Act forms one of the Customs laws of the community. It provides the institutional, operational and enforcement framework of customs.

(v) Elimination of non tariff barriers and trade facilitation

Partner States undertook to remove all forms of Non Tariff Barriers (NTBs) to trade. These range from system based and infrastructural barriers. To attain this objective, EAC has developed a mechanism for elimination of NTBs. Partner States are in the process of constituting national monitoring committees to make the mechanism operational.

(vi) Harmonisation and development of EAC standards

As of 2006, about 600 standards had been harmonized and gazetted for uniform application in EAC. In addition the Bureaux of Standards of Partner States recognize national quality marks and do not subject goods to further analysis.

(vii) Competition policy and law

To ensure fair competition the EAC adopted a competition policy in order to prohibit any practice that adversely affects free trade. An EAC Competition Act was enacted in 2006. In

the context of subsidiary, the national competition laws and institutions will remain in effect while the EAC Competition law will take care of the intra regional trade.

(viii) Multilateral trade negotiations

EAC is gradually evolving a harmonized framework in multilateral trade negotiations particularly under World Trade Organization (WTO) and European Union.

The implementation of the EAC Customs Union is faced with challenges both of policy and operational nature. However, it suffices to mention that these challenges are not insurmountable as they were anticipated and will not block the integration path. The challenges include:

- (i). Prior to the commencement of the Customs Union and because of the negotiation process which took most of the time, no adequate public awareness was carried out. Stakeholders were not sensitized on the mechanisms and benefits of Customs Union so that they position themselves to immediately take advantage of the benefits.
- (ii). Inadequate Capacity: There was no comprehensive training of customs officers, clearing agents and other officials involved in clearance of goods prior to the commencement of the Customs Union which hindered smooth application of the EAC Customs regime.
- (iii). Resource Constraints: There were no adequate resources (both human and financial) specifically programmed for the preparatory stages of Customs Union at the regional level and this further compounded the inadequacy in publicity and capacity development. A lot of effort was directed on negotiations leaving little time for pre launch preparations.
- (iv). National sovereignty: In nascent stages of integration the sovereignty issue is a common phenomenon. EAC is no exception in this aspect. The gradual change from national orientation to regional orientation is a challenge which manifests in form of non-compliance with regional laws, duplication of national activities which would be rationally handled at regional level such as training, transit management and exchange of information.
- (v). Structural rigidities: The institutional framework of Customs Union left the customs administration in Partner States with a national character rather than a regional character. Customs in Partner States is a creation of the Partner State legislation while the Directorate of Customs and Trade is a creation of regional

legislation. These disconnect between the centre and the national customs may lead to differing strategic focus by the two centres.

- (vi). Overlapping membership: The issue of multiple memberships although still latent is a reality that has to be addressed. It is a policy decision which the three Partner States have to take sooner than later in order to consolidate the gains of the customs union.

The implementation of the Customs Union has progressed well so far and the challenge is for stakeholders to position themselves proactively to reap the benefits of integration.

1.3 Purpose of the Report

The purpose of this report is to provide a second assessment of progress made by the Community since the Customs Union Protocol came into effect on 1st January 2005.

The 2006 report also include Burundi and Rwanda which were admitted into EAC in November 2006 and become full members after signing the accession treaty in June 2007.

The report is structured in 7 chapters starting with an introduction, chapter 1 followed by macroeconomic developments, chapter 2 and chapter 3 discusses EAC trade developments. Chapter 4 deals with trade developments in the EAC Partner States while special category consideration within EAC Customs Union is discussed in chapter 5.

Chapter 6 is a review of customs revenue performance in the Partner States. Chapter 7 reviews the performance of investment flows in the region.

CHAPTER 2: MACROECONOMIC DEVELOPMENTS

2.1 Recent Economic Developments on the World Scene and the EAC

2.1.1 Global Level

The World economy recorded a real Gross Domestic Product (GDP) growth rate of 3.9 percent in 2006 compared to 3.4 percent in 2005 due to vigorous trade expansion. Economic growth in the least developed countries continued to exceed 6 percent.

On the international level, GDP in USA stood at 3.3 percent, Japan 2.2 percent, Western Europe 2.7 percent, 7.5 percent for the economies in transition, 5 percent for southern Europe countries, and 6 percent for developing countries including Africa, and 8 percent for East Asia. Least developed countries recorded a 6.6 percent growth with Angola and Equatorial Guinea being the highest contributors to the growth. This performance is attributed to oil exports and increased public spending.

Overall, exchange rate developments in 2006 had a moderate impact on the dollar price level of internationally traded goods. Contrary to developments between 2002 and 2004, the average annual exchange rate change between the US dollar and the Euro and the British Pound had been rather moderate as divergent developments in the course of 2005 and 2006 balanced each other out. While a weaker yen might have contributed to weaker dollar export prices of Japan, the appreciation of the Canadian dollar and the currencies of several Asian traders had the opposite effect.

Table 2.1 Indicators of the international economic environment 2002 - 2006

	2002	2003	2004	2005	2006
World Trade Merchandise					
Growth of Volume of world exports (Percentage)	4.6	6.2	11.4	7.5	9.3

LIBOR = London Interbank Offered Rate (three month)

2.1.2 EAC Level

Below is a brief review of the macroeconomic performance in the region.

i. Economic Growth: For the year 2006, real GDP growth was above 5 percent in all countries. The growth rates of Rwanda and Burundi have not been consistent, though high in 2006. The problem facing the two countries is high reliance on the agricultural sector that is subject to climatic fluctuations. Table 2.2 provides the details of the growth rates over a five year period.

ii. Annual average Inflation rates: Tanzania was able to maintain single digit inflation in 2006; Burundi had a remarkable annual inflation rate of 2.7 percent in 2006. Prices were however moderate in all the countries.

iii. Current Account Deficits: All the countries recorded high current account deficits with Burundi having the highest deficit at 36.8 percent of GDP.

iv. Budget Deficits: All the countries recorded budget deficits with Kenya showing the best performance.

v. National Savings: Savings are generally very low in all the countries. All the countries therefore require concerted policy actions to boost savings rates because of the key role savings play in national development.

vi. External Debt: All countries recorded a decline in external debt stock. Rwanda performed well, because the country is a full beneficiary of Highly Indebted Poor Countries (HIPC) debt relief. Burundi faces the highest debt burden, but there is consistent decline in the ratio since 2003. This is a result of the increase in the grant element in Overseas Development Assistance (ODA) from 2002 and the disbursements of HIPC debt relief that began in August 2005 when the country reached the HIPC decision point.

vii. Reserves in Months of Imports: Tanzania, Rwanda and Uganda had reserves for six months of imports cover in 2006. This is largely because of large foreign exchange inflows associated with ODA; and to some extent increased inflows of Foreign Direct Investment (FDI) in the case of Tanzania and Uganda. Burundi and Kenya reserves are below six months of import cover.

viii. Other Macroeconomic Variables: the other important objectives in economic and monetary co-operation are to ensure low and market determined interest rates, stable and market determined exchange rates, and stable financial systems.

In all the five EAC states, interest rates are market determined. But the lending rates are quite high; and particularly the spread between the savings and lending rates are also high in all the countries without exception.

The exchange rate regimes in all the countries are flexible, with the rates determined by market forces. The nominal exchange rates are stable in all the countries, but the Kenya Shilling has experienced substantial appreciation since 2005. On the basis of real effective exchange rates, Tanzania and Uganda exchange rates have been stable, while Rwanda and Burundi have experienced appreciating trends with some element of stability and Kenya's currency has markedly appreciated since 2004.

The financial markets in all the countries are developing,; with Kenya having the strongest market. To develop and deepen these markets requires strong cooperation by governments, regulators and other stakeholders in the sector. Among the areas in which cooperation is ongoing include: sharing of information and experiences by the regulators; moves toward consolidation of financial services regulations; coordination of policies on licensing of banks, other financial institutions and representative offices; harmonization of taxation on debt instruments and dividend income; convertibility of the capital account; and, coordination of formulation and implementation of monetary policy by the central banks.

Table 2.2: Macroeconomic Indicators in EAC

	EAC State	1997/2001	2002	2003	2004	2005	2006
Real GDP Growth	Burundi	1.1	4.4	4.4	4.8	0.9	5.1

2.2 Trade Developments

2.2.1 Global Level

The strong global macroeconomic situation in 2006 provided a favourable framework for the expansion of international trade. In 2006, world merchandise exports grew in real terms (i.e. at constant prices) by 8.0 percent, compared to 6.5 percent in the preceding year. A large part of this trade acceleration can be attributed to the marked recovery in Europe's export and import growth. Higher prices of fuels and metals led to a moderate increase in the quantity of mining products traded internationally but the higher export earnings of oil exporters resulted in import growth in excess of the world average. High energy prices also invigorated demand for mining equipment and investment in machinery with high energy efficiency.

In 2006, the variation in regional real trade increased even through economic growth by region differed less than in the preceding year. This is so because the terms of trade were in favour of fuel-exporting countries and regions.

The USA recorded a growth of 12.5 percent in 2006 while Canada's merchandise export slowed due to lower US demand and depreciation of the Canadian dollar. Mexican Merchandise trade expanded with both imports and exports up by double digit rates as the economy recorded its best growth since 2000.

Asia's real merchandise exports remained the most buoyant recording a growth of 13.5 percent. Its imports rose faster than the preceding year but continued to lag behind its exports growth. The growth could be attributed to region major traders, China and Japan.

Europe's real merchandise exports recorded 7 percent growth. Double – digit export growth was recorded by countries at eastern border, Finland and Baltic States to Turkey in the South. All countries benefited from further integration with the European Union (EU) and the strength of import demand from the Commonwealth of Independent States (CIS) region.

CIS, Middle East, Africa and South/Central America and the Caribbean recorded 2 percent growth of export trade while their import rose faster than global trade in 2006. CIS recorded the most buoyant imports at 20 percent in 2006.

Africa's merchandise exports rose by 21 percent, again faster than imports, which are estimated to have increased by nearly 16 percent. The share of Africa in world merchandise exports reached its highest level since 1990. Although most of Africa's export growth can be attributed to the rise in oil exports, it is a noticeable development that non-oil exporting African countries increased their exports by about 16 percent. It is estimated that about one in ten African countries experienced a decline in their exports, while half of them recorded an export expansion which exceeded the global average. South Africa, the region's largest merchandise trader, reported a rise in its imports of 24 percent while exports advanced by 13 percent.

2.2.2 EAC Level

EAC trade has remained negligible registering negative trade balances at the global level. Tanzania and Uganda are categorised as least developed countries while Kenya is categorised as a developing country. The region's exports are mainly traditional agricultural products constituting mainly of Coffee, Cotton, flowers, Tea and Fish while the main imports are finished manufactured goods.

EAC countries are all original WTO Members. They are neither signatories nor observers to any of the WTO plurilateral agreements. All EAC countries accord at least MFN treatment to all their trading partners. During the Uruguay Round, the EAC members bound their tariffs individually. Bindings cover 14 percent on average of all tariff lines for the three partner states. These tariff binding commitments leave ample margins for discretionary increases in applied rates.

In January 2005, the EAC Common External Tariff (CET) came in force, with a few provisional exemptions. The move from national tariffs to the CET reduced average tariff protection in Kenya and Tanzania but increased in Uganda. The overall average applied rate of the CET is 12.9 percent. The average tariff on agricultural goods is 19.7 percent and 11.9 percent on non-agricultural products. Using the ISIC definition of sectors the average tariff on agriculture, hunting, forestry, and fishing is 17.3 percent, manufacturing is 12.8 percent, and mining and quarrying is 5.8 percent. About 99 percent of all tariff lines carry rates of 0

percent, 10 percent, or 25 percent. Some 58 tariff lines carry higher rates, mainly on dairy goods, wheat, and sugar.

In aggregate, the EAC's tariff shows a pattern of mixed escalation, negative from the first stage of processing (with an average tariff of 13.5 percent), to semi-finished products (with an average of 10.1 percent), and then positive to fully processed goods, on which tariffs average 14.4 percent.

Agriculture provides livelihood and employment to the majority of the EAC population. Food insecurity in the EAC has increased recently due to several factors, including unfavourable weather conditions (drought or floods), making emergency food aid necessary. Tariffs are the main trade policy instrument in the sector, although some non-tariff measures are still in force.

Mining and quarrying is the fastest growing sector in Tanzania and an important foreign exchange source and a magnet for foreign investment while in Kenya and Uganda, the sector remains of minor importance. Private investment is being encouraged in the sector. Tariff protection for the sector is relatively low at 5.8 percent on average.

The manufacturing sector in the EAC produces largely for the domestic market, with part of the production exported to regional markets. It continues to be relatively small and based mainly on the processing of agricultural goods in Tanzania and Uganda, and decreasing in Kenya, the most industrialized EAC country. EAC members have various programmes to promote industrial development and exports. The general development of the sector, however, has largely been hampered by supply-side constraints (e.g. high production costs, limited access to financing, and low quality of products).

The potential of the services sector remains largely unexploited in the EAC. In tourism, for example, where the EAC's attractions are among the best in Africa, inadequacies in infrastructure and marketing/promotion, financial constraints, security issues, and lack of skilled labour have limited its development. Further liberalization and commitments under the GATS could contribute to attracting investment in services, in general, and improve the efficiency of other economic activities and the competitiveness of EAC's exports, especially by reducing costs related to, inter alia, telecommunications, transport, and energy.

CHAPTER 3: EAC TRADE DEVELOPMENTS

3.1 Total Intra-EAC Trade

In 2006, total intra-EAC¹ trade decreased by 12.5 percent to stand at US\$ 1,617.1 million. The decline was occasioned by decreases in both Intra-EAC imports and exports during the year compared to the previous year. Kenya² accounted for the highest share of total trade at 44.4 percent while Uganda and Tanzania accounted for 32.9 percent and 22.8 percent respectively. Table 3.1 presents details on intra-EAC trade for the period 2003 to 2006.

Table 3.1: Total Intra-EAC Trade 2003-2006, (Value in US\$ million)

	Imports				Percentage Changes		
	2003	2004	2005	2006	2004	2005	2006

¹ Intra-EAC trade considers the Partner States that were EAC members as at 2006

² In this EAC Trade Report, Kenya's data includes data from the EPZ, unlike the 2005 EAC Trade Report.

Figure 3.1: Total Intra-EAC Trade (US\$ million)

Source: Partner States Revenue Authorities, Central Banks and National Statistics Offices

3.1.1 Imports

Total intra-EAC imports decreased by 7.5 percent in 2006 compared to increases of 12.3 percent and 33.0 percent in 2004 and 2005 respectively. Uganda's share in intra-EAC imports reduced from an average of 70.0 percent recorded in 2003 to 2005, to 59.1 percent in 2006. Over the same period, Kenya's share in intra-EAC imports have been increasing gradually and reached double digit in 2006 at 10.6 percent, while Tanzania share in intra-EAC imports averaged 23.1 percent over the same period compared to 30.3 percent in 2006.

3.1.2 Exports

Total intra-EAC exports decreased by 16.1 percent in 2006 compared to increases of 14.6 percent and 13.5 percent in 2004 and 2005, respectively. Uganda's share in intra-EAC exports rose from 8.3 percent in 2005 to 11.4 percent in 2006. However, it remained stable at about 10 percent in 2003 and 2004. Kenya's intra-EAC exports declined marginally from 78.3 percent in 2005 to 72.0 percent in 2006. On the other hand, Tanzania's share in intra-EAC exports rose from 13.4 percent in 2005 to 16.6 percent in 2006.

3.2 EAC Trade with the Rest of the World

During 2006, the total EAC trade volume increased by 22.8 percent to US\$ 20,663.0 million. The increase was largely explained by the upsurge in imports by 30.5 percent to US\$ 14,326.7 million, accounting for about 70 percent of total EAC trade in the year under review. The huge increase in imports relative to exports resulted in widening of the EAC trade deficit from US\$ 5,117.8 million in 2005 to US\$ 7,990.3 million in 2006.

The share of total intra-EAC trade in total trade declined marginally to 7.8 percent in 2006 compared to 11.0 percent in the previous year. EU still takes the largest share of EAC trade with the rest of the World, averaging 22.0 percent for the period 2003 to 2006 (Refer to Table 3.2).

Note: COMESA excludes Kenya and Uganda while SADC excludes Tanzania

3.2.1 Imports

Demand for imports in the community has been on the increase during the period under review following increase in economic activities. The continued rise in oil prices in world market has further pushed up the imports bill with oil imports accounting for about 20 percent of total EAC imports. The share of total intra-EAC imports in total EAC imports declined from an average of 7.2 percent in 2003 to 2005 to 5.1 percent in 2006.

3.2.2 Exports

Total EAC exports recorded an increase of 8.2 percent to US\$ 6,336.3 million. The increase was much lower compared to the growth rate of 17.3 percent that was registered in the previous year partly due to unfavorable weather condition that affected production and hence export of agricultural products particularly for Tanzania. The share of total intra-EAC exports in total EAC exports declined from an average of 18.8 percent in 2003 to 2005 to 14.1 percent in 2006.

3.3 Rwanda's Trade with the EAC

Rwanda's external trade is characterized by low levels of exports compared to imports as summarized in Table 3.3. The country's EAC total trade was US\$ 131.5 million in 2005 compared to US\$ 172.0 million in 2006.

Table 3.3: Rwanda's Trade with the EAC (US\$ Million)

Trade Flows	2005	2006	% change
Total Imports from EAC	96.94	139.40	43.80

EAC Trade Balance	-62.34	-106.78	71.27
Rwanda total trade	573.16	629.46	9.82
EAC share (percent)	22.95	27.33	

Source: Rwanda Revenue Authority

3.3.1 Imports

Rwanda's imports from EAC have been increasing over time. Imports amounted to US\$ 49.1 million, US\$ 67.4 million, US\$ 96.4 million and US\$ 139.4 million in 2003, 2004, 2005 and 2006 respectively. Imports from EAC accounted for 16.9 percent and 22.1 percent of total

trade in 2005 and 2006 respectively. Food products, salts and mineral fuels dominated imports from EAC.

3.3.2 Exports

Except for the year 2004, exports to EAC region have been decreasing as evidenced from the export values of US\$ 38.4 million, US\$ 74.3 million, US\$ 34.6 million and US\$ 32.6 million in 2003, 2004, 2005 and 2006 respectively. The high value of exports in 2004 was as a result of increased exports to Uganda in particular amounting to 51.7 percent of Rwanda's exports to EAC mainly on account of increased exports of tin ores, tea, coffee and tantalum. Exports to EAC represented 26.3 percent and 19.0 percent of Rwanda's total trade with EAC in 2005 and 2006 respectively. Rwanda's exports to Kenya include coffee and tea on transit to Mombasa for auction.

3.4 Burundi's Trade with the EAC

Burundi's external trade with EAC increased by 3.2 percent from US\$ 63.3 million in 2005 to US\$ 65.2 million in 2006, see Table 3.4.

EAC imports totalled US\$ 59.2 million in 2005 against US\$ 61.0 million in 2006 while the exports to EAC were about US\$ 4.1 million in 2005 and US\$ 4.3 million in 2006 with an increase of 3 percent and 5.7 percent respectively.

Burundi's exports exclude gold because it is not a domestic product.

Source: Central Bank of Burundi

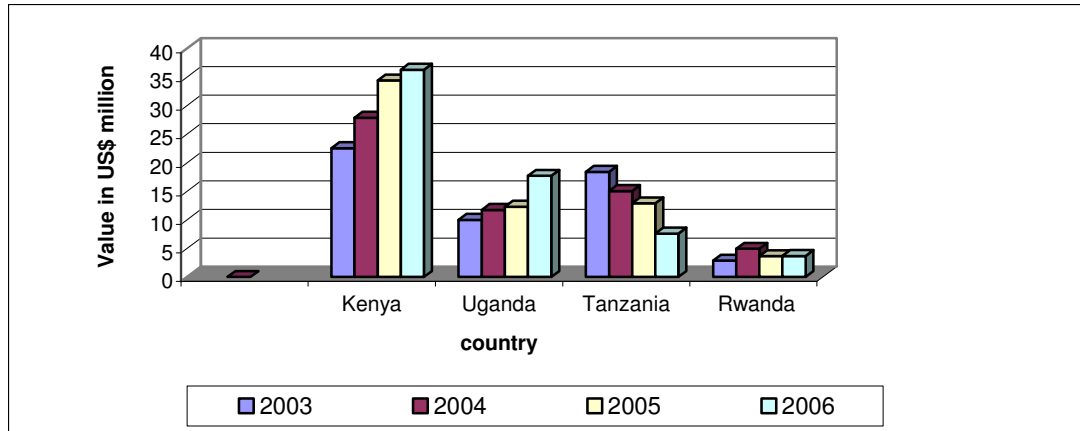

As a share of Burundi's total trade, EAC accounted for 19.5 percent in 2005 and 12 percent in 2006. The share of EAC Imports is about 22.2 percent in 2005 and 14 percent in 2006 while exports represent 7.1 percent in 2005 and 3.8 percent in 2006.

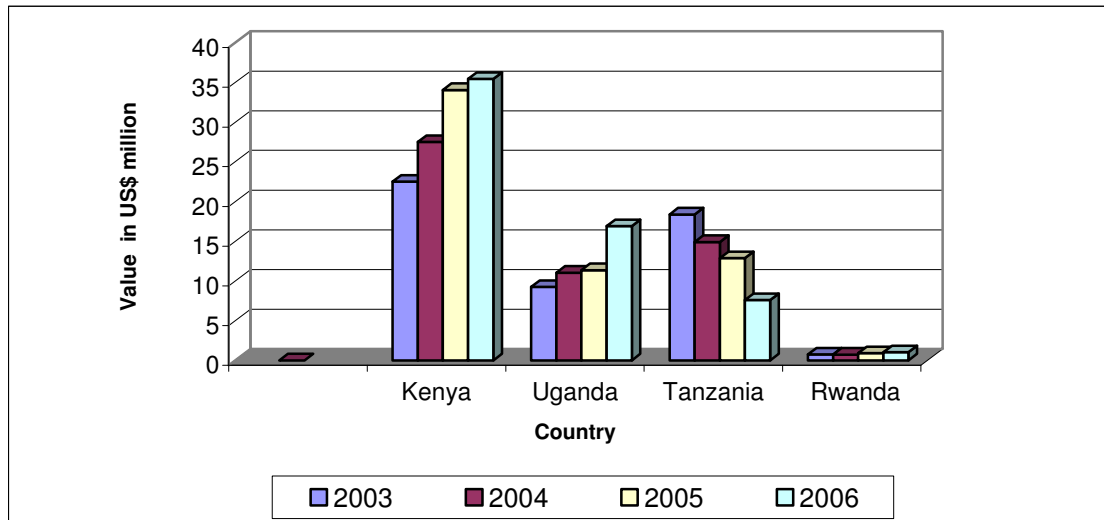

Figure 3.2: Burundi's Total Trade with EAC

3.4.1 Imports

Imports from EAC partner states increased by 3.0 percent in 2006 compared to the rise of 6.5 percent and 9.3 percent registered in 2004 and 2005 respectively. The imports from Uganda increased by 48.8 percent while those from Tanzania decreased by 41.1 percent in 2006. On the other hand, Burundi imported more from Kenya with 58 percent of the total Burundi intra EAC imports in 2006. The major imports from Kenya are: Iron and steel, Glass and Glassware, Rubber and articles thereof, plastic and articles thereof, sugar, aluminum and articles thereof, soap, zinc and articles thereof, milk and cream.

Figure 3.3: Burundi's Imports from EAC

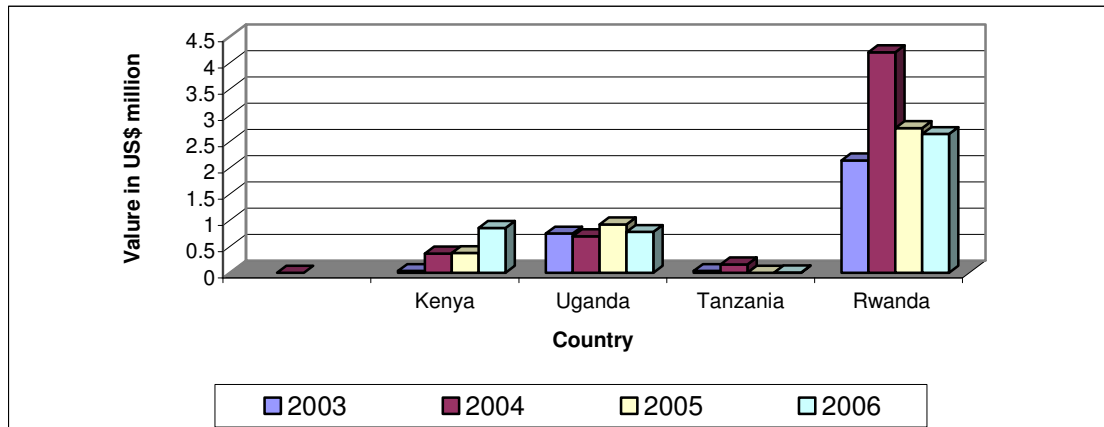

3.4.2 Exports

Burundi's exports in EAC partner state amounted to US\$ 4.3 million in 2006 with an increase of 5.7 percent due to the growth in exports to Kenya of 129.7 percent.

In general, Burundi exported more to Rwanda compared to the other EAC country members with 62 percent of the total Burundi intra EAC exports in 2006. Burundi exports to Tanzania decrease year after year. The major items exported to Rwanda include sugar, in solid form niobium, vanadium, woven cotton fabrics with man-made fibres, cigarettes, palm oil, Beer made from malt and soap.

Figure 3.4: Burundi's Exports to EAC

CHAPTER 4: TRADE DEVELOPMENTS IN THE EAC PARTNER STATES

4.1 Kenya's International Trade

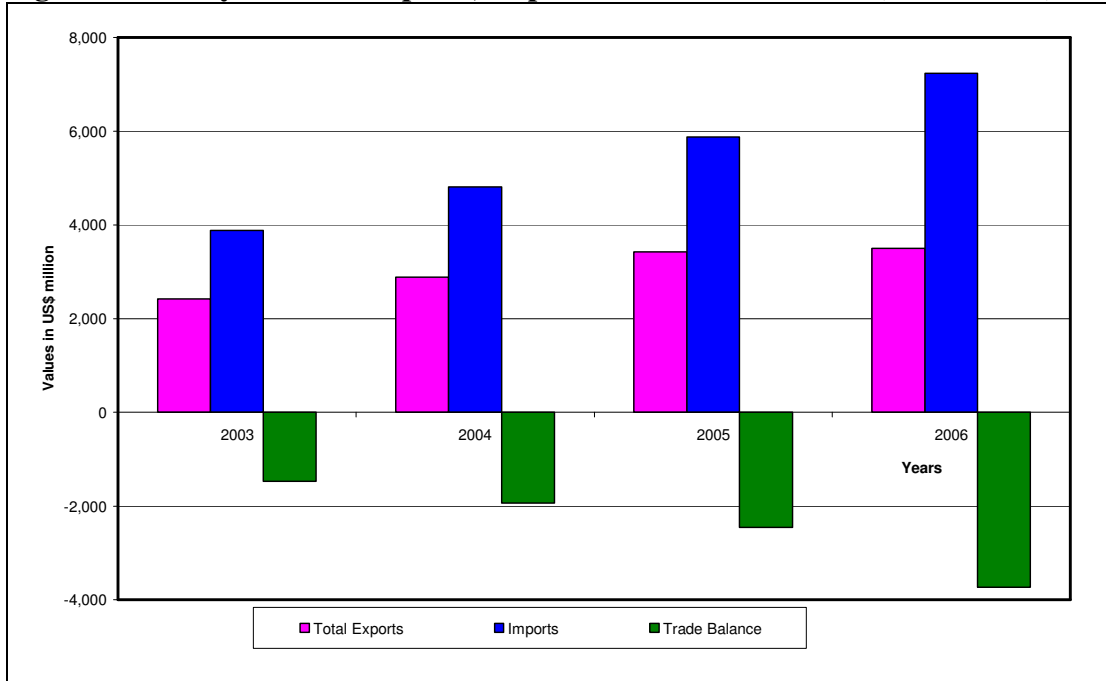

Kenya's total trade increased by 15.4 percent from US\$ 9,299.3 million in 2005 to US\$ 10,734.1 million in 2006. In 2004 and 2005, the growth in the volume of trade averaged 21.52 percent. The deceleration in the rate of growth of total trade between 2005 and 2006 is attributed to deterioration in growth of exports to 2.4 percent compared with 18.7 percent in 2005 as imports grew by 23.0 percent in 2006 compared with 22.1 percent in the previous year. However, the decline in exports may be attributed to proper classification of transit goods which were included as part of exports.

EU still remains Kenya's major trading partner accounting for an average of 24.0 percent over the period 2003 to 2006. Share of Kenya's trade with COMESA accounts for an average of 8.6 percent over the period 2003 to 2006.

Kenya's total trade with Burundi declined by 29.2 percent from US\$ 49.4 million in 2005 to US\$ 35 million in 2006 compared to growth of 3.0 percent and 31.6 percent in 2004 and 2005, respectively. Similarly, total trade with Rwanda declined by 29.5 percent from US\$ 98 million in 2005 to US\$ 69.1 million in 2006. Kenya's trade balance with Burundi and Rwanda remained in surplus in favour of Kenya since 2003.

The balance of trade with the Rest of the World remained in deficit over the period 2003 to 2006. The trade deficit widened significantly by 51.9 percent between 2005 and 2006, after averaging about 30.0 percent in the previous two years due to deterioration in growth in exports which remained steady. Figure 4.1 depicts Kenya's trade balance

Figure 4.1: Kenya's Total Exports, Imports and Trade Balance (US\$ million)

Source: Kenya Revenue Authority, Central Bank of Kenya and Kenya National Bureau of Statistics

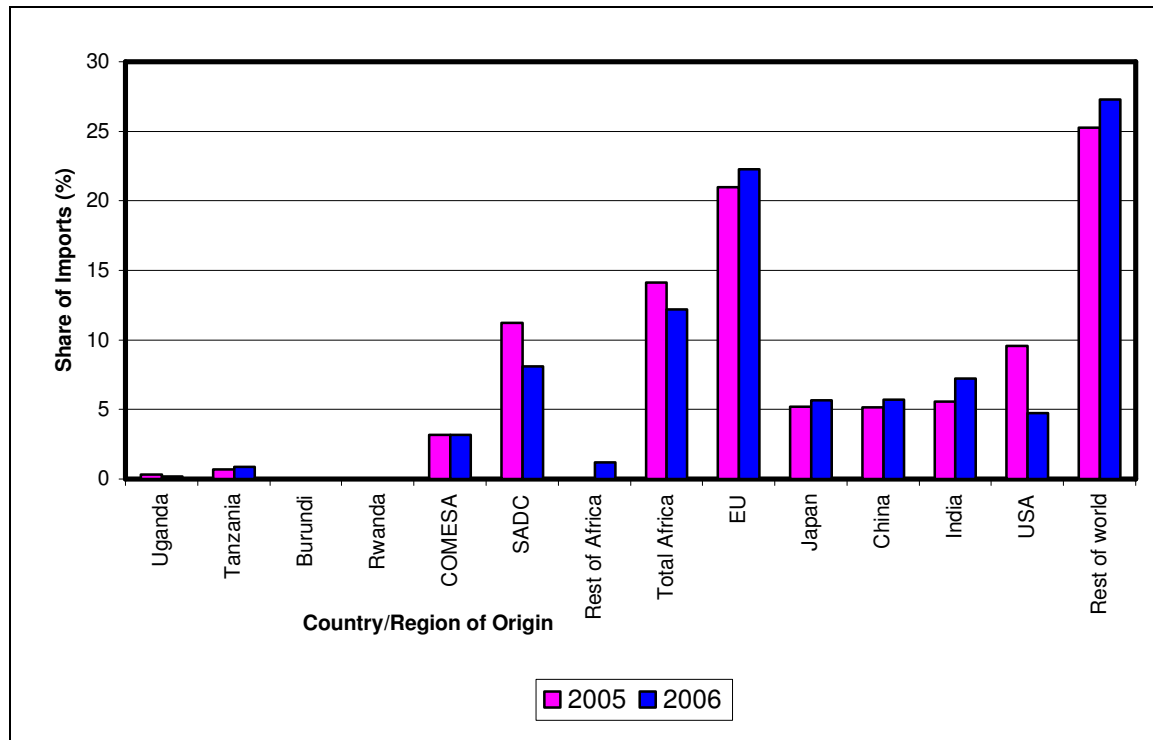

4.1.1 Imports

Over the period 2004 to 2006, total imports grew by an average of 23.0 percent and amounted to US\$ 7,231.05 million in 2006 (see Table 3 in the Appendix). A list of twenty major import goods categories is presented in Table 6c. These include, among others, mineral fuels and products thereof; vehicles other than railway and parts and accessories thereof; boilers, machinery and mechanical appliances; aircraft, spacecraft; and electrical machinery and equipment. All the items listed registered increases in value between 2005 and 2006, with the exception of the aircraft category which declined by 2.3 percent.

The European Union remained the major source of Kenya's imports, contributing an average of about 22.7 percent of total imports over the last four years, followed by SADC at an average of 10.1 percent. The proportion of imports from Japan, China and India ranged from 5 to 7 percent during the four year period. Imports from the USA accounted for less than 5 percent of total imports, except for 2005 when its' share recorded 9.6 percent on account of new aircrafts.

Kenya's imports from Burundi and Rwanda have risen steadily since 2003. Imports from Burundi rose from US\$ 0.3 million in 2005 to US\$ 4.7 million in 2006 while imports from Rwanda rose from US\$ 1.5 million in 2005 to US\$ 2.9 million in 2006.

Figure 4.2: Kenya's Percentage Shares of Imports by Country/Region of Origin

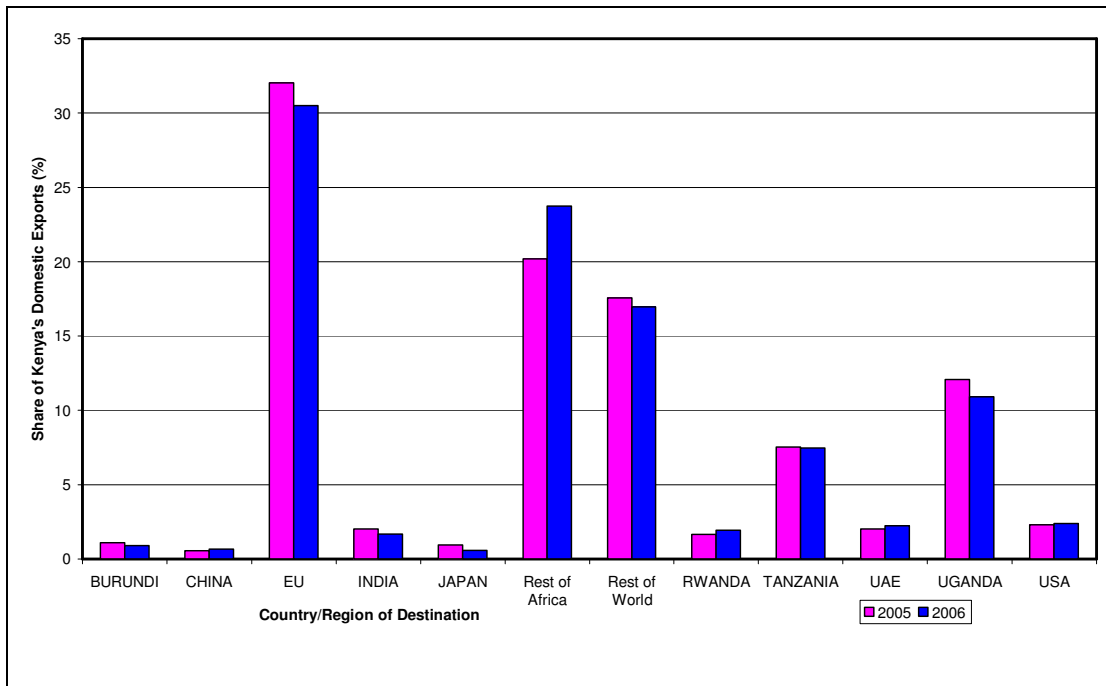

Source: Kenya Revenue Authority, Central Bank of Kenya and Kenya National Bureau of Statistics

4.1.2 Domestic Exports

Domestic exports in 2006 amounted to US\$ 2,917.1 million, representing an increase of 14.3 percent over the 2005 level of US\$ 2,552.4 million. While exports to all the other destinations recorded increases in 2006, those to India and Japan declined. The European Union still remained the main export destination, accounting for an average of 6.2 percent of all Kenya's exports. The proportion of exports to the USA has risen steadily over the period from 7.7 percent in 2004 to 8.3 percent in 2006 on account of increased of textile exports. Kenya's major domestic exports include coffee, tea, live trees and other plants thereof, edible vegetables, tobacco, iron and steel, mineral fuels, plastics and articles thereof.

Domestic exports to Burundi declined from US\$ 28.1 million in 2005 to US\$ 26.8 million in 2006 while the share of total domestic exports declined from 1.1 percent to 0.9 percent. However, domestic exports to Rwanda have been on the increase, rising from 31.4 percent from US\$ 42.7 million in 2005 to US\$ 57.7 million in 2006.

Figure 4.3: Kenya’s Percentage Shares of Exports by Country/Region of Destination

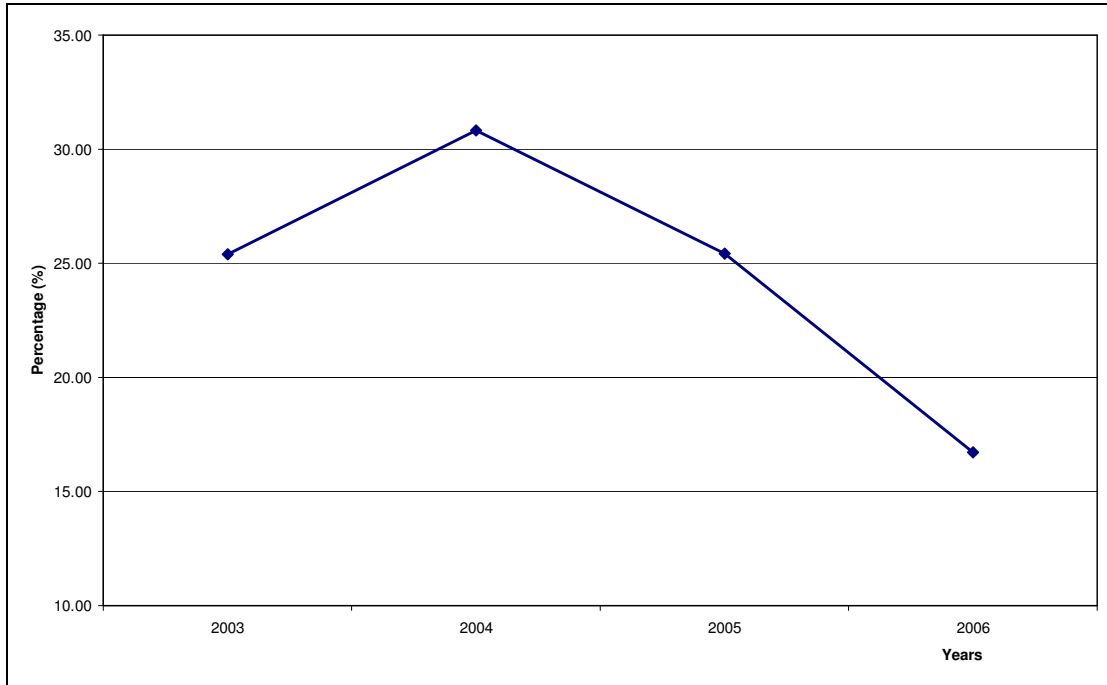

Source: Kenya Revenue Authority, Central Bank of Kenya and Kenya National Bureau of Statistics

4.1.3 Re-Exports

Over the last two years, the share of re-exports in total exports has declined from 30.8 percent in 2004 to 16.7 percent in 2006. After an increase of 44.8 percent in 2004, re-exports declined by 2.1 percent and 32.6 percent in 2005 and 2006 respectively. Notable decreases were in re-exports to Uganda, Rwanda and Burundi.

Figure 4.4: Kenya's Re-Exports as a Percentage of Total Exports

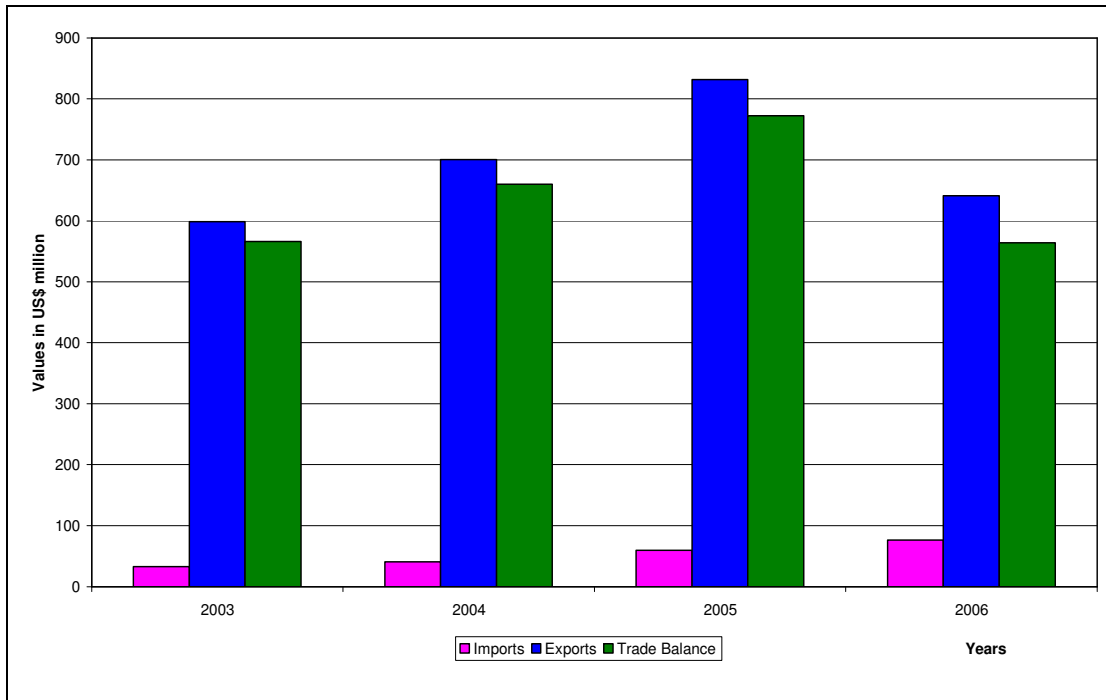

Source: Kenya Revenue Authority, Central Bank and Kenya National Bureau of Statistics

4.1.4 Intra – EAC Trade

Kenya's total trade with the EAC partner states declined by 19.4 percent to stand at US\$ 717.7 million in 2006 from US\$ 890.7 million in 2005, after increasing steadily and significantly in the previous three years. Imports from the partner states increased by 29.0 percent in 2006 against a decline of 22.9 percent in exports.

Kenya's trade balance with the EAC partner states remained positive and increased steadily between 2002 and 2005. In 2006, however, it declined by 26.9 percent, but was still positive. This replicates the pattern of movements in trade balances between both Uganda and Tanzania over a similar period. In the year 2006, the trade balance with Uganda declined by 31.9 percent, while the trade balance with Tanzania went down by 14.5 percent.

Figure 4.5: Kenya's Trade with EAC Partner States (US\$ million)

Source: Kenya Revenue Authority, Central Bank of Kenya and Kenya National Bureau of Statistics

4.1.4.1 Imports

Total imports from the EAC partner states have been on the increase since 2004. However, the rate of increase has generally been decelerating registering 29.0 percent in 2006 down from 46.1 percent in 2005. Thus, total imports from EAC amounted to US\$ 76.7 million in 2006 compared with US\$ 59.5 million in 2005.

Country's imports from Uganda declined by 24.5 percent in 2006, after a steep rise of 74.5 percent in 2003. In 2006, Kenya imported goods worth US\$ 14.0 million from Uganda compared with US\$ 18.5 million in the previous year. However, imports from Uganda accounted for less than one percent of total imports from 2003 to 2006. The major imports from Uganda included animal and vegetable fats; cereals; cotton; oil seeds and oleaginous fruits; furniture and wood and wood products (see Table 5c).

Imports from Tanzania have, on the other hand, been on the increase, rising by 53.4 percent and 53.1 percent in 2005 and 2006 respectively. Kenya's imports from Tanzania in 2006

amounted to US\$ 62.7 million compared with US\$ 41.0 million in 2005. Imports from Tanzania also accounted for less than one percent of total imports. Among the major imports from Tanzania included wood and articles of wood; paper and paper products; cotton; copper and articles thereof and plastics and articles thereof.

4.1.4.2 Domestic Exports

Domestic exports to the EAC partner states amounted to US\$ 536.4 million in 2006 compared with US\$ 500.7 million in 2005, an increase of 7.1 percent. The growth in domestic exports was moderate compared with 25.8 percent and 47.6 percent growth in 2004 and 2005, respectively.

Domestic exports to Uganda rose by 3.3 percent in 2006 following steady increases between 2003 and 2005. In 2006, Kenya's domestic exports to Uganda amounted to US\$ 318.6 million compared with US\$ 308.4 million in 2005. The share of domestic exports to Uganda declined from 12.1 percent in 2005 to 10.9 percent in 2006. Major exports to Uganda included mineral fuels, mineral oils and related products; Salt; sulphur; earths and stone and plastering materials; paper and paperboard; plastics and articles thereof; iron and steel; beverages, spirits and vinegar; and pharmaceutical products (see Table 5c).

Kenya's domestic exports to Tanzania rose by 13.3 percent in 2006, also following steady increases in 2004 and 2005. Total domestic exports to Tanzania in 2006 amounted to US\$ 217.8 million compared with US\$ 192.3 million. However, share of Kenya's domestic exports to Tanzania has remained fairly stable at 7.5 percent. Exports to Tanzania were composed largely of similar items as those exported to Uganda.

4.1.4.3 Re-Exports

Kenya's intra-EAC re-exports declined drastically by 68.4 percent from US\$ 330.5 million in 2005 to US\$ 104.6 million in 2006. Thus, the share of re-exports to total exports declined from 25.4 percent in 2005 to 16.7 percent in 2006.

The re-exports to Uganda declined by 73.5 percent from US\$ 258.2 million in 2005 to US\$ 68.5 million in 2006 mainly on account of decreased re-exports of mineral fuels and oils. Share of re-exports to Uganda to total re-exports also declined from 29.7 percent in 2005 to 11.7 percent in 2006.

Similarly, re-exports to Tanzania declined by 50.1 percent from US\$ 72.3 million in 2005 to US\$ 36.1 million in 2006 following decreased re-exports of mineral fuels and oils. The share of total re-exports to Tanzania decreased from 8.3 percent to 6.2 percent.

Table 4.1: Kenya’s Intra-EAC exports, 2003 – 2006 (US\$ million)

Intra-export flows	2003	2004	2005	2006
Intra-Domestic Exports	269.62	339.26	500.70	536.41
Intra-Re-exports	328.73	361.05	330.51	104.56
Total Intra-Exports	598.35	700.31	831.20	640.97
% Share of Intra-Re-exports	54.94	51.56	39.76	16.31

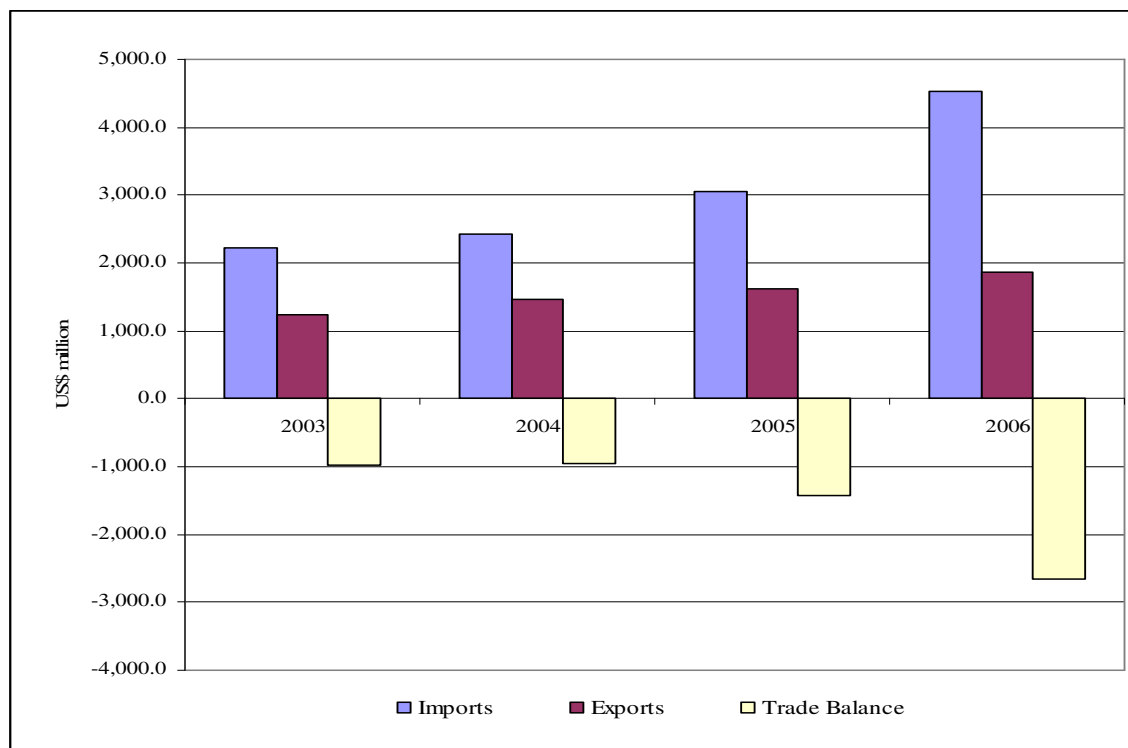

Source: KRA

4.2 Tanzania’s International Trade

Tanzania’s total trade grew by 37.4 percent to a total of US\$ 6,409.4 million in 2006 compared to the level that was recorded in 2005. Much of the increase in total trade is attributed to a significant upsurge in imports that went up by 49.1 percent while exports recorded an increase of 15.4 percent, leading to a widening of the trade deficit by almost double to US\$ 2,667.2 million in 2006 (refer to figure 4.6). The development is evidenced by the decline in import cover ratio to 41.2 percent compared to the ratio of 60.2 percent and 53.3 percent in 2004 and 2005 respectively. European Union remained to be a single trading bloc that enjoyed a lion’s share by accounting about 18.2 percent of Tanzania’s total trade in 2006.

The trade volume between Tanzania and Burundi recorded a positive trend with an annual average growth rate of 32.1 percent reaching at a total trade volume of US\$ 38.0 million in 2006 compared to a total trade volume of US\$ 13.0 million in the previous year. Much of the increase in trade volume with Burundi is attributed to the surge in exports from Tanzania to Burundi as imports from Burundi have remained low. There has been no significant change in trade between Tanzania and Rwanda in the past three years. In 2006, the total volume of trade between Tanzania and Rwanda reached at US\$ 5.7 million compared to US\$7.0 million in the previous year. The export volume from Tanzania to Rwanda accounted for over 90.0 percent of the trade volumes between the two countries.

Figure 4.6: Tanzania's Total Exports, Imports and Trade Balance (US\$ million)

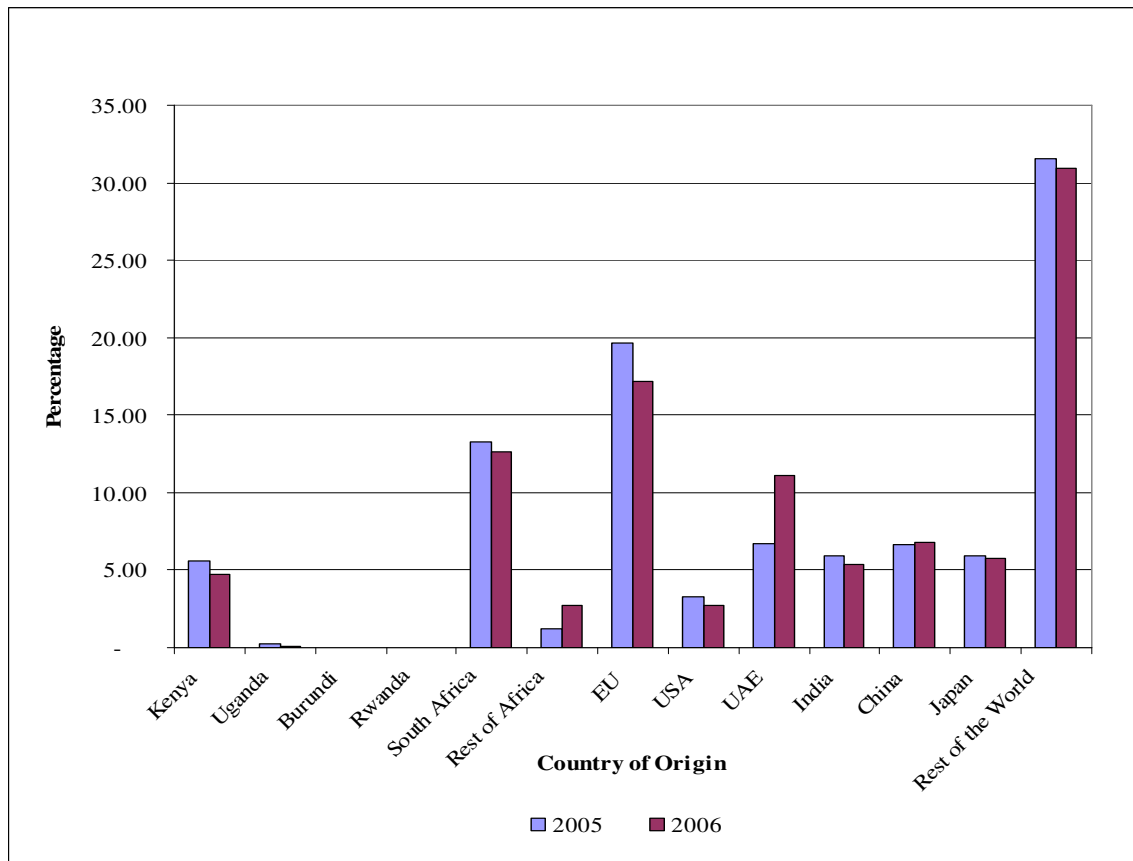

Source: Tanzania Revenue Authority, Central Bank and National Statistics Office

4.2.1 Imports

In 2006, Tanzania's total imports increased to US\$ 4,538.3 million, representing an increase of about 49.1 percent compared to the level that was recorded in the previous year. Much of the increase in total imports was attributed to the surge in oil and food imports. During the review period, the share of oil to total imports increased to over 25 percent compared to a total share of about 12 percent in 2005. High oil prices in the world market and increase in oil demand mainly for power generation in the country following a prolonged drought weather attributed to the significant increase in oil import in the review year. In addition, low level of domestic production amid the unfavourable weather conditions explains the surge in importation of food and foodstuffs in 2006. Major origins of Tanzanian imports in 2006 were SADC (mainly South Africa), Middle East, China, Japan, India, EU bloc and Kenya. The first seven countries of origins accounted for a total of over 80 percent of total country's imports.

Figure 4.7: Tanzania's Percentage Shares of Imports by Country/Region of Origin

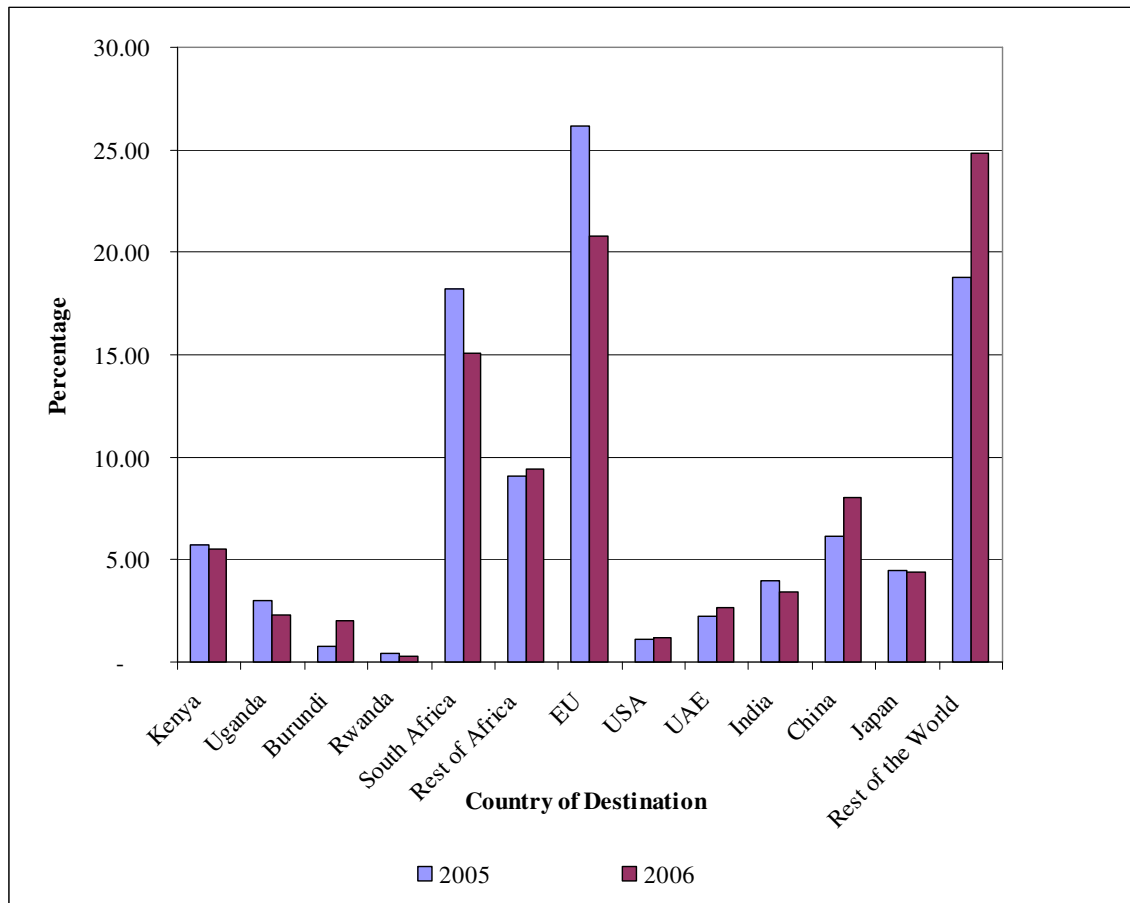

Source: Tanzania Revenue Authority, Central Bank and National Statistics Office

4.2.2 Domestic Exports

Tanzania has maintained its positive export growth rate in recent years as it grew by 15.5 percent, reaching at US\$ 1,871.1million in 2006. Gold continued to dominate the country's exports by recording a marginal increase in its share to total exports by accounting for 45.7 percent of total exports in 2006. Conversely, the share of traditional exports (which are mainly major agricultural cash crops) to total exports declined to 15.5 percent from 23.8 percent in 2005. The traditional exports include coffee, cotton, sisal, tea, tobacco, cashew nuts and clove. The decline in performance of traditional exports was largely attributed to the unfavourable weather conditions in 2005/06 that adversely affected domestic production of the crops hence their exports. Major destinations of Tanzania exports during 2006 were European Union, South Africa, China, Kenya, Japan and India which in total accounted for over 75 percent of total exports.

Figure 4.8: Tanzania’s Percentage Shares of Exports by Country/Region of Destination (in US\$ million)

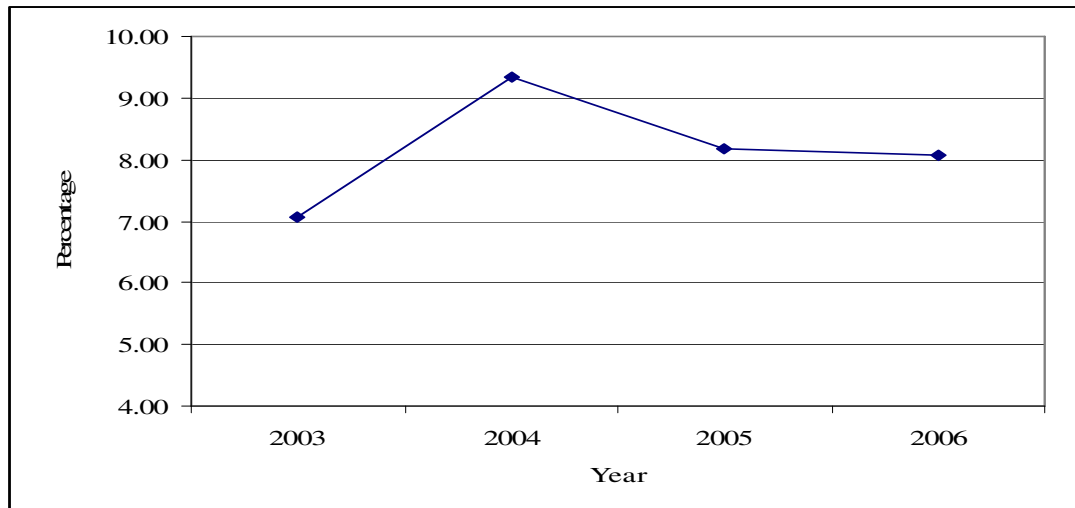

Source: Tanzania Revenue Authority, Central Bank and National Statistics Office

4.2.3 Re-exports

Tanzania’s re-exports increased to US\$ 151.3 million in 2006 from US\$ 132.4 million in the previous year, with wheat and petroleum products taking the lead. The increase of Tanzania’s re-exports is partly attributed to the country’s strategic geographical location which makes it easier to import goods in bulk and re-export the same to the neighbouring land-locked countries in the region. However, the share of re-exports to total exports has remained below 10 percent in last three years.

Figure 4.9: Tanzania's Percentage Shares of Re-Exports to Total Exports

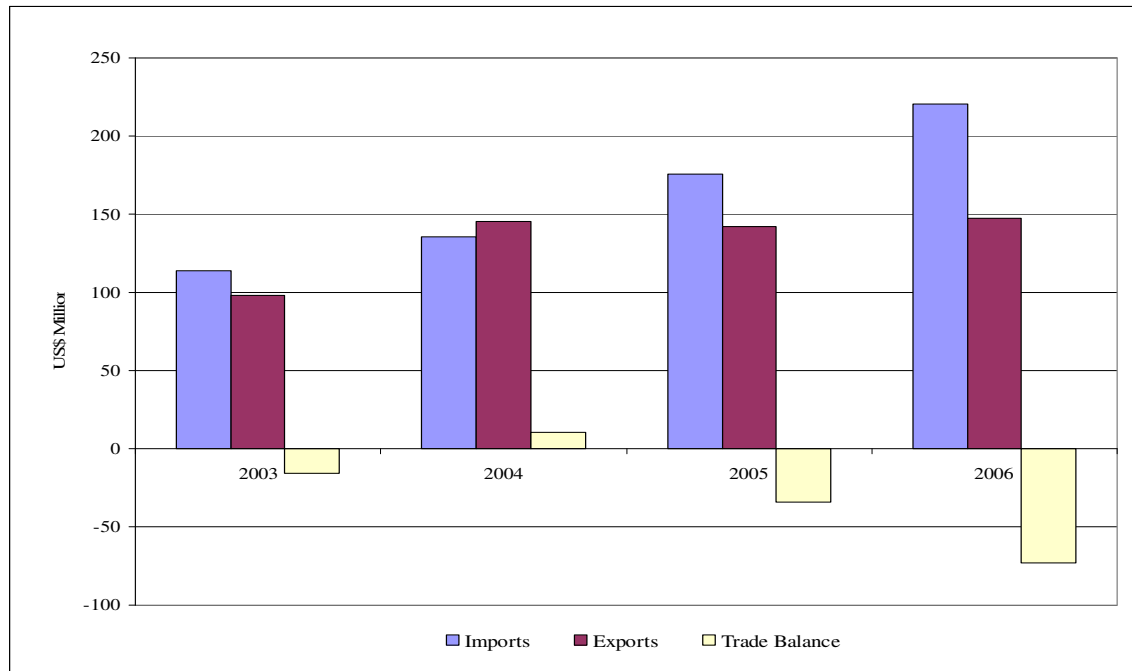

Source: Tanzania Revenue Authority, Central Bank and National Statistics Office

4.2.4 Intra-EAC Trade

During 2006, Tanzania's trade with its EAC partner states increased to US\$ 368.0 million, representing an increase of 15.8 percent to the amount that was recorded a year earlier. Much of the increase in total trade was attributed to imports which recorded an increase of 24.5 percent to a total of US\$ 220.6 million. On the other hand, exports remained virtually unchanged by recording a small increase of 3.8 percent reaching at US\$ 147.4 million. The huge increase in imports compared to exports led to widening of trade deficit with other EAC partner states. In 2006, a total deficit of US\$ 73.2 million was recorded compared to a deficit of US\$ 33.9 million a year ago.

Tanzania's trade balance with Kenya deteriorated to a deficit of US\$ 111.5 million in 2006 compared to a deficit US\$ 76.2 million recorded in the previous year. The development is largely attributed to a much higher increase in imports, particularly imports of building materials that offset the marginal increase in exports. On the other hand, trade balance with Uganda remained positive though it declined to a surplus of US\$ 38.3 million compared to a trade surplus of US\$ 42.3 million in 2005.

Figure 4.10: Tanzania’s Intra EAC Imports, Exports and Trade Balance (in US\$ million)

Source: Tanzania Revenue Authority, Central Bank and National Statistics Office

4.2.4.1 Imports

Total imports from EAC partner states have been increasing steadily amounting to US\$ 220.6 million in 2006 compared to US\$ 175.9 million in the previous year. The increase in imports from EAC partner states was partly attributed to the implementation of the Customs Union which came into effect in January 2005. Much of intra-EAC imports originated from Kenya which accounted for 97.6 percent worth US\$ 215.2 million. The major items that were imported from Kenya included ceramic products, petroleum products, motor vehicles, machinery parts, iron and steel, pharmaceutical products. In 2006, total imports valued at US\$ 5.4 million were imported from Uganda with cereals and cement taking the major shares of items imported.

4.2.4.2 Domestic Exports

Tanzania’s exports to EAC partner states recorded a growth rate of 17.9 percent to stand at US\$ 119.4 million in 2006 compared to the levels that were recorded in the previous year. Most of the increase was attributed to the surge in exports to Kenya as the level of exports to

Uganda remained almost unchanged during the review period. Tanzania's exports to Kenya increased by 22.8 percent to US\$ 98.8 million when compared to the amount reported in 2005. The major exports to Kenya included tea, cotton, fish and fish products as well as paper products. However, it is worth noting that tea exports to Kenya were mostly for the Mombasa auction and fish and fish products in transit to the European markets. Conversely, exports to Uganda recorded a marginal decline to US\$ 20.6 million from US\$ 20.8 million in 2005. Major items exported to Uganda included iron and steel products, palm oil, electric transformers, plastic items and sacks and bags.

4.2.4.3 Re-exports

During 2006, Tanzania's re-exports to other EAC partner states recorded a decline of 31.1 percent to US\$ 28.0 million from US\$ 40.7 million in the previous year largely on account of a decline in re-exports of petroleum products, wheat and iron and steel products. Re-exports to Kenya recorded significant decline from US\$ 12.8 million in 2005 to US\$ 4.9 million in the review period. Likewise, re-exports to Uganda declined from US\$ 27.9 million to US\$ 23.1 million in 2006 largely following a decline of wheat which accounted for more than 70 percent of Tanzania's re-exports to Uganda.

Table 4.2: Tanzania's Intra-EAC exports, 2003 – 2006 (US\$ million)

Intra-export flows	2003	2004	2005	2006
Intra-Domestic Exports	89.3	96.3	101.3	119.4
Intra-Re-exports	43.90	49.33	40.69	28.02
Total Intra-Exports	133.24	145.67	141.97	147.41
% Share of Intra-Re-exports	32.95	33.87	28.66	19.01

Source: TRA and NBS

4.3 Uganda's international trade

Uganda's total trade increased by 22.8 percent to US\$ 3,519.5 million in 2006, a continuation of the positive growth path of 20.5 percent and 24.6 percent registered in 2005 and 2004 respectively. The overall trade comprised of exports, which grew at 18.4 percent in 2006 compared to a growth of 24.4 percent and 22.4 percent in 2005 and 2004 respectively. Total imports also rose by 24.5 percent to US\$ 2,557.3 million in 2006 compared to the rise of 19.0 percent and 25.5 percent registered in 2005 and 2004, respectively. The increase in total trade was on account of the rise in exports of 18.4 percent to US\$ 962.2 million in 2006 arising

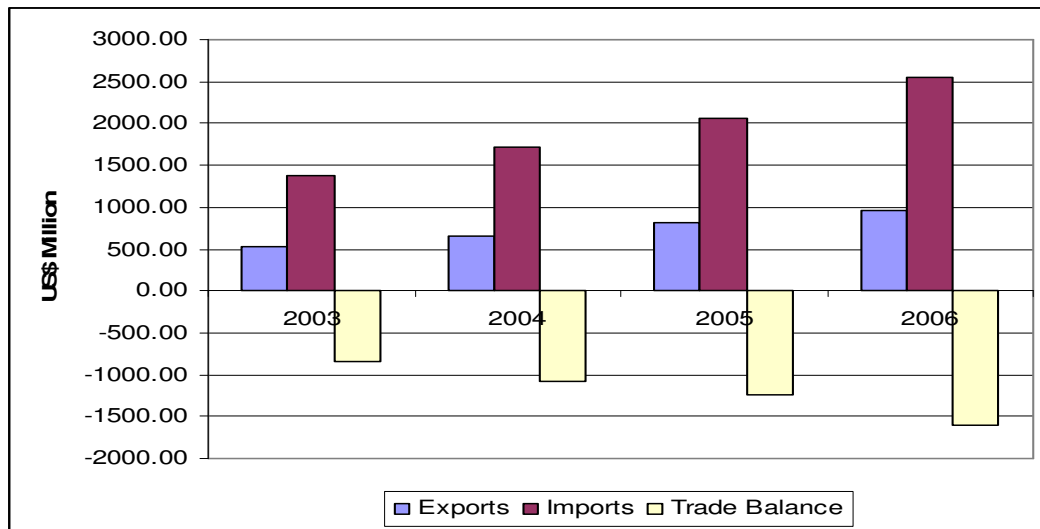

from improved export prices and volumes. Exports to COMESA, UAE and EU increased by 10.7 percent, 120.8 percent and 2.3 percent in 2006, respectively.

Favourable macro economic conditions as well as the easing of the exogenous shocks like weather that had impeded growth in 2005 explain the growth in total trade values in 2006. The Ugandan economy continued to reap from the macro-economic recovery and stabilisation policies undertaken by government during the last decades. Uganda's trade growth was in line with the global economy that continued to register robust growth in 2006 despite bouts of financial volatility.

Uganda's trade balance deteriorated by 28.5 percent from a deficit of US\$ 1,241.3 million in 2005 compared with a deficit of US\$ 1,595.1 in 2006. Apart from COMESA and the rest of Africa where Uganda registered a trade surplus, a trade deficit with the other trading regional blocks continued to be observed.

The worsening trade balance was on account of deterioration in the trade balance with the EU, SADC, and UAE of 67.6 percent, 35.4 percent and 165.6 percent to a deficit of US\$ 217.5 million, US\$ 130.7 million and US\$ 138.9 million in 2006 respectively. However, Uganda's trade balance with COMESA improved by 10.6 percent to a trade surplus of US\$ 146.7 million from a surplus of US\$ 132.3 million in 2005. The continued export of raw materials compared to import of highly priced manufactured goods as well as the limited penetration and access to the new markets especially the Asian countries explains the deteriorating trade balance. Figure 4.11 summarises the developments in Uganda's international trade.

Figure 4.11: Uganda’s Total Exports, Imports and Trade Balance (US\$ million)

Source: UBOS and URA

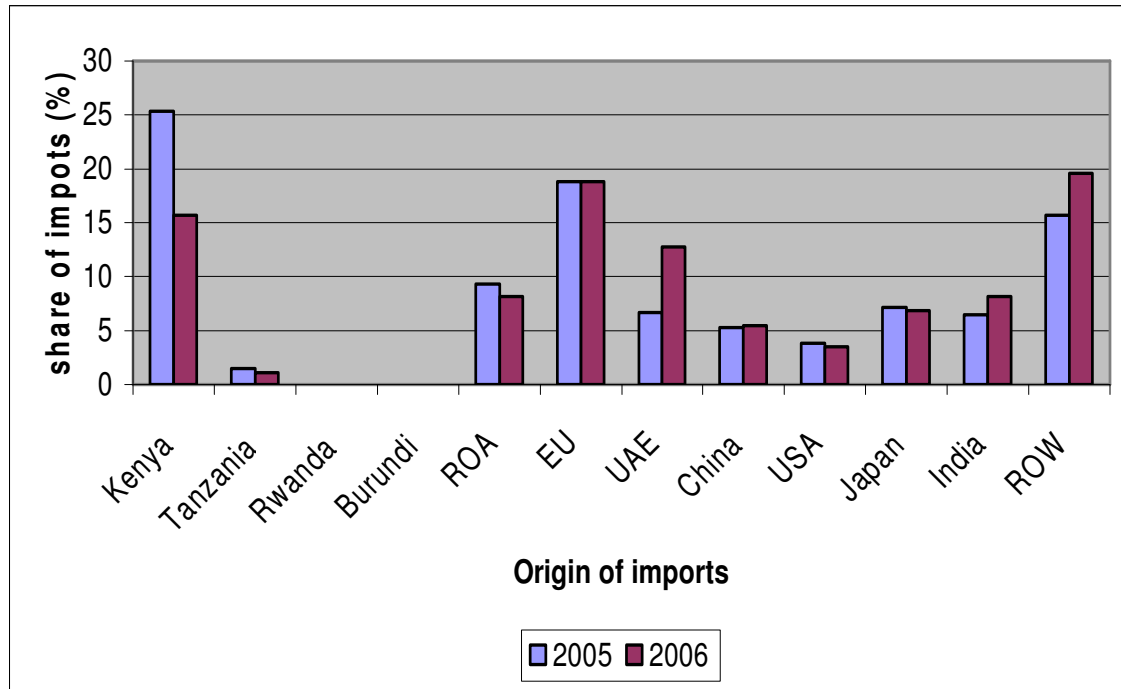

4.3.1 Imports

Uganda’s total Imports increased by 24.5 percent to US\$ 2,557.3 million in 2006 compared to the rise of 19.0 percent and 25.5 percent registered in 2005 and 2004 respectively. The rise in total imports was on account of the increased imports from COMESA, SADC and EU of 11.2 percent, 10.1 percent and 24.4 percent respectively. The increase was primarily on account of growth in private sector imports for capital and consumer goods. The petroleum products’ import bill increased on account of the increase in local demand for oil arising from hydro electricity power shortage and rising international oil prices.

Uganda’s imports from Rwanda and Burundi remained low at US\$ 0.5 million and US\$ 0.02 million in 2006, respectively.

Regarding trade with non-EAC countries, the bulk of Uganda’s imports originated from the EU, UAE and the Rest of Africa contributing 18.8 percent, 12.7 percent and 8.2 percent of total imports respectively in 2006. Imports from India, China and Japan collectively constituted 20.4 percent of the total import bill in 2006. Most of the imports were inputs into the productive processes in Uganda’s economy. Figure 4.12 below shows the origin of Uganda’s imports by percentage share.

Figure 4.12: Uganda’s Percentage Shares of Imports by Country/Region of Origin

Source: UBOS, BOU and URA

4.3.2 Exports

Uganda’s domestic exports amounted to US\$ 842.2 million in 2006, representing a 20.5 percent rise from US\$ 699.0 million realised in 2005. The growth in domestic exports in 2006 was in line with the general growth trend witnessed in earlier years of 22.8 percent and 21.9 percent in 2005 and 2004 respectively.

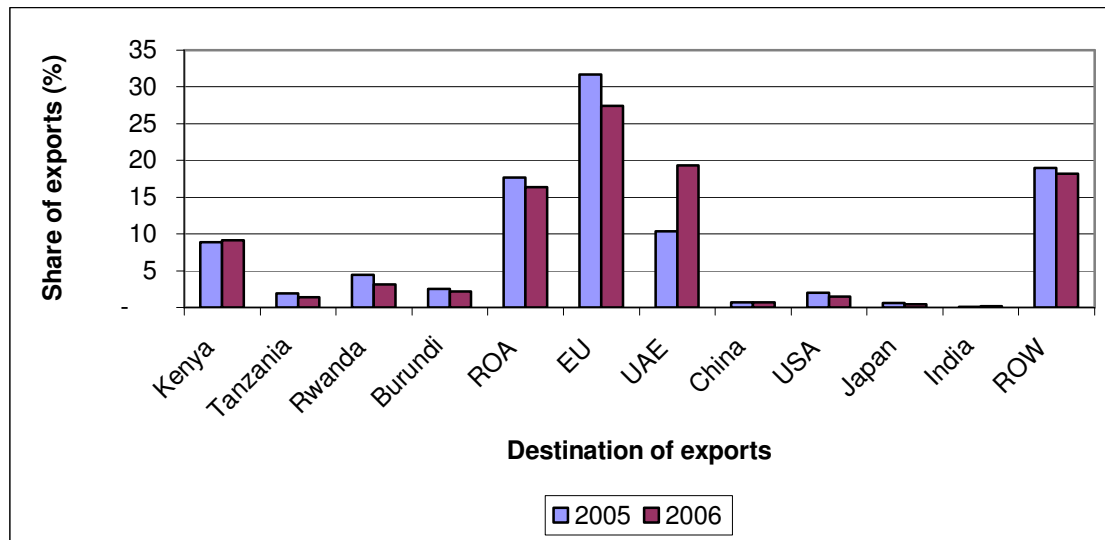

Uganda’s total exports outside the EAC partner states were destined to the EU, UAE, Rest of Africa and ROW with a share of 27.4 percent, 19.4 percent, 16.4 percent and 18.2 percent to total exports in 2006 respectively.

Exports to Rwanda and Burundi amounted to US\$ 30.5 million and US\$ 20.6 million in 2006, accounting for 3.2 percent and 2.1 percent of Uganda’s total exports respectively.

There was an increase in Uganda’s exports to COMESA, EU and UAE of 10.7 percent, 2.3 percent and 120.8 percent respectively in 2006. The increase in exports to COMESA could be attributed to improved peace and security in the region where exports to Sudan increased substantially from US\$ 50.5 million in 2005 to US\$ 91.7 million in 2006. Exports to India,

China and Japan collectively amounted to only 1.3 percent share of Uganda’s total exports in 2006. Improvements in international commodity prices as well as increased export volumes of some products explain the growth in exports. Figure 4.13 summarizes Uganda’s exports by country or region of destination

Figure 4.13: Uganda’s Percentage Shares of exports by Country/Region of Destination

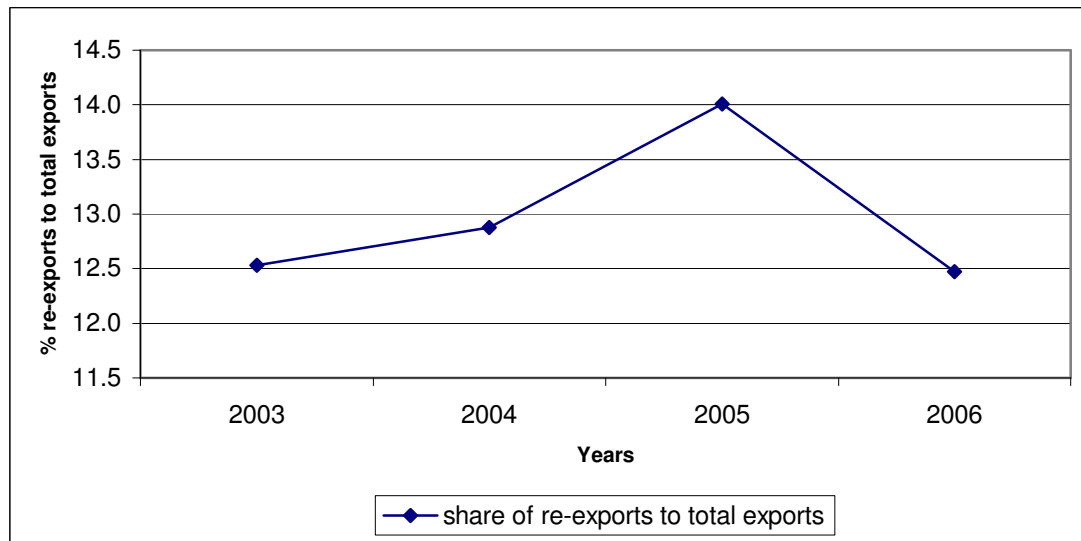

Source: UBOS, BOU and URA

4.3.3 Re-Exports

Uganda registered a modest increase of 5.4 percent in the value of re-exports in 2006 compared to 35.3 percent and 25.7 percent in 2005 and 2004, respectively. The levels of re-exports amounted to US\$ 120.0 million in 2006, accounting for 12.5 percent of Uganda’s total exports while domestic exports amounted to US\$ 842.2 million in 2006. Figure 4.14 shows the proportion of re-exports to total exports.

Figure 4.14: Uganda's Re-Exports as a Percentage of Total Exports

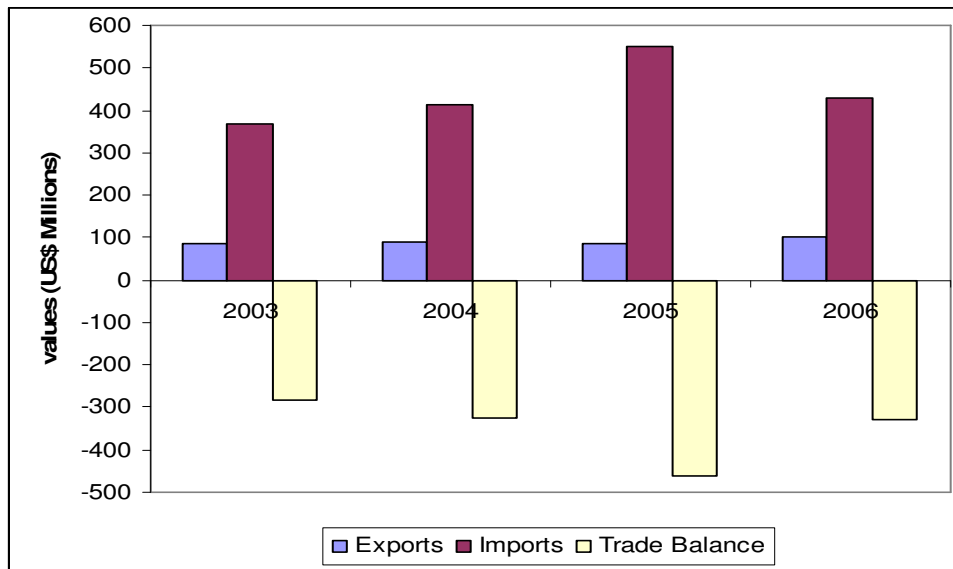

Source: UBOS, BOU and URA

4.3.4 Intra EAC Trade

Uganda's total trade with other EAC partner states declined by 16.8 percent in 2006 compared to the growth of 26.7 percent and 11.4 percent in 2005 and 2004 respectively. The decline in intra EAC trade in 2006 was on account of the decline of 22.0 percent in Uganda's imports originating from partner states that offset the increase of 15.8 percent in exports to partner states. Improvements in the declaration and recording of petroleum imports which were previously assumed to be originating from Kenya could explain the decline in imports from Kenya.

The trade balance with EAC partner states narrowed from a deficit of US\$ 462.9 million in 2005 to a deficit of US\$ 327.9 million in 2006. Figure 4.15 summarises the trend of Uganda's intra EAC exports, imports and trade balance.

Figure 4.15: Uganda's intra EAC Trade (US\$ Million)

Source: UBOS, BOU and URA

4.3.4.1 Imports

Intra-EAC imports declined by 22.0 percent to US\$ 429.7 million in 2006 from US\$ 550.8 million in 2005. The decrease in intra EAC imports is attributed to the rebound in industrial production in Uganda and increased importation from outside the Community. The imports originating from partner states represented a share of 16.8 percent of Uganda's total imports, of which 93.3 percent of the intra EAC imports originated from Kenya while only 9.7 percent originated from Tanzania.

The value of Uganda's twenty major imports from Kenya declined by 27.0 percent to US\$ 339.9 million in 2006. The main items obtained from Kenya were mineral fuels, oils and products, paper and its products, iron and steel, plastics and pharmaceutical products. The twenty major imports from Tanzania declined in value by 5.5 percent from US\$ 29.1 million in 2005 to US\$ 27.5 million in 2006. The top most imported items from Tanzania were iron and steel, animal fats and oils, sugars, electrical equipments and glass and glassware.

4.3.4.2 Exports

Domestic exports of Uganda to partner states rose by 24.1 percent to US\$ 96.5 million in 2006, a rebound from the 2.4 percent decline registered in 2005.

An increase of 15.8 percent was registered in Uganda’s total exports to the EAC partner states in 2006 compared to the decline of 1.3 percent that had been observed in 2005. The rise in exports to partner states was largely on account of the increase in exports to Kenya of 21.0 percent that surpassed the decline of 11.0 percent that was observed in exports to Tanzania in 2006. Exports of coffee and spices, cereals, tobacco, furniture and oil seeds and products increased by 47.8 percent, 46.1 percent, 63.0 percent, 65.7 percent and 59.5 percent to US\$ 52.4 million, US\$ 9.6 million, US\$ 3.0 million, US\$ 0.4 million and US\$ 1.3 million in 2006 respectively. The value of the top twenty exports to the EAC partner states increased by 31.8 percent to US\$ 89.0 million in 2006.

The value of Uganda’s twenty major exports to Tanzania rose by 7.5 percent to US\$ 12.3 million in 2006. The main commodities exported to Tanzania were mineral fuels, salt, cereals, iron and steels and animal fats and products amounting to US\$ 2.6 million, US\$ 2.1 million, US\$ 1.3 million, US\$ 1.3 million and US\$ 1.1 million.

4.3.4.3 Re-Exports

Uganda’s re-exports to EAC Partner states amounted to US\$ 5.3 million in 2006. a decline of 47.9 percent from US\$ 10.1 million realised in 2005. The decline in intra EAC re-exports was on account of the decline in re-exports to both Kenya and Tanzania of 47.5 percent and 49.2 percent respectively. The major re-exports to Kenya were nuclear reactors and boilers, vehicles and accessories, textile articles, electrical machinery and equipment and plastics and articles. The main re-exports to Tanzania were pharmaceutical products, nuclear reactors and boilers, vehicles and accessories and electrical machinery equipment.

Table 4.3: Uganda’s Intra-EAC Exports (US\$ million)

Intra-EAC flows	2003	2004	2005	2006
Domestic exports	77.13	79.65	77.77	96.48
Re-Exports	7.13	9.41	10.11	5.27
Total Exports	84.26	89.06	87.88	101.75
Share of re-exports in total exports	8.46	10.57	11.51	5.18

Source: UBOS, BOU and URA

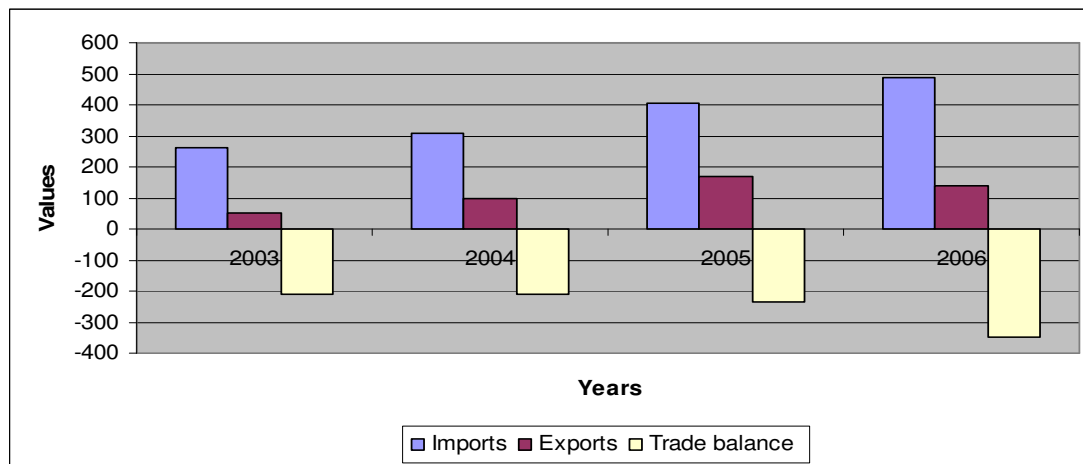

4.4 Rwanda’s International Trade

Rwanda’s total trade has been increasing over the years, especially in 2004 and 2005 with a growth of more than 30 percent. From US\$ 310.1 million in 2003, the total trade reached a level of US\$ 409.4 million in 2004 and US\$ 573.2 million in 2005. The level attained in

2005 was almost the same in 2006 with an increase of only 0.1 percent. The increase in total trade was mainly attributed to higher level of imports as exports remained lower throughout the review period. The low performance in exports was largely explained by low diversification, low volume and price volatility in the international market. Nevertheless, a lot of effort is being put in to increase the value of exports through quality improvements and identification of new export products.

In order to reduce the growth rate of imports, efforts are also being made by domestic production of products such as rice and sugar to substitute imports. However, level of consumption remains very high due to a population growth of around 3 percent per year. Figure 4.16 summarizes trade developments in Rwanda over the period 2003 to 2006.

Figure 4.16: Rwanda’s Total Trade (US\$ million)

Source: RRA

4.4.1 Imports

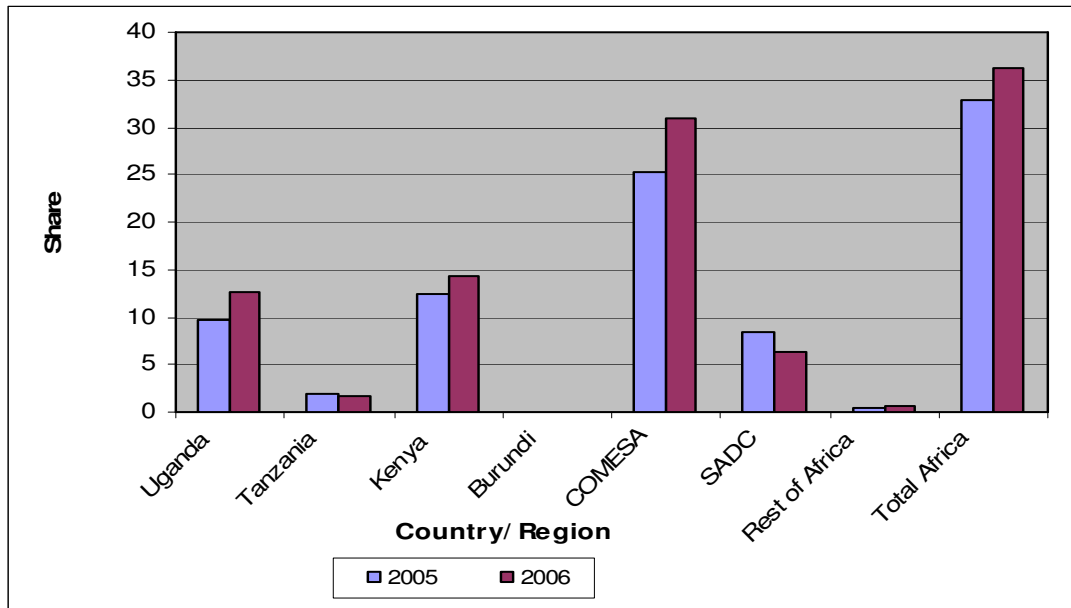

Rwanda’s imports have been increasing over the years. The total imports amounted to US\$ 404.4 million in 2005 and US\$ 488.6 million in 2006, representing an increase of 20.8 percent. During 2005-2006, on average 43.5 percent of Rwanda’s imports comprised of minerals, fuel oils, electric machinery equipments, vehicles and pharmaceutical products.

COMESA and European Union remained the main source of Rwanda’s imports. Imports from COMESA region mainly originated from Kenya and Uganda accounting for 66.8 percent and 74.2 percent in 2005 and 2006 respectively. Imports from African countries

increased from US\$ 133.7 million to US\$ 176 million accounting for 32.9 percent and 36.2 percent of total imports in 2005 and 2006 respectively.

Rwanda imported 26.9 percent and 23.3 percent of its total imports from European Union in 2005 and 2006; with a value of US\$ 108.7 million and US\$ 114.0 million respectively. Figure 4.17 summarizes the trend of Rwanda imports in 2005 and 2006.

Figure 4.17: Percentage Share of Rwanda’s Imports by Country/Region of Origin

Source: RRA

4.4.2 Exports

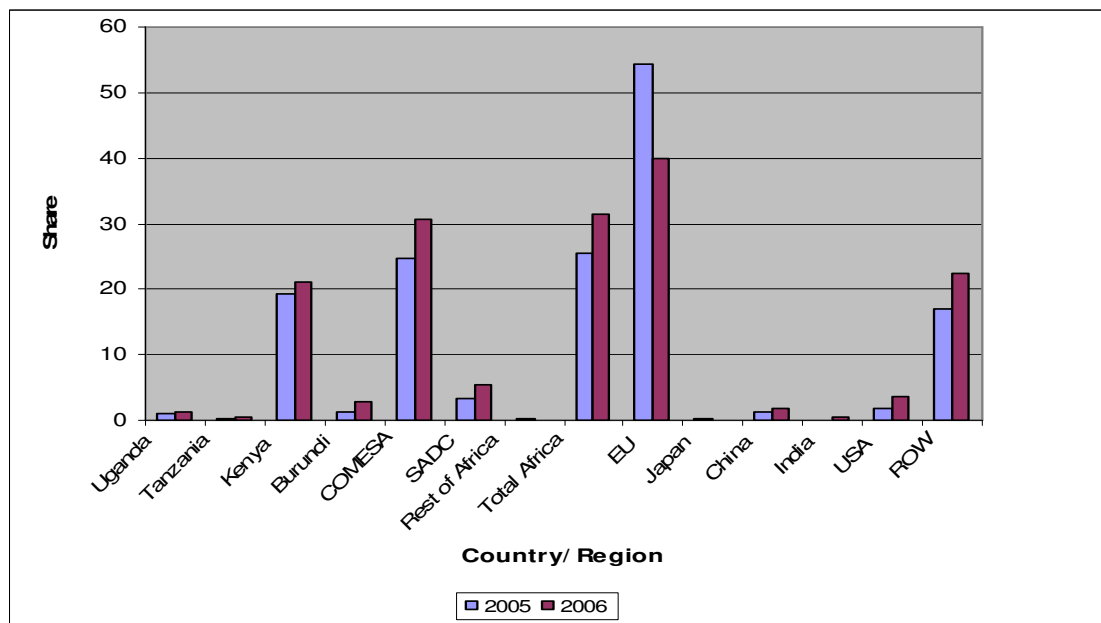

The total exports amounted to US\$ 168.8 million in 2005 and US\$ 140.9 million in 2006, representing a decrease of 16.5 percent. Due to sound policies on export promotion, Rwanda’s exports are becoming more diversified. Exports were mainly composed of coffee, tea and some minerals that cover 81.2 percent of the total exports.

The coffee sector is benefiting from the emphasis that is being put on improving the quality of coffee through the use of coffee stations and establishment of standards of exports so as to gain high prices on the international market. From the average price of 1\$/kg in 2003 and 2004, the price of coffee reached 2\$/kg in 2005 and 2006. Despite coffee and tea being the

main exports, their level of production is highly affected by weather changes and product cycles as many other agricultural products.

Rwanda’s exports were mainly destined to European Union followed by COMESA region. The sale of Rwanda’s coffee and tea on the Kenya auction market has exhibited Kenya as the main African destination of Rwanda exports. Figure 4.18 summarizes the trend of Rwanda exports in 2005 and 2006.

Figure 4.18: Percentage Share of Rwanda’s Exports by Country/Region of Destination

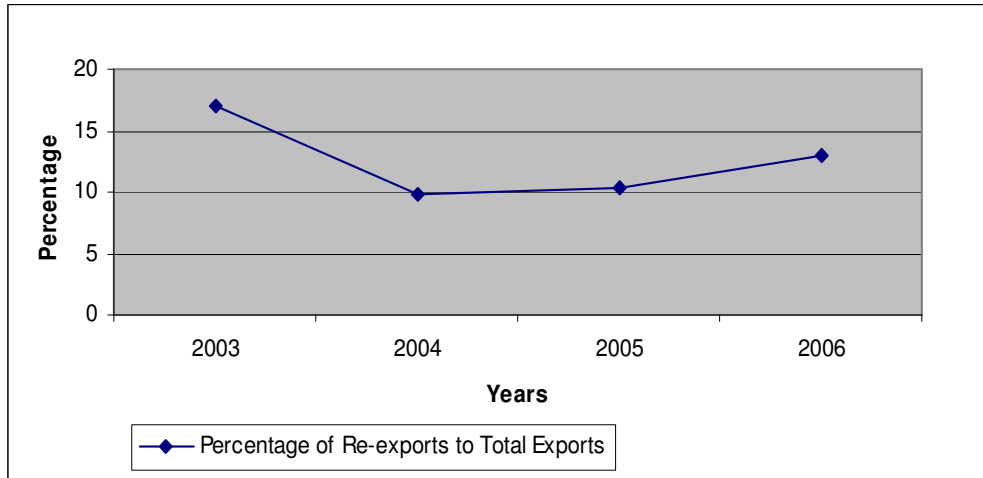

Source: RRA

4.4.3 Re-exports

Beside the domestic exports, Rwanda re-exported products such as minerals, fuel, medicaments, machines, vehicles and second hand clothes. The re-exports amounted to US\$ 17.6 million and US\$ 18.2 million in 2005 and 2006, respectively. The high level of re-exports in 2005 and 2006 was due to re-exports of machines used in road construction after the end of the work.

Figure 4.19: Percentage of Rwanda’s Re-Exports to Total Exports

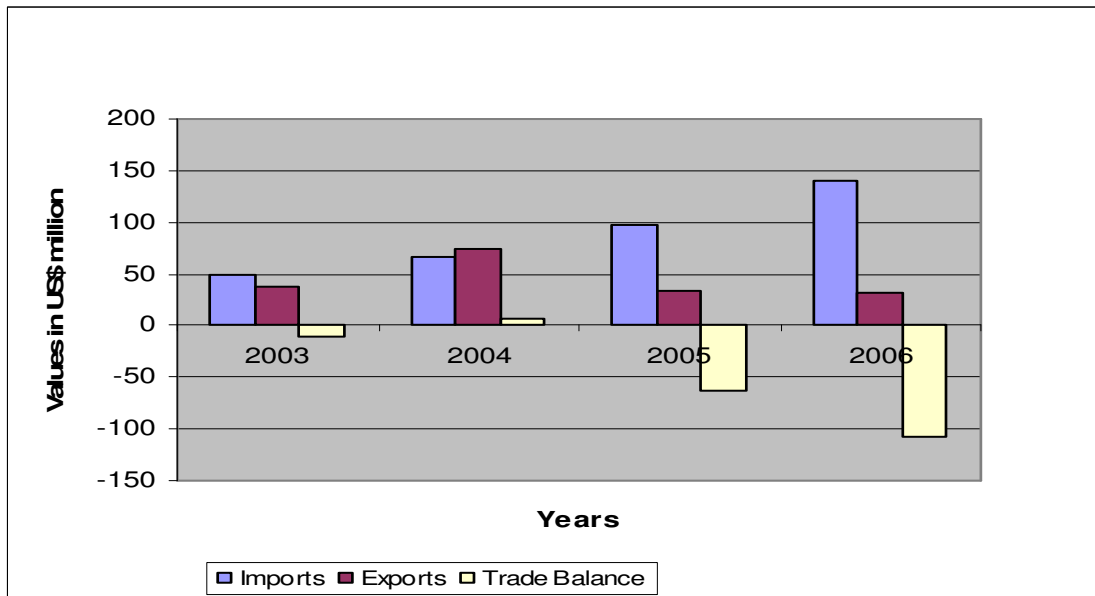

Source: RRA

4.4.4 Rwanda’s Trade with EAC Partner States

Between 2005 and 2006, Rwanda’s total trade with EAC grew from the total amount of US\$ 131.53 millions in 2005 to US\$ 172.02 millions in 2006. Kenya is the main country of destination for Rwanda’s coffee and tea in transit to Mombasa auction. Figure 4.20 summarizes Rwanda’s trade with EAC over the period 2003 to 2006.

Figure 4.20: Rwanda’s Trade with EAC 2003-2006 (US\$ million)

Source: RRA

4.4.4.1 Rwanda's Trade with Kenya

Kenya continued to be Rwanda's major trading partner within the EAC contributing 62.7 percent and 57.8 percent of total EAC trade in 2005 and 2006 respectively. Kenya's dominance was observed in imports as well as exports transactions with Rwanda. Nevertheless, the current figures included sales of coffee and tea on Kenya auction market. The bias is also reflected in the imports records of petroleum which are qualified as originating from Kenya while may not be the case.

4.4.4.1.1 Imports

Rwanda imports from Kenya averaged 50.6 percent of total EAC imports for the period 2005-2006. In 2005, the major imports from Kenya were palm oil and its fractions with a value of US\$ 6.6 million, accounting for 13.1 percent of total imports from Kenya during 2005. Some other products like salt and petroleum products were also imported having a value of around US\$ 4 million each.

In 2006, the highest import was that of petroleum oils amounting to US\$ 9.9 million, equivalent to 14.2 percent of Rwanda's imports from Kenya. In the case of petroleum products, there is a possibility of wrong declaration of the country of origin.

Other products like palm oil, sugar and salt were imported having an average value of US\$ 3.6 million each in 2006.

4.4.4.1.2 Exports

Rwanda exports to Kenya totalled US\$ 32.6 million in 2005 and US\$ 29.9 million in 2006. On account of the auction market effect, the values of tea and coffee reported as exported to Kenya were 72.3 percent and 84.5 percent in 2005 and 2006 of total exports to Kenya respectively. The two agricultural products and minerals constituted the majority of the country's exports.

4.4.4.1.3 Re-exports

The amount of Rwanda re-exports however remained very low. To Kenya in 2005 and 2006, the biggest amount of re-exports was that of petroleum products amounting to US\$ 2.26 million in 2005 and US\$ 0.42 million in 2006.

4.4.4.2 Rwanda's Trade with Tanzania

Rwanda's trade with Tanzania was the lowest out of the EAC countries and was almost 100 percent composed of imports. It contributed only 6.3 percent and 5.3 percent to the EAC total trade in 2005 and 2006 respectively.

4.4.4.2.1 Imports

The two major products were wheat or meslin flour with a value of US\$ 3.3 million and tubes, pipes and hollow profiles of iron or steel with a value of US\$ 1.1 million. These two products had a share of 53.7 percent of the Rwanda imports from Tanzania.

4.4.4.2.2 Exports

Rwanda's exports to Tanzania continued to be below US\$ 1 million. The total annual exports amount was US\$ 0.2 million and US\$ 0.9 million for 2005 and 2006 respectively.

4.4.4.2.3 Re-exports

Just like Rwanda's total trade with Tanzania, re-exports continued to be very low. The major re-export were vehicles accounting for 72.2 percent of the total re-exports of US\$ 0.2 in 2005 and 67.4 percent of US\$ 0.4 million in 2006.

4.4.4.3 Rwanda's trade with Uganda

Uganda continues to be the second highest EAC trade partner with Rwanda, accounting for 31.0 percent in 2005 and 36.9 percent in 2006 of total trade with EAC countries. It was dominated by imports such as food products and building materials.

4.4.4.3.1 Imports

Rwanda's trade with Uganda was dominated by imports of manufactured products such as cement, oil, wheat and rolled iron or steel. Out of a total trade of US\$ 40.8 million in 2005 and US\$ 63.5 million in 2006, imports were US\$ 39.1 million and US\$ 61.6 million respectively.

4.4.4.3.2 Exports

Compared to imports, the level of Rwanda exports to Uganda continued to be very low accounting for less than 0.1 percent of total trade in 2005 and 2006.

4.4.4.3.3 Re-exports

Just like the case was for the exports, the re-exports values were extremely low. The total re-exports value was less than 1.2 million US\$ in 2005 and 0.6 million US\$ in 2006.

4.5 Burundi's International Trade

Burundi's total Trade increased by 67.8 percent, from US\$ 324.2 million in 2005 to 544.1 in 2006. In 2004 and 2005, the growth in the volume of trade averaged 44.9 percent with US\$ 324.2 million in 2005 compared to the value of US\$ 223.7 million in 2004.

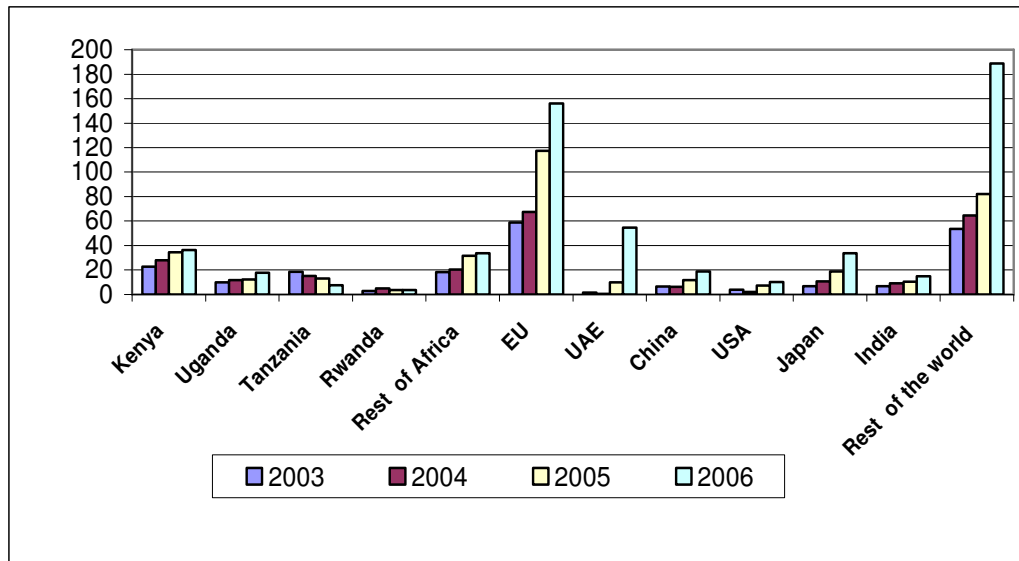

The rate of growth of total trade accelerated between 2005 and 2006, which was attributed to a higher increase in exports and imports which grew by 97.2 and 61.6 percent respectively.

4.5.1 Imports

Over the last two years, total imports grew by an average of 61.6 percent to US\$ 432.0 million in 2006 from US\$ 267.3 million in 2005. The major imported goods includes; articles of iron or steel articles of iron or steel, glass and glassware, mineral fuels, oils & product of their distillation; rubber and articles thereof, plastics and articles thereof.

4.5.2 Domestic Exports

Burundi's exports amounted to US\$ 112.1 million in 2006 representing a increase of 97.2 percent compared to US\$ 56.9 million registered in 2005 largely due to 128.7 percent increase in exports to Kenya and 195.7 percent increase to the rest of the world.

4.5.3 Re-Exports

In 2006 Burundi re-exported about US\$ 0.7 million in value of goods. The items re-exported include among others; zinc and articles thereof, miscellaneous manufactured articles, iron and steel, electrical equipment parts thereof; sound recorder, other made up textile articles, sets; worn clothing etc. furniture; bedding, mattress, matt support, cushion etc.

CHAPTER 5: SPECIAL CATEGORY CONSIDERATIONS WITHIN EAC CUSTOMS UNION

5.1 Exemptions and Remissions

The Customs management Act of 2005 provides guidance on the modalities of handling of remission and exemption of import duty. There was a general agreement that in the long run, countries should work towards reduction of exemptions and remissions.

Kenya

The value of goods that qualified for exemptions and remissions increased by 71.2 percent to US\$ 1,370.8 million in 2006 from US\$ 800.9 million and 588.9 million in 2005 and 2004, respectively. The revenue foregone also rose to US\$ 289.5 million up from US\$ 201.4 million in 2005, an increase of 14.3 percent.

Table 5.1: Total Exemptions and Remissions granted by EAC partner states for 2006 compared to 2005, US\$ Millions

Partner states	Heading	2004	2005	2006	Annual %age change
Uganda					
	Value of Exemptions	109.76	178.8	173.99	-2.69%
	Revenue Foregone	27.24	33.08	36.36	9.92%

	%age Foregone	12.24%	11.63%	14.20%	

Source: Partner States Revenue Authorities

Note:

1. Percentage of Tax foregone is calculated from Tax exempted over Gross Tax collection. Gross Tax collection = actual collection + Tax exemptions
2. Monthly revenue collections and tax exemptions are aggregated into calendar year
3. Annual average exchange rate have been applied to convert into US\$

Tanzania

In 2006, Tanzania's value of imports eligible for exemptions increased to US\$ 1,225.9 million compared to US\$ 901.6 recorded in the previous year. Likewise, the revenue foregone increased to US\$ 405.4 million in 2006, representing an increase of 36.0 percent when compared to the amount that was granted in the previous year. The amount of exemptions covers all duties and taxes charged on imported goods which include VAT and excise duties. The amount of exemption granted in 2006 represented an equivalent of 33.0 percent of tax foregone by the Government. Notable beneficiaries of exemptions include parastatal organizations, religious bodies, non-government organizations, local and foreign investment projects. Exemptions on investment related imports accounted for about 60 percent of total exemptions granted during the year 2006.

Uganda

As regards Uganda, the value of products subject to exemptions from tariffs declined by 2.7 percent to US\$ 174.0 million in 2006. Revenue foregone however rose by 9.9 percent to US\$ 36.4 percent from US\$ 33.1 million in 2005 and US\$ 27.2 million in 2004. The revenue foregone represented a 5.1 percent share of total revenue collections down from 5.3 percent in 2005. The decline in percentage of the revenue foregone was on account of the increased collections in other non-customs related taxes arising from improved operational efficiency and tax public education and awareness initiatives of the Uganda revenue authority.

5.2 Sensitive Goods

EAC region agreed on a list of commodities that requires extra protection from importation outside the region. The measure was agreed upon with objective of protecting local production under assumption that the region had adequate capacity to meet the demand for the selected commodities. Among the most protected products that were identified included sugar, milk, wheat flour, maize, rice, palm oil and worn clothing.

Kenya

Imports of sensitive goods from EAC declined by 54.1 percent to US\$ 1.8 million in 2006 following decreased imports of maize (corn), rice, cereal floors (excluding wheat or meslin) and beer made from malt. However, imports of sensitive goods from non-EAC countries

increased by 22.2 percent to US\$ 316.1 million. This follows increase imports of wheat and meslin, rice, sugar and sucrose, worn clothing and maize corn.

Tanzania

The country's imports of sensitive good from non EAC partner states has remained higher recording an increase of 62.9 percent to US\$ 240.1 million in 2006 compared to the amount that was imported during the corresponding period in the previous year. Wheat, maize, sugar and worn clothing and other worn articles were the major items accounting for about 84 percent of sensitive goods that was imported in the review year. Maize imports recorded significant increase to US\$ 48.9 million from US\$ 2.8 million following cereal deficits in the country amid drought weather that affected domestic production in 2005.

Likewise, there was an increase in imports of sensitive goods originating from other EAC partners states. During the review year, the imports of sensitive goods increased to US\$ 4.7 million compared to US\$ 2.7 million in the previous year. Maize was the major item attributing about 48 percent of intra EAC sensitive goods trade in 2006. It is worthy noting that the EAC partner states are far from meeting the demand of items under the category of the sensitive goods in the region especially that of wheat which accounted for over 40 percent of total sensitive good imports.

Uganda

Uganda registered a decline of 4.6 percent from US\$ 49.3 million in the value of imported sensitive products originating from EAC partner states in 2006. However imports of these sensitive products from outside the EAC registered an increase of 19.9 percent to US\$ 232.7 million in 2006. The increased imports from outside the EAC demands that the partner states need to address more critically the impediments to increased production and productivity of the local industries. Uganda sourced 66.7 percent of sensitive products from within the EAC while 33.3 percent were sourced from the rest of the world in the year under review.

5.3 Excisable Products

In principal excise duty is charged on commodities that are considered hazardous for either human beings or the environment, although in some cases it has been charged for purposes of revenue collection. Within EAC, the duty has been applied for both revenue and protection against dangerous products.

Kenya

The value of imported excisable products rose by 36.8 percent from US\$ 836.0 million in 2005 to US\$ 1,143.71 million in 2006. This was mainly attributed to increased imports of mineral fuels, mineral oils and products thereof, vehicles and beverages, spirits and vinegar.

Tanzania

The value of Tanzania's excisable goods increased to US\$ 816.9 million in 2006 compared to US\$ 671.1 million recorded in 2005. Much of the excisable goods were attributed to the imports of petroleum products and vehicles. The increase in value of petroleum products is largely associated with the surge in oil prices in the world market. In 2006, the petroleum products accounted for 90 percent of all imported excisable goods.

Uganda

Uganda registered a 93.6 percent decline in the value of excisable products in 2006 largely on account of marked reduction in the excise duty values associated with petroleum products. The main exercisable products during 2006 were sugars and sugar confectionary, beverages, spirits and vinegar and tobacco and manufactured tobacco products.

5.4 Tariff Reduction Schedule

Under the Customs Union agreement, Kenya was to immediately eliminate all tariffs on goods originating from partner states. For Uganda and Tanzania, they were to also eliminate tariffs on goods falling with Category A immediately and gradually phase out tariffs on goods falling within Category B.

Tanzania

Tanzania continued to implement the EAC Customs Protocol on tariff reduction for category B goods originating from Kenya. During the second year of the EAC Customs Protocol, the tariff for category B imports declined to 4 percent and 20 percent from 5 percent and 25 percent in 2006 and 2005, respectively. Consequently, the volumes of trade for the affected goods recorded a significant increase to US\$ 95.1 million compared to US\$ 47.7 million in 2005. Some of the items that have recorded a significant increase during the review period

are ceramic products and medicaments that accounted for over 60 percent of the category B items imported from Kenya.

Uganda

An evaluation of the second year of performance of the EAC Customs Union Protocol indicates that Uganda's total volume of imports subjected to an 8 percent tariff as approved by the Uganda budget for the fiscal year 2006/07 were valued at US\$ 36 million.

5.5 Tariff Bands

Kenya

Kenya fully implemented the agreed three tariff band structure in 2006 (with the exception of sensitive products). Under the zero tariffs Kenya imported goods worth US\$ 4,602.2 million in 2006 up from US\$ 3,871.1 million in 2005, an increase of 18.9 percent. The zero tariff imports accounted for 63.6 percent of the total imports in 2006.

Table 5.2: Tariff band status, 2006 compared to 2005 (in US dollar million)

Tariff band status	2005	2006	% change	Share (%)

Source: KRA

Tanzania

Tanzania is implementing the EAC Common External Tariff (CET) with three import tariff band structure of 25%, 10% and 0%. During 2006, the total imports under CET increased to US\$ 4.160.6 million from US\$ 2.802.3 million recorded in 2005, accounting for about 96 percent of total imports. The remaining 4 percent of total imports represents imports that are administered by non EAC CET which is basically SADC tariff bands (excluding those accommodated in EAC CET). About 57.3 percent of EAC CET imports were under the tariff band of 0% and these were mostly industrial raw materials and capital goods. The surge of imports of such goods is partly in line with the on going macroeconomic reforms which have continued to attract huge investment in the areas of manufacturing, mining, communication, tourism and transportation. In addition, this is in conformity with the one of the objectives of

the establishment of EAC which is to encourage investments and industrial activities in the Community.

Table: 5.3 Tanzania's Tariff Bands Status. 2005 – 2006 (US\$ million)

TARIFF BAND	CIF VALUE_2005	CIF VALUE_2006	% CHANGE	SHARE (%)

Source: Tanzania Revenue Authority

Uganda

During 2006, Uganda continued to implement the three tier external tariff band (0%, 10% and 25%) as per the arrangement under the Customs Union of the East African Community. The value of goods imported under the 0% band accounted for 67.9 percent and increased by 24.9 percent compared to import values of 2005. The top three imports in the 0% band were Medicaments, Radio/TV transmission apparatus and palm olein and these were mainly imported from India South Africa, United States, United Kingdom, Japan, Netherlands, Germany and Malaysia. The Import value of the 10% band decreased by 1.7 percent and its contribution to total import value was 9.8 percent. The top three imports in the 10% band were new pneumatic tyres for buses and lorries, vehicle parts and rolled iron & steel and were mainly imported from India, South Africa and China, The 25% tariff band accounted for 19.3 percent of the total import value and increased by 5.0 percent in 2006. The top three imports in the 25% band were vehicles of cylinder capacity exceeding 2250cc but below 3000cc. Import value of sensitive products from non EAC countries increased by 96.5 percent. The top three imported items under sensitive schedule were worn clothing, Primary cells and Rice.

Kenya

The total customs revenue collected on international trade increased by 14.3 percent from US\$ 1,529.7 million in 2005 to US\$ 1,749.0 million in 2006 but this was below the target of US\$ 1,797.6 million. This represent a performance rate of 97.3 percent up from 95.5 percent realized in the previous year. Increased revenue collection during the year 2006 is attributed

to improved tax collection administration measures undertaken by the Kenya Revenue Authority.

Revenue collection from various customs tax heads recorded improved performance in 2006 except the excise duty. Revenue collection on import duty rose by 19.6 percent from US\$ 286.4 million in 2005 to US\$ 342.6 million in 2006. The revenue collection on VAT imports, import declaration fees and agency revenue rose by 26.6 percent, 25.5 percent and 47.1 percent respectively while revenue on excise duty declined by 11.7 percent. The revenue realised on VAT imports, import declaration fees and agency revenues were above the target while the revenue realised on import duty and excise duty were below the target. VAT on imports remains the dominant tax head.

The contribution of the custom revenue in total revenue declined marginally from 41.0 percent in 2005 to 39.1 percent in 2006.

Tanzania

There has been improvement in customs revenue collection in Tanzania, surpassing the targeted revenue collection by 2.9 percent to a total of US\$ 822.1 million compared to a target of US\$ 798.9 million. The development is largely attributed to enhanced tax administrative measures coupled with a substantial increase in imports. Much of the revenue was collected through VAT, about 48.3 percent of total customs revenue followed by import and excise duties. The customs as a percentage of total revenue by the Tanzania Revenue Authority remained unchanged at about 45 percent, leaving no significant adverse effect on revenue collection following the country's implementation of the EAC Customs Union since January 2005.

Uganda

Uganda registered an increase of 16.3 percent in total customs revenue between 2005 and 2006. Improvements of 9.5 percent, 13.2 percent, 23.9 percent and 16.7 percent were observed in Import tax, VAT, Excise duty and other customs related duties respectively. The improvement arose from the increased real economic activity that was evident in the real economic growth patterns between 2005 and 2006 as well as from the enhanced administrative efficiencies in Uganda Revenue Authority. Collections on all the customs revenue categories surpassed their targets in 2006.

Rwanda

In 2006, total customs revenue amounted to US\$ 145.6 million which was 9.7 percent above the target and 1.3 percent above the realized level in 2005. In 2005, the targeted amount of US\$ 122.9 million was exceeded by 17.0 percent. This was among other reasons caused by the importation of vehicles for government officials who were previously using government vehicles.

Customs revenue was composed of VAT, import duty, excise duty, withholding tax and other taxes which respectively contributed 39.3 percent, 28.9 percent, 9.7 percent, 3.6 percent and 18.6 percent in 2006; and 34.4 percent, 26.9 percent, 10.4 percent, 3.6 percent and 24.6 percent in 2005, representing an almost identical composition over the two years. Comparing 2004, 2005 and 2006 customs revenue collections, VAT and import duty increased by 15.6 percent and 8.6 percent respectively between 2005 and 2006 while the increase was 30.8 percent and 15.6 percent for the same tax types over 2004 and 2006.

However, the proportion of customs revenue to total tax revenue was on a downward trend over the years 2003 to 2006. The decline was on account of a large portion of the imports that benefit the 0 percent rate of import duty tariff most of which originate from COMESA region and others are capital goods in nature. The domestic taxes which include direct taxes and taxes on goods and services were increasing as a proportion of tax revenue; the major ones being domestic VAT, PAYE and other income taxes.

Burundi

In 2005, Burundi's total customs revenue amounted to US\$ 87.6 million in 2005 while in 2006, total customs collected was US\$ 96.5 million.

In 2006, much of the revenue was collected through Import duty and VAT with an increase of 42.1 percent and 53.0 percent respectively while in 2005 excise duty and VAT were the equally important source of such revenue with US\$ 23.6 million and US\$ 22.4 million respectively.

Compared to the total tax revenue, the customs revenue represented 55.0 percent in 2005 and 55.5 percent in 2006.

CHAPTER 7: INVESTMENT FLOWS IN THE COMMUNITY

7.1 Policy Framework

The EAC partner states including Rwanda have national statutory agencies that promote and facilitate investment in their respective countries. The agencies are the Kenya Investment Authority (KenInvest), Tanzania Investment Centre (TIC), Zanzibar Investment Promotion Authority, Uganda Investment Authority and Rwanda Investment and Export Promotion Agency (RIEPA). These Investment Promotion Agencies (IPAs) were established by respective Acts of Parliament in each Partner State and follow similar basic requirements for approval of investments. These comprise of filling in an application form attaching; a business proposal, Certificate of Incorporation and Memorandum and Articles of Association. Furthermore, all proposed investment projects have to comply with the necessary conditions concerned with the environment, health and security matters as provided for by each Partner State.

The harmonisation of investment policies, incentives and laws of the Partner States has been going on for some time under the auspices of the EAC Secretariat. However, although many aspects of these matters have been harmonised such as the investment approval requirements, export processing zones and free zones regulations, corporation tax and some other incentives, there still exist some variations for example, on the minimum capital threshold requirement among the Partner States. In Kenya, the minimum threshold is US\$ 100,000 for foreign investors and US\$ 15,000 for domestic investors. In Tanzania, the minimum threshold is US\$ 300,000 for foreign investors and US\$ 100,000 for domestic investors while in Uganda; the minimum threshold is US\$ 100,000 for foreign investors and US\$ 50,000 for domestic investors. On the other hand, Zanzibar maintains a different approach that focuses on sectoral thresholds for investment capital per project for example; investment in hotels requires a minimum capital of US\$ 4 million for foreign investors and US\$ 300,000 for local investors. In Rwanda, the minimum threshold is US\$ 250, 000 for foreign investors and US\$ 100, 000 for domestic investors. These and other variations should be identified and further harmonised to bring about a more favourable investment climate in the EAC region.

7.2 Inward Investment Flows

Investments flows are shown in Table 7.1. The data on inward investment from within and outside the EAC region shows that from 2005 to 2006, the total investment flows among Partner States increased in terms of the number of projects and value of planned investment. The total approved projects during the period rose from 699 to 1,239 representing an increase of 77.3 percent while the value of planned investments increased from US\$ 1,998 million to US\$ 8,925 reflecting an increase of 348.9 percent.

The cross-border investment within the EAC region is represented by the number of projects from the Partner States that are approved by each Partner State. In Kenya, the total number of approved projects from Partner States decreased from 3 to 2. In Tanzania, the total number of projects moved up from 36 to 38 while for Uganda increased from 24 to 35. Concerning Rwanda, the total number of approved projects from EAC member states increased from 1 in 2004 to 2 and 4 in 2005 and 2006, respectively.

The overall number of projects attracted by each Partner State was significant. In Kenya, the number of projects decreased from 107 to 96 while in Tanzania increased from 299 to 715. In Uganda, the number of projects increased from 293 to 428. In Rwanda, the overall number of planned projects attracted by the country was 10 in 2004, 9 in 2005 and 13 in 2006.

7.2.1 Value of Planned Investment

The approved projects are required to indicate the level of investment in terms of value they intend to commit to the projects. In Kenya, the value of investment decreased from US\$ 62 million to US\$ 29 million. In Tanzania, the total value of planned investments rose from US\$ 32 million to US\$ 566 million while Uganda registered an increase from US\$5 million to \$150 million in 2006.

The value of planned investment from the rest of the world also showed positive increase from US\$ 1,842 million to US\$ 8,179 million. In Kenya, the value of planned investment for the rest of the world increased from US \$77 million to US \$1210.8 million while in Tanzania the value of planned investment for the rest of the world increased from US \$885 million to US \$ 5,419 million. In Uganda, the value of planned investment for the rest of the world increased from US \$880 million to US \$1,550 million.

In Rwanda, total value of planned investments with EAC partner states greatly increased from US\$ 1.2 million in 2005 to US\$ 14.7 million in 2006.

The value of planned investments from the rest of the world was US\$ 10.5 million in 2004. US\$ 91.0 million in 2005 and US\$ 26.7 million in 2006.

The overall investments in the country totalled US\$ 10.5 million in 2004. US\$ 92.2 million in 2005 and US\$ 41.5 million in 2006

7.3 Sectoral Investment Focus

Although the region has abundant investment opportunities, the investments attracted by the Partner States are concentrated on a few sectors. In Kenya, for example, the investments are mainly in manufacturing and trade sectors. In Tanzania, they are dominantly in manufacturing, tourism and transport sectors while in Uganda the investments are in the manufacturing, agriculture and tourism sectors.

The good outturn in performance was mainly as a result of the improved investment climate in the EAC region including macro-economic policies, political stability in the Great Lakes Region, improved infrastructure, reduction in bureaucracy, the implementation of the customs union and joint outward investment promotion missions by the investment promotion agencies (IPAs).

For the case of Rwanda, even if the level of effective investment remains low, FDI are diversified in many sectors such as manufacturing, information communication technology (ICT), hotels, mining, construction, financial and banking and tourism.
