## **CHAPTER 1: THE EAST AFRICAN COMMUNITY INTEGRATION PROCESS**

### **1.1 Introduction**

The main goal for the East African Community, as an economic and political entity, stems from the desire by the EAC Partner States to improve the standard of living of the population through increased competitiveness, value-added production, trade and investment.

The first East African Co-operation Development Strategy (1997-2000) focused on the development of the policy framework for regional co-operation. This culminated in the signing of the Treaty for the Establishment of the East African Community. The Second East African Community Development Strategy (2001-2005) focused on the implementation of selected regional projects and programmes; institutional development; and, most significantly, the launching in 2005 of the East African Community Customs Union.

The Third East African Community Development Strategy (2006-2010) focuses on the consolidation of the Customs Union which was boosted by the enlargement of the Community with the admission of Republics of Rwanda and Burundi in June 2007.

In the period under review, the Partner States continued to reap benefits of the positive impact of the Customs Union. The region registered increased intra-EAC trade. All the EAC countries also reported increased revenues as well as increased direct foreign investments (DFIs).

### **1.2 Purpose of the Report**

The purpose of this report is to provide a continuous assessment of trade developments in the EAC since the Customs Union Protocol came into effect on 1<sup>st</sup> January 2005.

The 2007 report builds on the 2006 report that provided an analysis of trade amongst Kenya, Uganda and Tanzania, and to some extent Burundi and Rwanda and the rest of the world. A deeper analysis has now been undertaken although Rwanda and Burundi will commence application of the main EAC Customs Union instruments in July 2009.

The report is structured in 8 chapters starting with an introduction in Chapter one followed by macroeconomic developments at international and regional level. Chapter 2 and Chapter 3 discuss the trade developments among the EAC Partner States and other regions. Chapter 4 and 5 deals with trade developments of the respective EAC Partner States and special category consideration within EAC Customs Union respectively.

Chapter 6 is a review of customs revenue performance in the Partner States. Chapter 7 reviews the performance of investment flows in the region in relation to the rest of the world. **Chapter 8 provides the conclusion and way forward.**

### **1.3 Progress of the EAC Integration**

The Treaty on the Establishment of the East African Community envisages integration among the countries of East Africa to progress from a Customs Union to a Common Market, then a Monetary Union and ultimately to a Political Federation (Article 5(2)).

The East African Customs Union Protocol was signed in March 2004 and came into effect in January 2005. The main elements of the Protocol are: removal of internal tariffs and all non-tariff barriers on intra-EAC trade; introduction of common external tariffs (CET); and, agreement on a list of products classified as sensitive and therefore requiring additional protection.

However, non-tariff barriers to trade remain a major challenge. National Committees have been established through a directive of the Council Ministers and have been inaugurated in all the Partner States to monitor the removal of NTBs. The implementation

of CET is going well. The initial fear of revenue losses from the implementation of the Customs Union failed to materialize as revenues have increased in all the countries. The problem of country specific exemptions that dogged the Community for a while were eventually dealt with by Council through duty remissions.

In accordance with Article 5 of the Treaty, the Council in April 2006 directed the Secretariat to initiate, conclude negotiations and commence implementation of the Common Market by 2010 when the Customs Union is fully operational.

The main elements of Common Market are the “four freedoms” involving free movement of goods, labour, services and capital. The freedoms to be granted to East Africans under the Protocol comprise the right to freely leave, or enter and reside in a Partner State for the purpose of work, or establishment, or provision of services.

In November 2007, the Partner States signed an interim EAC/EU Economic Partnership Agreement (EPA) which replaces the non-reciprocal Cotonou Agreement and provided the legal framework for the trade between the EU and the EAC pending the conclusion of EAC EU EPA by July 2009.

## **CHAPTER 2: OVERVIEW OF MACROECONOMIC DEVELOPMENTS**

### **2.1 Recent Economic Developments on the World Scene and the EAC**

This section provides an overview of the global Macro economic and trade developments and the EAC macro-economic environment.

#### **2.1.1 Global Macro- Economic Environment and Trade developments**

##### **2.1.1.1 Macro Economic Environment**

Overall, global gross domestic product (GDP) is estimated to have increased almost at the same pace of 4.9 percent per annum in 2007 as in the previous year. Table 1 below shows the performance of the global economy. This growth is attributed mainly to the newly industrialized Asian economies that had an average growth rate of 5.6 percent per annum in 2007, as well as emerging economies and developing countries, including Africa, which grew at an average rate of 7.9 percent per annum in the same period. Africa is the only region, which recorded an increase in the growth rate in 2007, at 6.2 percent per annum compared to 2006 when the region grew at 5.9 percent per annum. Among Asian countries, China and India continued to experience robust growth trends, registering growth rates of 11.4 percent and 9.2 percent per annum respectively in 2007. Growth in those two countries continued to be driven by productivity gains; favourable terms of trade and strong policy frameworks.

During 2007, Sub-Saharan Africa experienced one of its highest growth rates in decades as real GDP expanded by about 6.5 percent p.a. This was mainly fuelled by growing production in oil exports and rising domestic investment and productivity across the region. Growth in non-oil exporting countries has also been high, on account of increasing productivity and strong macroeconomic policies.

Inflation during this period registered mixed performance across countries and regions. In the advanced economies, a rate of 2.3 percent was recorded in 2007 compared to 2.2 percent in 2006. Inflation was contained in the advanced economies while it rose in many emerging markets and developing countries. The length of the global upswing and the strength of economic activity outside the industrial regions contributed to a further rise in the price of fuels and pushed domestic inflation rates. At the end of 2007, consumer prices in developed and developing economies were increasing faster than at the beginning of the year by about 1 and 2 percentage points respectively.

Significant variations occurred among major currencies. While European currencies appreciated vis-à-vis the US dollar, changes in the currencies of Asian economies with large current account surpluses had mixed impact. The decline of the US dollar in relation to the Euro and other European currencies inflated the dollar values of international trade transactions.

Despite the adverse effects of scarce credit on the volume of mergers and acquisitions, global foreign direct investment (FDI) flows continued to rise. The UN conference in Trade and Development (UNCTAD) estimated that global FDI flows rose by 18 percent to \$1.54 trillion in 2007.

### **2.1.1.2 Trade developments**

World trade growth declined to 5.5 percent in 2007 from 8.5 percent in 2006. This decline was mainly attributed to financial market turbulence in major developed markets and significant price surges as well as weaker demand in the developed economies, a factor that provided a less favourable framework for the expansion of international trade in 2007 than in preceding years. In 2007, the variation in real trade growth among regions remained large, reflecting market differences in economic activity and relative price developments.

Lower import growth was observed in North America, Europe, Japan and the net oil importing developing countries in Asia. This downtrend outweighed the higher import growth observed in Central and South America, the Common Wealth of Independent States (CIS), Africa and Middle east. South and Central America and the Common wealth of Independent States increased their real merchandise imports by about 20 percent, more than three times the global average in 2007. South and Central American exports were up by 5 percent and those of the CIS by 6 percent. As mining products account for more than half of African and Middle East merchandise exports, these regions have been major beneficiaries of relative price changes over the last three years. Consequently, these regions increased their import volume by about 12 percent while their exports almost stagnated in real terms.

Developing economies and the Common Wealth of Independent States (CIS) region maintained or strengthened their expansion of output, contributing more than 40percent of world output growth in 2007. Developing countries' share of world merchandise trade (exports plus imports) reached a new record level of 34 percent in 2007.

Exports from Asia rose by 11.5 percent in real terms, again exceeding significantly the region's import growth. Among the leading traders, China's real merchandise trade expansion remained outstanding in 2007 as lower export growth to the US and Japanese

markets was largely offset by higher growth export to Europe and a boom in shipments to the net oil exporting regions. China and India recorded double digit import growth.

The sharp rise of commodity prices – particularly fuels and metals greatly improved the financial situation of most developing regions and boosted imports. The dollar value of world merchandise exports rose by 15 percent to US\$13.6 trillion and that of commercial services by 18 percent to US\$3.3 trillion in 2007. In real terms, with adjustment for price and exchange rate changes – real merchandise exports rose by 5.5 percent in 2007 compared to 8.5 percent in 2006.

## 2.1.2 EAC Macro Economic Environment

Below is a brief review of the macroeconomic performance of the region.

### I. Economic Growth

The region continued on a steady path of growth. Uganda recorded a growth rate of 9 percent in 2007 against a growth rate of 7 percent in 2006. This growth shows that the economy has shown resilience against increases in the international oil prices and various other internal challenges such as weather changes. Kenya sustained its growth momentum that began in 2003 to register a GDP growth estimated to have expanded by 7.0 percent in 2007 compared to 6.4 percent in 2006. This growth is attributed to the

<sup>2</sup> Algeria, Angola, Cameroon, Chad, Congo, Equatorial Guinea, Gabon, Libya, Nigeria, Sudan

<sup>3</sup> Hongkong, China, Republic of Korea, Singapore, and Chinese Taipei

<sup>4</sup> Common market of the Southern cone: Argentina, Brazil, Paraguay, Uruguay

<sup>5</sup> Association of Southeast Asian nations: Brunei, Cambodia, Indonesia, Laos and Malaysia, Myanmar, Phillipines, Singapore, Thailand, Vietnam

prudent macro economic policies despite increases in oil prices and drought in 2007. In Tanzania, Gross Domestic Product (GDP) grew by 7.1 percent compared to 6.7 percent in 2006. The increase in the growth rate was mainly attributed to an increase in economic activities in communication, mining, financial intermediation, trade, construction, health and agriculture.

In Rwanda the real GDP at constant prices of 2001 grew by 6 percent in 2007 against 5.5 percent in 2006. This growth emanated from the recovery of the tertiary and secondary sectors which recorded an increase of 11.4 percent and 9.2 percent respectively of the value added in 2007 compared to the previous year.

In 2007, Burundi real GDP growth rate declined to 3.6 percent compared to 5.2 percent registered in 2006 while the GDP on market price increased by 8.4 percent, from 934.7 BIF million in 2006 to 1012.9 BIF million in 2007. The decline was mainly attributed to the decrease in coffee production. In fact, the Arabica coffee production decreased by 73.4 percent, from 39,254 Tonnes in 2006 to 10,433 tonnes in 2007 due to the product cycles.

## **II. Annual average Inflation rates:**

In 2007, the region continued to experience inflationary pressure emanating primarily from the rise in oil prices in the world market and the rising food prices. However, despite these factors, the region maintained a generally stable inflation. In the United Republic of Tanzania, overall inflation declined to an annual average of 7.0 percent in 2007 compared to 7.3 percent in 2006. In Kenya, overall inflation in 2007 decreased from 14.5 percent in 2006 to 9.8 percent in 2007. The average annual inflation for 2007 was 6.1 percent down from 7.2 percent in 2006 for Uganda. In Rwanda on average, the annual overall inflation reached at 9.1 percent against 8.9 percent in 2006. Especially during the second quarter, consumer prices of locally produced foodstuffs recorded a deflation of 2.2 percent as a result of good harvests. This upward trend is exclusively

explained by the increase in tariffs of water, excise duties on alcoholic beverages, health care and telecommunication tariffs as well as school fees in the first quarter.

In Burundi, the inflation rate increased to 8.3 percent in 2007 from 2.7 percent recorded in 2006. The increase was due to the rise in oil prices by 24.0 percent and the rise in consumer goods prices by 8.7 percent instead of 0.1 percent a year before, non consumer goods by 8.2 percent instead of 5.7 percent.

### **III. Exchange rates**

The region maintained stable exchange rates, with slight appreciation in all the countries against the US dollar. The Kenya shilling appreciated against the dollar in 2007 with the real effective exchange rate appreciating by about 20percent over the period 2003 to 2007. The average exchange rate for the Kenyan Shilling against the US dollar stood at Shs. 72.1 per US\$ in 2007 compared to Shs. 67.3 per US\$ in 2006

The Uganda shilling sustained steady appreciation against the US dollar. The shilling appreciated by 11.6 percent against the US\$ from June 2006 to June 2007. Following the strong intervention by the central bank, the shilling weakened 7 percent from June 2007 to September 2007. The average exchange rate for the Ugandan Shilling against the US dollar stood at Shs. 1723.5 per US\$ in 2007 compared to Shs. 1831.5 per US\$ in 2006

The average exchange rate for the Tanzanian Shilling against the US dollar stood at Shs. 1,244.1 per US\$ in 2007 compared to Shs. 1,253.9 per US\$ in 2006. The value of the shilling per US\$ was Shs.1,132.1 at end December 2007 compared to Shs.1261.6 per US\$ at end December 2006.

In Rwanda, with the decision taken by the management of the National bank of Rwanda during the month of June 2007 to sell forex to banks as demanded, the forex market stabilized in 2007 on the part of commercial banks, forex bureaux and the NBR and, the appreciation of RWF in relation to USD that started in 2004 was further increased in

2007. In fact, in 2007, the average annual exchange rate of NBR appreciated from 551.7607 to 547.0075 FRW/ US\$, between end 2006 and end 2007, ie an appreciation of 0.9 percent. The value of the Rwanda Franc per US\$ was FRW 544.22 at end December 2007 compared to FRW 548.65 per US\$ at end December 2006.

Due to market liberalisation in Burundi, the difference between the official rate and the rate on black market was 2 percent. The average exchange rate for Burundi franc depreciated against the US dollar by 11.7 percent from 2006 to 2007.

### **III. Balance of payments and Foreign exchange reserves**

The region continued to perform well in the management of the balance of payments and foreign exchange reserves.

In Tanzania, despite the deficit in the balance of payment, foreign reserves increased by 21.9 percent to US\$ 2,755.2 million in 2007, from US\$ 2,260.1 million in 2006. The reserves position in 2007 was enough to cover 4.6 months' imports of goods and services. The performance of the external sector was not encouraging due to continued increase in the current account deficit, from US\$ 1,353.2 million in 2006 to US\$ 2,041.6 million in 2007, (equivalent to an increase of 49.1 percent). The deficit was driven primarily by increase in value of import of goods and services compared to the value of exports of goods and services. The value of merchandise imports (fob) increased from US\$ 3,864.1 million in 2006 to US\$ 4,826.9 million in 2007. This was due to an increase in the value of imports of capital and intermediate goods, and the continued increase in the price of oil in the world market.

In Kenya, the external balance of payments remained healthy largely as a result of strong inflows of remittances. By the end of December 2007, gross official foreign exchange reserves stood at US\$3,355 million equivalent to 3.6 months of import cover. The overall balance of payments improved from a surplus of KSh 44,446 million in 2006 to a surplus of KSh 63,250 million in 2007 largely due to an increase in the foreign exchange

reserves. The current account balance deteriorated further to a deficit of KSh 74,169 million in 2007 from a deficit of KSh 34,523 million the previous year. This was mainly due to the visible balance deficit which widened to KSh 286,641 million. The capital and financial account recorded a surplus of KSh 159,146 million up from a surplus of KSh 63,780 million recorded in 2006. This could be explained by increased direct investments and long term capital investment flows.

Despite the deterioration of the current account, the foreign reserves in Uganda increased by US\$ 615.2 million (excluding revaluation gains and losses) in 2007 equivalent to 6.9 months of imports of goods and services. The foreign exchange reserves stood at US\$ 2,559.5 million in 2007 compared to US\$ 1,810.79 million in the previous year. The growth in reserves was due to the higher foreign direct investment and export receipts. The trade deficit widened from US\$1027.9 million in 2006 to US\$1,296.6 million in 2007 mainly on account of an increase in total imports of about 34.9 percent. Total export proceeds increased by 42 percent in 2007. Though substantial, the growth in exports in 2007 was lower than in the previous year where an increase of 45.9 percent was recorded.

Rwanda registered an excess of global Balance of Payments in 2007 compared to 2006. Balance of trade in goods and services; and revenue deteriorated with deficits of respectively 38 percent and 17 percent. This resulted into the current account balance deficit of 9 percent despite an increase of current transfers by 41 percent due to a remarkable increase of external aid in budget support. The budget support increased from US\$ 121.22 millions to US\$ 234.69 millions in 2006 and 2007 respectively. Nevertheless, the excess of Capital and Financial Operations absorbed the current account deficit and led to an excess of global balance of payments. By end of December 2007, gross official foreign exchange reserves totalled US\$ 551.05 million equivalent to 6.8 months of imports. The high level of imports of goods and services combined with their progressive increase resulted in a more deterioration of the deficit in current transactions. From a level of US\$ 207.29 millions in 2006 the current account deficit reached US\$ 226.27 millions in 2007; an increase of 9.16 percent. The level of deficit in 2007 corresponded to 7.75 percent of GDP estimated at US\$ 2,918.59 millions.

Burundi's maintained its deficit of the Balance of payment but the deficit decreased by 8.9 percent from 137,370.0 BIF million in 2006 to BIF million 125,103.0 in 2007 due to the rise in the balance of capital and financial operation account. The net capital transfer amounted to BIF 177,678.7 million in 2007 compared to 136,558.9 BIF million in 2006.

The net foreign exchange reserves increased by 4.9 percent to BIF 110,926.4 million in 2007 compared to BIF 76,033.7 million in 2006 due to the external budget support and project financial. The reserves positions in 2007 stood at equivalent to 4 months' imports of goods and services.

#### **IV. National Savings**

Gross national savings in the region remain very low.

In Kenya, the net savings declined by 15.7 percent in 2007, however the ratio of gross savings to GDP declined to 12.7 percent in 2007 compared to 14.8 percent in 2006.

In Rwanda, the level of saving is very low rarely attaining 2 percent of GDP if we consider the results of the last five years. The years 2006 and 2007 were characterized by reduction in former saving resulting from important increase in imports.

Gross national savings in Uganda and Tanzania remain very low below 10 percent of GDP. The average ratio of GNS for the last five years is below 5 percent.

Burundi savings increased from BIF -28.5 million in 2006 to BIF 95.4 million in 2007.

## **V. External Debt**

The region generally registered a decline in external debt on account of sound debt management practices, and debt relief under the HIPC and Multilateral Debt Relief Initiatives (MDRI) arrangements.

In Tanzania, by the end of December 2007, the national debt declined slightly from US\$ 7,188.4 million in December 2006 to US\$ 7,041.2 million. Of these, domestic debt amounted to US\$ 1,673.5 million, equivalent to 23.8 percent of the total national debt, and external debt was US\$ 5,367.7 million. Domestic debt consisted largely of government securities.

In Kenya, the external debt declined to US\$ 5,901m in 2007 from US\$ 5,981m in 2006 which represented a decline of 1.3 percent.

In Uganda, the external debt stood at US\$ 1,590.3m at December 2007 compared to \$1617.4 million in by December 2006. This represents a decline of 1.6 percent.

In Rwanda, in addition to the cancellation of Paris Club countries loans in 2005, the implementation of the G8 countries decision to cancel the total debt due to IMF and an important part of debt stock due to IDA and AfDB Group by the heavily indebted poor countries have contributed to reduce the public external debt stock of the country in 2006 from US\$ 1,523.4 millions in 2005 to US\$ 449.8 millions in 2006 and US\$ 503.2 millions in 2007.

At the end of 2007, Burundi external debt amounted to US\$ 1,352.8 million, shared between multilateral creditors with US\$ 1,219.9 million accounting for 90 percent of the total external debt while bilateral creditors contributed only 10 percent.

## CHAPTER 3: EAC TRADE PERFORMANCE

### 3.1 Total Intra-EAC Trade

In 2007, the total intra-EAC<sup>6</sup> trade increased by 22.0 percent reaching the highest value of US\$ 1,973.2 million on account of increased Intra-EAC imports and exports compared to the previous year. The rise in Intra-EAC total trade could be attributed to considerable increase in exports and imports for Kenya and Uganda. For instance, the total trade for Uganda and Kenya increased by 27.1 percent and 42 percent respectively. Overall, Kenya continued to dominate the EAC regional trade, accounting for 51.6 percent of total volume of trade. Kenya also exported more than it imported from her Partner States thereby recording a remarkable trade surplus. Meanwhile, Uganda and Tanzania accounted for 34.2 percent and 14.2 percent of the total intra-EAC trade respectively. During 2006, both total intra-EAC imports and exports registered a decline of 7.5 percent and 16.1 percent respectively. Table 3.1 presents details on Intra-EAC trade for the period 2003 to 2007.

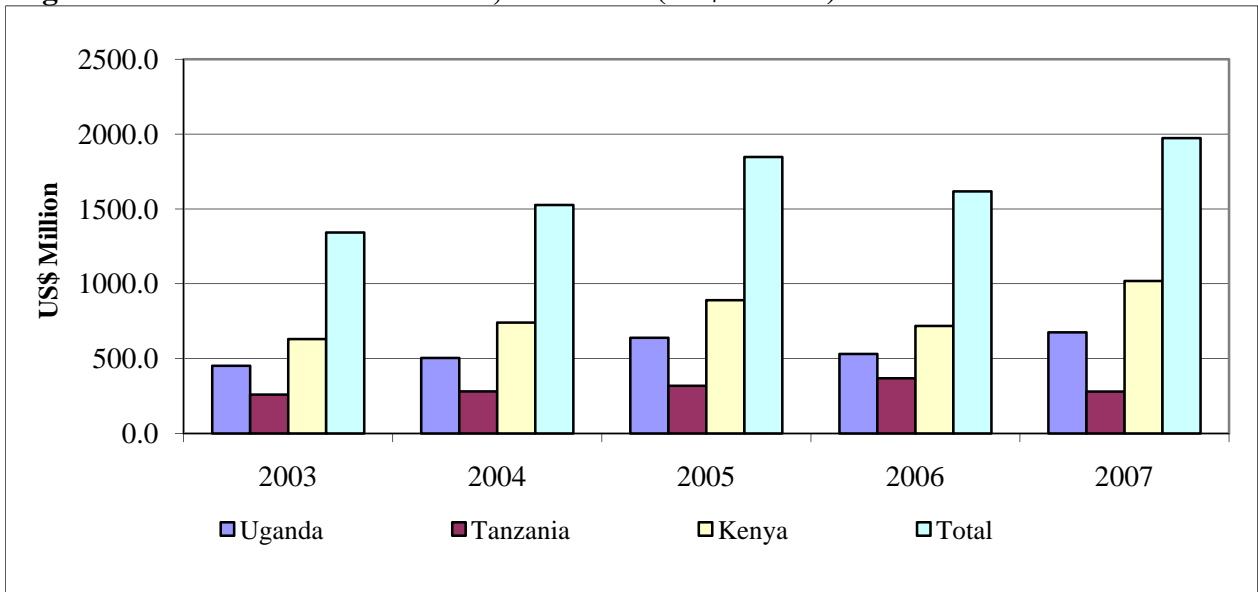

**Table 3.1: Total Intra-EAC Trade, 2003-2007 (US\$ million)**

<sup>6</sup> Intra-EAC trade considers the Partner States that were EAC members as at 2006

**Figure 3.1: Total Intra-EAC Trade, 2003-2007 (US\$ million)**

*Source: Partner States Revenue Authorities, Central Banks and National Statistics Offices*

### 3.1.1 Imports

The total intra-EAC imports increased by 13.4 percent to US\$ 824.6 million in 2007 compared to a decrease of 7.5 percent in the previous year. Uganda's share in intra-EAC imports rose to 63.8 percent in 2007 compared to 59.1 percent recorded in 2006. Over the same period, Kenya's intra-EAC imports increased significantly and attained the highest level of 145.1 percent in 2007. Meanwhile Tanzania's share in intra-EAC imports declined to 13.4 percent in 2007 compared to 30.3 percent in 2006. The rise in intra-EAC imports was on account of increased imports of capital and consumer goods as Ugandan prepared to host CHOGM and increased imports of food commodities by Kenya due to the drought experienced in the preceding year.

### 3.1.2 Exports

The total intra-EAC exports rose to US\$ 1,148.6 million in 2007 compared to US\$ 890.1 million registered in the previous year. In general, all EAC Partner States recorded significant increases in intra-EAC exports except for Uganda and Tanzania which marginal reductions in 2005. Uganda's share in intra-EAC exports rose from 11.4 percent in 2006 to 13.0 percent in 2007. Kenya's share of intra-EAC exports remained at the

2006 level of 72 percent while, Tanzania's share in intra-EAC exports declined from 16.6 percent in 2006 to 14.7 percent in 2007.

### **3.1.3 EAC Trade with the Rest of the World**

During 2007, the total EAC trade with the rest of the world increased by 26.8 percent to US\$ 26,196.8 million compared to an increase of 22.8 percent in 2006. This increase could be attributed to a 28.5 percent upsurge in imports bill to US\$ 18,403.3 million mainly on account of increased international oil prices. The total imports accounted for about 70 percent of total EAC trade during 2007. The huge increase in imports relative to exports widened the EAC trade deficit from US\$ 7,990.3 million in 2006 to US\$ 10,609.8 million in 2007.

The share of total intra-EAC trade to total trade declined marginally by 7.5 percent in 2007 compared to 7.8 percent in the previous year. The low share of total intra-EAC trade in total trade is largely attributed to production of similar tradable commodities coupled with low productive capacity in the Partner States. The EU bloc took the largest share of EAC trade accounting for 21.9 percent in 2007 compared to 17.4 percent registered in 2006 (Table 3.2). Trade with the EU was mainly in agricultural commodities, minerals and capital goods.

### 3.2.1 Imports

The demand for consumer and capital goods in the EAC region has been growing pushing the imports bill from US\$ 14,326.7 million in 2006 to US\$ 18,403.3 million in 2007. The continued rise in oil prices in world market further increased the imports bill, with oil imports accounting for between 20 and 25 percent of total EAC imports. The proportion of total intra-EAC imports to total EAC imports declined to 4.1 percent in 2007 from 5.1 percent in 2006.

### 3.2.2 Exports

In 2007, the total EAC exports increased by 23.0 percent to US\$ 7,793.5 million compared to an increase of 17.3 percent and 8.2 percent registered in 2005 and 2006 respectively. In particular, exports to COMESA and EU blocs increased significantly accounting for 32 percent and 23 percent respectively. The share of total intra-EAC exports to total EAC Exports increased to 18.1 percent from 14.0 percent in 2006. The share of EAC exports to USA increased gradually from 1.5 percent in 2003 to 5.8 percent in 2007 due to AGOA initiative where EAC countries were beneficiaries.

## 3.3 Rwanda's Trade with the EAC

Rwanda's external trade continued to be characterized by low levels of exports compared to imports as summarized in Table 3.3. The country's EAC total trade stood at US\$ 172.02 million in 2006 compared to US\$ 237.82 million in 2007, maintaining a share of about 27 percent to total trade. During the period under review, the country recorded persistent trade deficits with the worst deficit of US\$ 162 million in 2007. Overall, both total imports and exports to EAC increased by 43.4 percent and 16.3 percent respectively.

**Table 3.3: Rwanda's Trade with the EAC (US\$ Million)**

Trade Flows	2006	2007	percent change
Total Imports from EAC	139.4	199.89	43.39
Total Exports to EAC	32.62	37.93	16.28
Total EAC Trade	172.02	237.82	38.25
Trade Balance	-106.78	-161.96	51.68
Rwanda total trade	629.46	863.69	37.21
EAC share (percent)	27.33	27.54	0.76

Source: Rwanda Revenue Authority

### 3.3.1 Imports

Rwanda's imports from the EAC region increased from US\$ 139.4 million in 2006 to USD 199.9 million in 2007. The share of imports from EAC accounted for 22.1 percent and 23.1 percent of total trade in 2006 and 2007 respectively. Portland cement, iron and steel, palm oil and its fractions, wheat and cereal flours and petroleum oils dominated imports from EAC.

### 3.3.2 Exports

Rwanda's exports to the EAC region recorded an increase from US\$ 32.6 million in 2006 to US\$ 37.9 million in 2007. The total exports to EAC accounted for 19.0 percent and 16.0 percent of Rwanda's total EAC trade in 2006 and 2007 respectively. Tea, minerals, dried leguminous vegetables and fruits dominated exports to EAC. Rwanda's exports to Kenya included tea in transit to/via Mombasa auction.

## 3.4 Burundi's Trade with the EAC

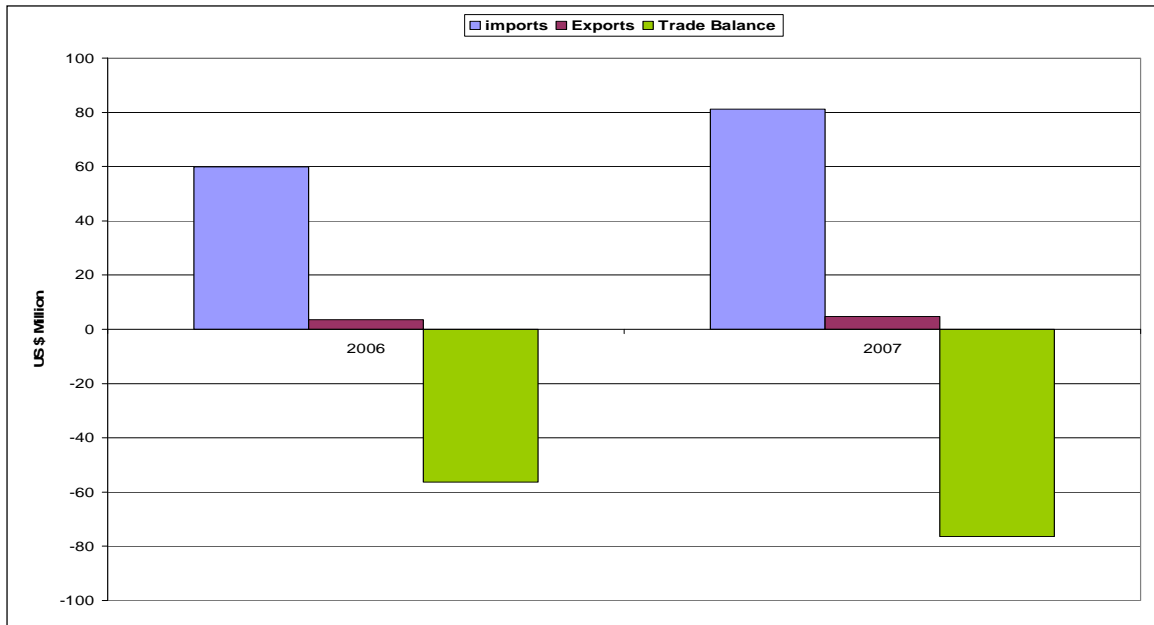

Burundi's trade with the EAC Partner States increased significantly by 36.8 percent to US\$ 84.2 million in 2007 from US\$ 61.6 million registered in 2006. During the period under review, both imports and exports increased, surpassing the mark of 30 percent in 2007. The country recorded persistent trade deficits with the worst deficit of US\$ 78 million occurring in 2007. Overall, the proportion of EAC trade to total trade reduced twice as much from 24.4 percent in 2004 to 12.6 percent in 2007, implying a shift in her trade partners over the years (see table 3.4).

**Table 3.4: Burundi's Trade with EAC**

Trade Flow	2004	2005	2006	2007	2005	2006	2007
	US\$ million				percent change		
Imports from EAC	53.44	58.30	59.94	81.05	9.09	2.81	35.23
Exports to EAC	1.21	1.29	3.56	4.75	6.62	178.24	33.33

Source: Burundi Central Bank and Customs Department

**Figure 3.2: Burundi's Trade with the EAC**

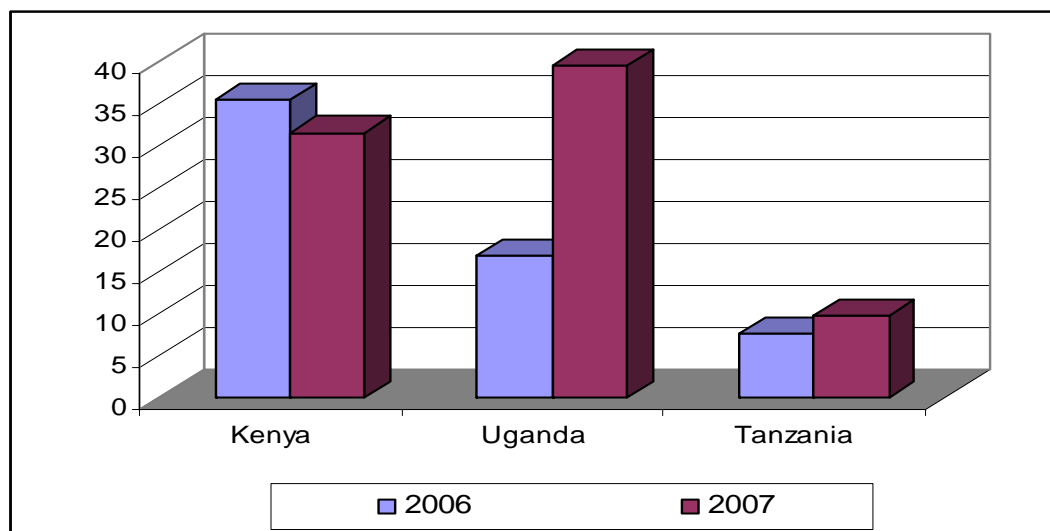

Source: Burundi Central Bank and Customs Department

### 3.4.1 Imports

The total imports from EAC Partner States increased to US\$ 81.1 million in 2007 from US\$ 59.9 million in 2006. This could be partly attributed to the rise in the imports bill for goods like cement, animal fat & vegetable oils, Iron & steel, soap & organic surface-active agents and washing preparation, imported essentially from Uganda.

The main imported products from Kenya included glass & glassware, iron & steel, dairy products, birds' eggs, natural honey, sugars & confectionery and petroleum products among others. Meanwhile, imports from Tanzania comprised of cement, cereals and salt.

**Figure 3.3: Burundi's Imports from EAC, 2006-2007 (US\$ million)**

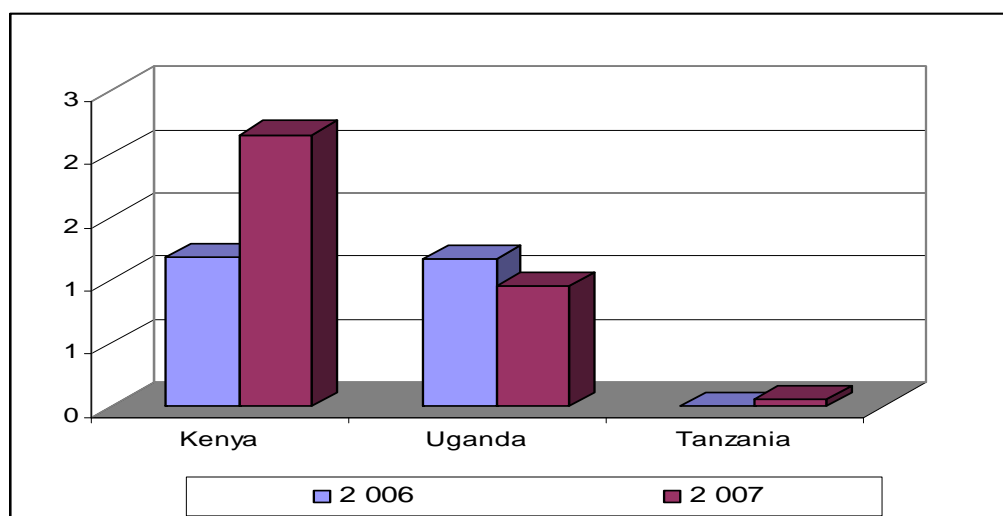

Source: Burundi Central Bank and Customs Department

### 3.4.2 Domestic Exports

Burundi's domestic exports to EAC Partner States increased by 33.7 percent to US\$ 3.2 million in 2007, with Kenya taking the largest share. The major exports to Kenya were hides & skins, while those destined for Tanzania were hides & skins, beer and oil seeds & oleaginous fruits. The exports to Uganda were mainly cigarettes, coffee and hides & skins.

**Figure 3.4: Burundi's Total Domestic Exports to EAC, 2006-2007 (US\$ million)**

Source: Burundi Central Bank and Customs Department

### 3.4.3 Re-Exports

Burundi's intra EAC re-exports increased from US\$ 1.2 million to US\$ 1.6 million in 2007, accounting for 33.5 percent of the total exports to the community. The main re-exports included gold, zinc & articles thereof, miscellaneous manufactured articles, iron & steel, electrical equipment & parts thereof, sound recorders and textile articles (see Table 3.4)

**Table 3.4: Burundi's Re-exports to EAC**

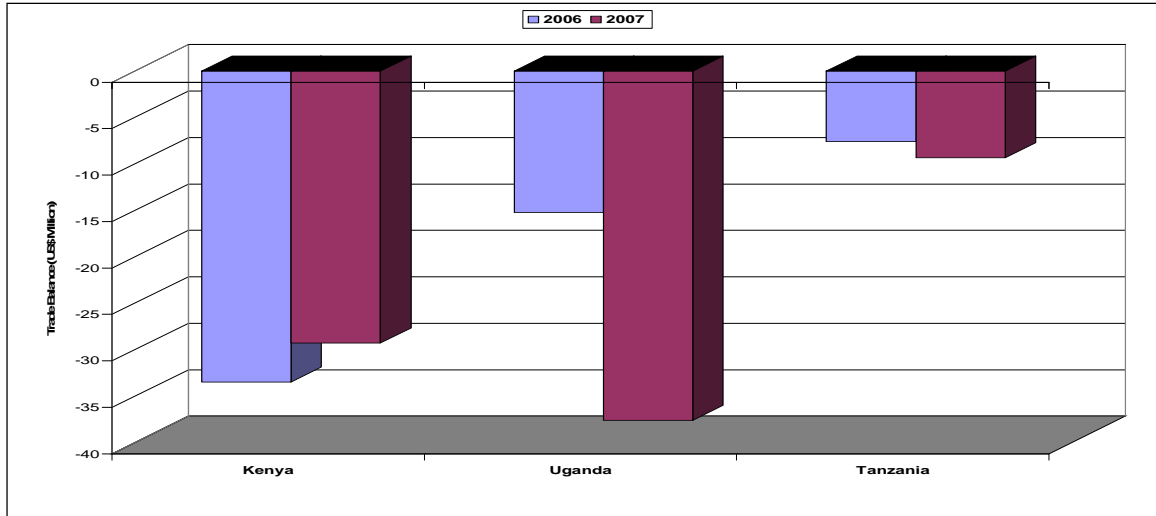

<b>Trade Flow</b>	<b>2006</b>	<b>2007</b>
Intra EAC Domestic Exports	1.63	3.16
Intra EAC Re-exports	1.20	1.59
Intra EAC Total Exports	3.56	4.75
<b>percent share of intra-EAC re-exports</b>	<b>33.71</b>	<b>33.47</b>

### 3.4.4 Burundi's EAC Trade Balance

Burundi's trade balance with the EAC deteriorated to a deficit of US\$ 76.3 million in 2007 from a deficit of US\$ 56.3 million in 2006. Burundi's trade deficit with Kenya decreased by 12.6 percent in 2007 on account of a reduction in imports coupled with increased exports. The trade balance with Uganda and Tanzania however deteriorated on account of increased imports from US\$ 16.9 million and US\$ 7.6 million in 2006 to US\$ 39.6 million and US\$ 9.8 million in 2007 respectively.

**Figure 3.5: Burundi's EAC Trade Balance**

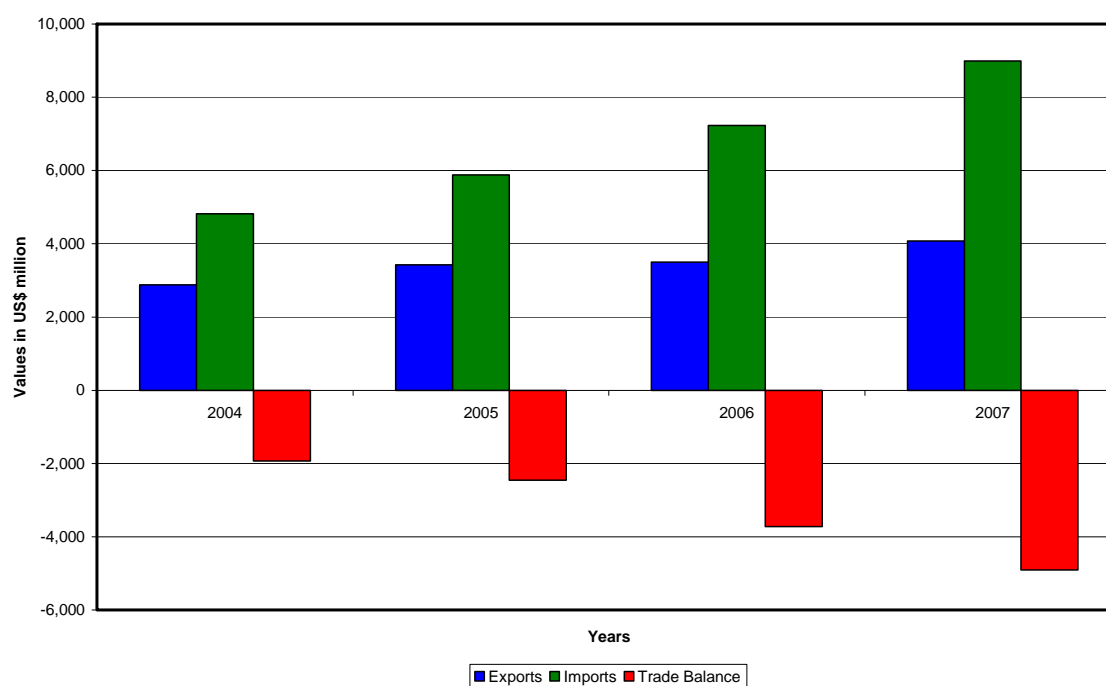

Source: Burundi Central Bank and Customs Department

## CHAPTER 4: TRADE DEVELOPMENTS IN THE EAC PARTNER STATES

### 4.1 Kenya's International Trade

Kenya's total trade increased by 21.8 percent to US\$ 13,069.0 million in 2007 from US\$ 10,734.1 million recorded in 2006. The growth in trade is attributed to expansion in both imports and exports. The trade deficit, however, widened from US\$ 3,728.0 million in 2006 to US\$ 4,908.9 million in 2007 on account of faster growth in imports compared to exports.

**Figure 4.1: Kenya's Total Exports, Imports and Trade Balance, 2004-2007 (US\$ million)**

Source: KRA, CBK, and KNBS

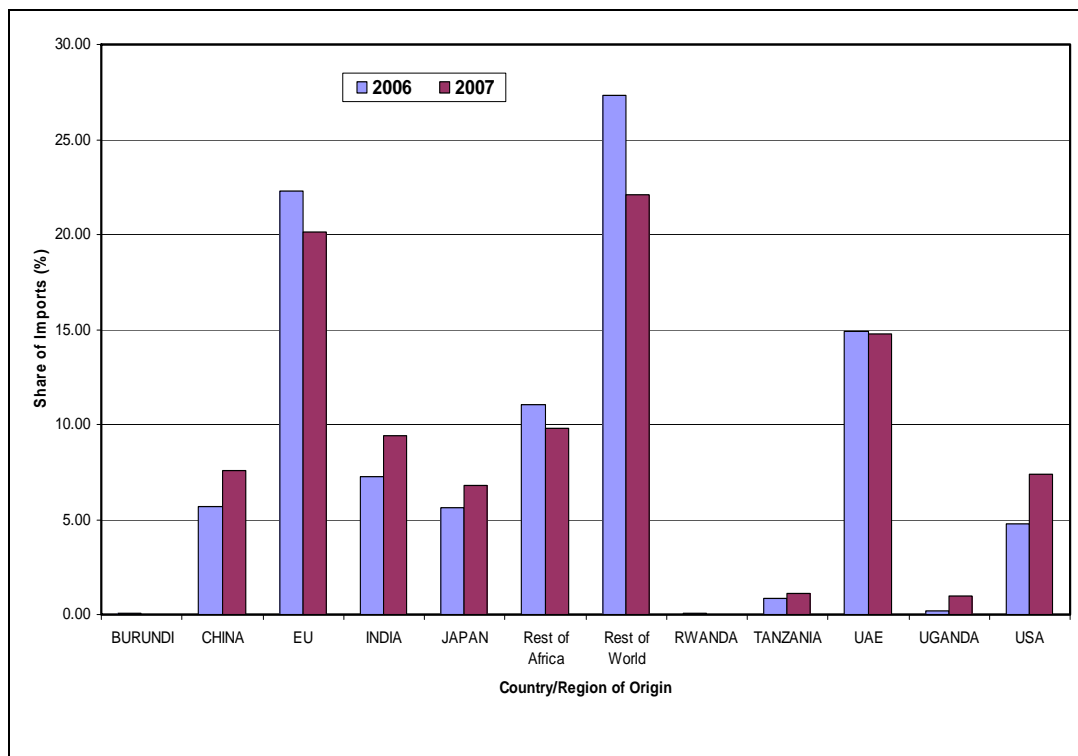

Kenya's main trading partners in 2007 were EU, UAE, USA and India accounting for 22.1 percent, 11.2 percent, 7.3 percent and 7.1 percent of total trade respectively. In 2007, the share of Kenya's trade with EAC Partner States to total trade was 7.8 percent. The combined share of Kenya's trade with Rwanda and Burundi remained below 1.0 percent of total trade despite an increase from US\$ 104.1 million in 2006 to US\$ 125.8 million in 2007.

### 4.1.1 Imports

Kenya's imports increased by 24.3 percent from US\$ 7,231.1 million in 2006 to US\$ 8,988.9 million in 2007. The rise in imports was largely on account of importation of capital goods, which was consistent with increased economic activities during the period under review.

The EU bloc remained the major source of Kenya's imports during the period under review. The other sources of imports included UAE, India, China and USA. The total imports from EAC increased from US\$ 76.7 million in 2006 to US\$ 188.0 million in 2007. Meanwhile, imports from Rwanda and Burundi decreased from US\$ 2.9 million and US\$ 4.7 million in 2006 to US\$ 1.3 million and US\$ 2.3 million in 2007 respectively.

**Figure 4.2: Kenya's Percentage Shares of Imports by Country of Origin/Region**

Source: KRA, CBK and KNBS

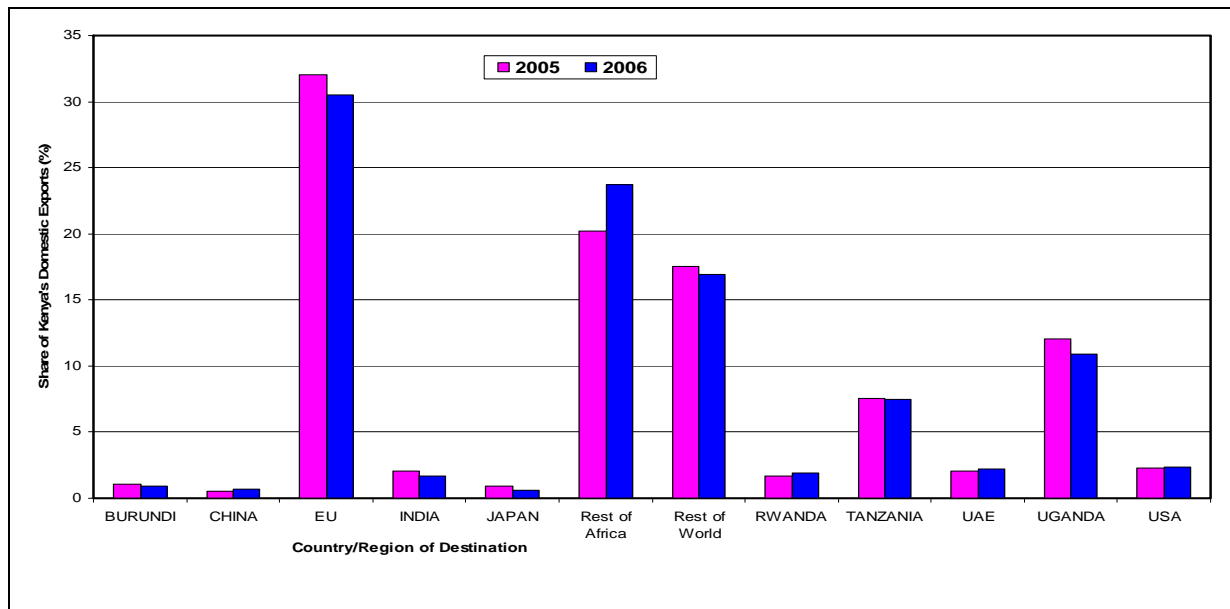

The main imported goods included mineral fuels, vehicles and accessories thereof, machinery and equipments, aircraft and parts thereof, plastics and articles thereof, iron and steel and animal or vegetables fats and oils (see table 6b).

#### 4.1.2 Domestic Exports

Kenya's domestic exports increased by 22.9 percent to US\$ 3,583.9 million in 2007 as a result of increased volumes of commodity exports and improved prices in the international market. The high demand for manufactured goods coupled with the increase in trade activities in the EAC region boosted Kenya's domestic exports. Domestic exports to all destinations increased in 2007 except those to USA, which recorded a declined of 13.1 percent. The European Union remained the main domestic export destination, accounting for 29.2 percent of Kenya's domestic exports. The main domestic products exported included coffee, tea, horticulture, tobacco, iron and steel, mineral fuels, salt and cement, inorganic and organic chemicals (Table 7e in the Appendix).

Kenya's domestic exports to Burundi increased by 20.8 percent to US\$ 32.0 million in 2007, while the share of total domestic exports remained stable at 0.9 percent. Similarly, domestic exports to Rwanda increased by 41.1 percent to US\$ 79.1 million in 2007, accounting for 2.2 percent of total domestic exports.

**Figure 4.3: Kenya's Percentage Shares of Domestic Exports by Country of origin/Region**

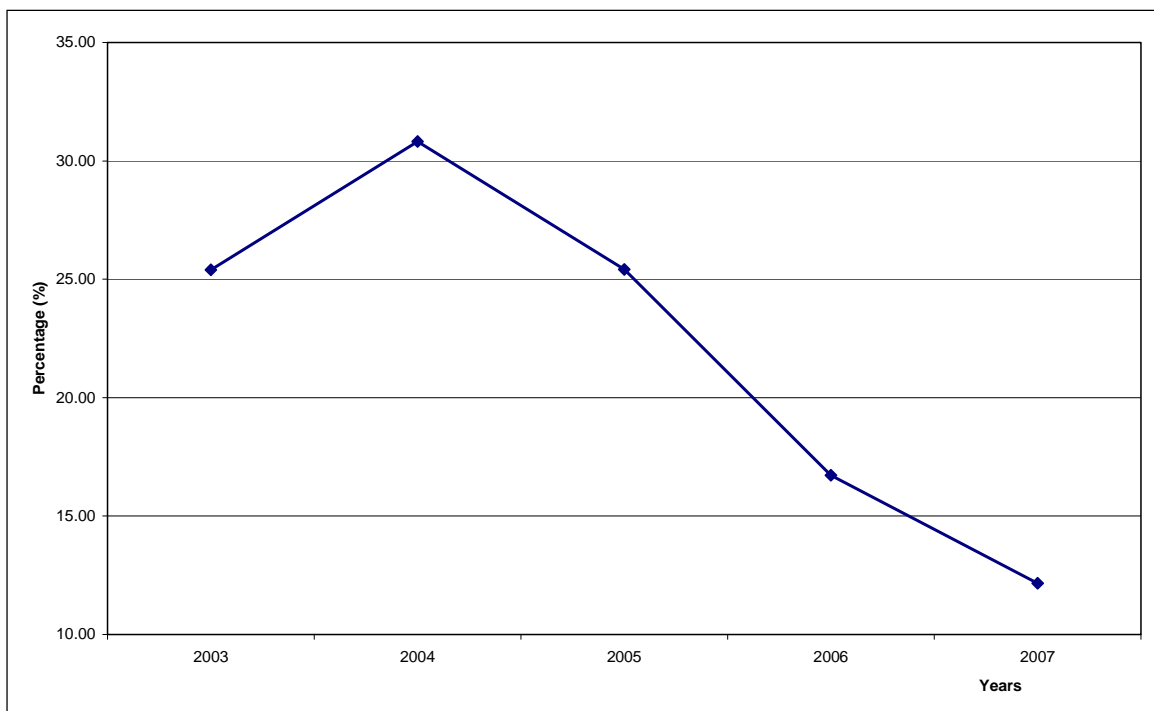

Source: KRA, CBK, and KNBS

### 4.1.3 Re-Exports

Kenya's re-exports declined drastically from US\$ 586.0 million in 2006 to US\$ 496.1 million in 2007. This decline could be partly attributed to proper classification of goods on transit particularly petroleum products. Notable decreases were in re-exports to Uganda, Rwanda and Tanzania. Similarly, the share of re-exports to total exports continued to decline attaining the lowest levels in 2007 (Figure 4.4).

**Figure 4.4: Kenya's Re-Exports as a Percentage of Total Exports**

Source: KRA, CBK and KNBS

### 4.1.4 Intra – EAC Trade

Kenya's total trade with EAC Partner States increased by 41.9 percent to US\$ 1,018.4 million in 2007 due to significant increase in both exports and imports (Table 4.1 and Figure 4.5). The total trade with Uganda and Tanzania increased considerably from US\$ 401.1 million and US\$ 316.6 million in 2006 to US\$ 587.6 million and US\$ 430.9 million in 2007 respectively. Kenya recorded a trade surplus with Uganda and Tanzania,

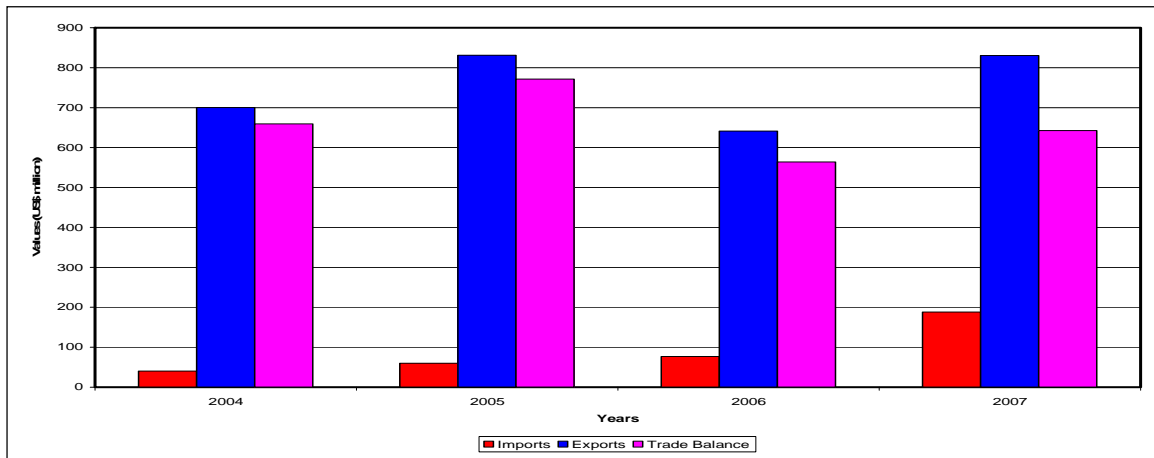

which increased from US\$ 373.3 million and US\$ 191.1 million in 2006 to US\$ 409.9 million and US\$ 232.5 million in 2007 respectively.

**Table 4.1: Kenya's Trade with EAC Partner States 2004-2007**

	US\$ Million				percent change		
	2004	2005	2006	2007	2005	2006	2007

**Figure 4.5: Kenya's Trade with EAC Partner States**

Source: KRA, CBK and KNBS

#### 4.1.4.1 Imports

Kenya's imports from EAC Partner States increased from US\$ 76.7 million in 2006 to US\$ 188.0 million in 2007. Imports from Uganda increased by more than five times from US\$ 14.0 million in 2006 to US\$ 88.2 million in 2007. Major imports from Uganda included edible vegetables, cereals, tobacco, oil seeds and oleaginous fruits, animals and vegetable fats (see appendix Table 5b).

Similarly, imports from Tanzania increased by 58.1 percent to US\$ 99.2 million in 2007 from US\$ 62.7 million in 2006. The major imports from Tanzania included wood and articles of wood, textiles and worn clothing, cereals, paper and paperboard and cotton (see appendix Table 5b).

#### 4.1.4.2 Domestic Exports

Domestic exports to the EAC Partner States amounted to US\$ 748.6 million in 2007 compared to US\$ 536.4 million in 2006, an increase of 39.6 percent (Table 4.2). The domestic exports to Uganda rose by 39.1 percent in 2007 from US\$ 318.6 million in 2006 to US\$ 443.1 million in 2007. The share of domestic exports to Uganda rose from 10.9 percent in 2006 to 12.4 percent in 2007. Major exports to Uganda included mineral fuels,

salt, cement, beverages, spirits and vinegar; paper and paperboard; plastics and articles thereof; iron and steel and pharmaceutical products (see Table 7b in the Appendix).

Kenya's domestic exports to Tanzania increased by 40.3 percent from US\$ 217.8 million in 2006 to US\$ 305.5 million in 2007. Similarly, the share of Kenya's domestic exports to Tanzania rose from 7.5 percent to 8.5 percent over the same period. Major exports to Tanzania comprised of plastics and articles thereof; animal or vegetables fats and oils; mineral fuels, pharmaceutical products; iron and steel; salt and cement (see Table 7b in the Appendix).

#### 4.1.4.3 Re-Exports

Kenya's intra-EAC re-exports declined further by 21.8 percent from US\$ 104.6 million in 2006 to US\$ 81.8 million in 2007 on account of improved classification of transit goods. Thus, the share of re-exports to total intra-EAC exports declined from 16.3 percent in 2006 to 9.9 percent in 2007.

Re-exports to Uganda declined by 18.8 percent from US\$ 68.5 million in 2006 to US\$ 55.6 million in 2007 due to reduced re-exports of mineral fuels and oils. The share of re-exports to Uganda declined from 11.7 percent in 2006 to 11.2 percent of the total re-exports in 2007.

Similarly, re-exports to Tanzania declined by 27.5 percent from US\$ 36.1 million in 2006 to US\$ 26.2 million in 2007 following decreased re-exports of mineral fuels and oils; vehicles and accessories thereof. Similarly, the share of total re-exports to Tanzania decreased from 6.2 percent to 5.3 percent.

**Table 4.2: Kenya's Intra-EAC exports, 2004 – 2007 (US\$ million)**

<b>Intra-EAC export flows</b>	<b>2004</b>	<b>2005</b>	<b>2006</b>	<b>2007</b>
Intra-EAC Domestic Exports	339.26	500.70	536.41	748.64
Intra-EAC Re-exports	361.05	330.51	104.56	81.79
<b>Total Intra-EAC Exports</b>	<b>700.31</b>	<b>831.20</b>	<b>640.97</b>	<b>830.43</b>
Percent Share of Intra-Re-exports	51.56	39.76	16.31	9.85

*Source: Kenya Revenue Authority*

## 4.2 Tanzania's International Trade

Tanzania's total trade increased by 25.7 percent to US\$ 8,058.4 million in 2007 as both imports and exports recorded significant increases during the period under review. However, the increase in imports was much higher compared to the exports thus leading to deterioration of the country's trade balance with the rest of the world. The deficit of Tanzania's trade balance widened from a deficit of US\$ 2,667.2 million in 2006 to US\$ 3,779.7 million in 2007 (Figure 4.6). European Union continued to lead as the main trading bloc accounting for 18.4 percent of Tanzania's total trade in 2007.

The trade between Tanzania and Burundi almost doubled to US\$ 71.0 million in 2007 compared to US\$ 38.0 million registered in the previous year. Likewise, Tanzania trade with Rwanda increased more than three times from US\$ 5.7 million in 2006 to US\$ 17.6 million in 2007. The increase in total trade between Tanzania and the two countries was largely attributed to a surge in exports while Tanzania's imports from Tanzania remained low.

**Figure 4.6: Tanzania: Total Exports, Imports and Trade Balance**

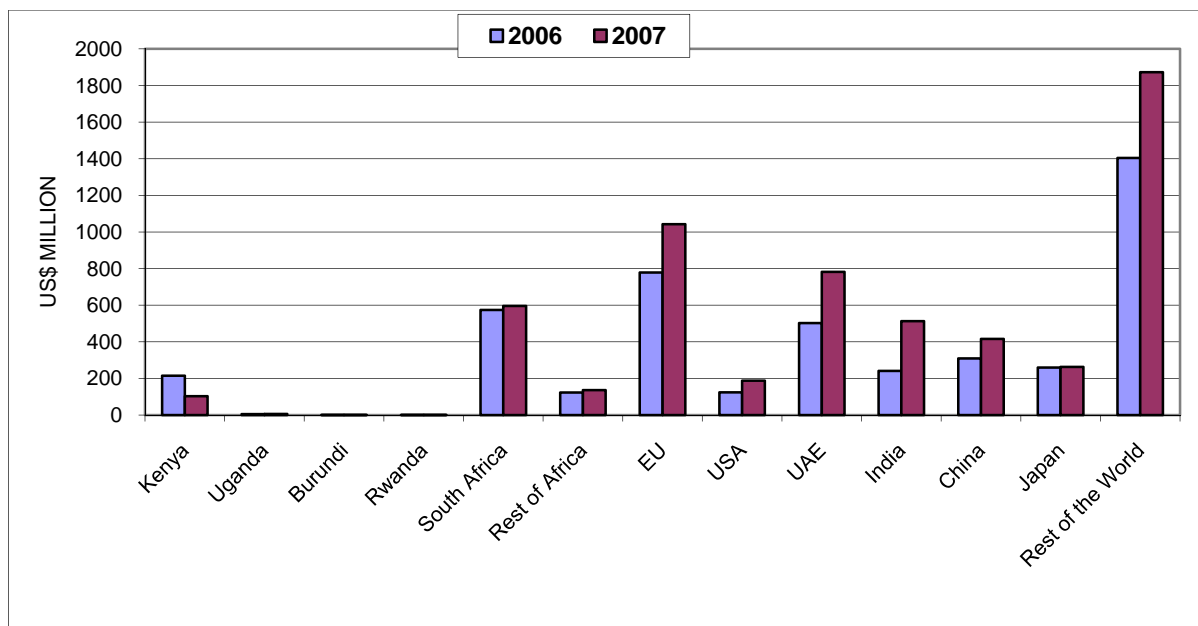

Source: TRA and NBS

### 4.2.1 Imports

In 2007, Tanzania's imports increased by 30.4 percent to US\$ 5,919.0 million compared to US\$ 4,538.3 million recorded in the previous year. The notable products that registered

significant increase in the import bill were petroleum products, electrical machinery equipments and pharmaceutical products. The share of oil imports constituted about 30 percent of total Tanzania's imports bill. The persistent increase in oil prices in the world market coupled with increased domestic demand for petroleum products and manufactured goods partly contributed to the high import bill during the period under review. The major sources of Tanzania's imports in 2007 were EU, United Arab Emirates, SADC (mainly South Africa), India, China and Japan. The six leading sources of imports accounted for over 60 percent of the country's imports bill.

**Figure 4.7: Tanzania's Percentage shares of imports by origin**

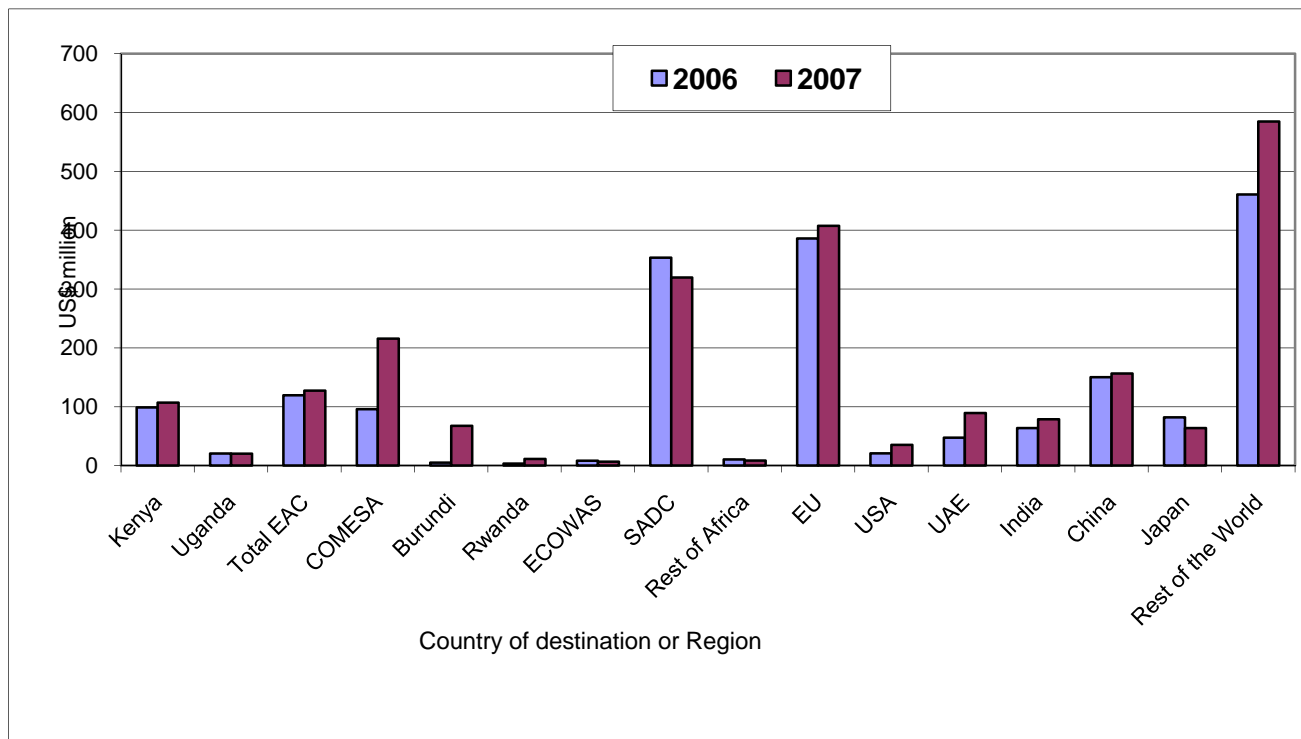

Source: TRA and NBS

#### 4.2.2 Domestic Exports

Tanzania's domestic exports rose by 14.2 percent to US\$ 1,964.9 million in 2007. The country's exports were mainly gold, manufactured goods and fish and fish products. Despite the increase in export unit prices in the world markets, there was no much improvement in traditional exports largely due to lower export volumes. The traditional exports included coffee, cotton, sisal, tea, tobacco, cashew nuts and cloves. The decline in export volumes of traditional exports was largely attributed to the unfavourable weather conditions that adversely affected domestic crop production. The main destinations of Tanzania's exports during 2007 were European Union, SADC (mainly South Africa),

COMESA, China and EAC Partner States which collectively accounted for 65 percent of total exports.

**Figure 4.8: Tanzania’s Percentage Shares of Exports by Destination**

Source: TRA and NBS

### 4.2.3 Re-exports

Tanzania’s re-exports increased from US\$ 151.3 million in 2006 to US\$ 174.5 million in 2007 with wheat and petroleum products being the main items. The performance of Tanzania’s re-exports was partly attributed to the country’s strategic geographical location which facilitated imports of goods in bulk and re-exports to the neighbouring land-locked countries in the region. However, the share of re-exports to total country’s exports has remained below 10 percent for the past three years.

### 4.2.4 Tanzania’s Intra-EAC Trade

During 2007, Tanzania’s total trade with other EAC Partner States declined to US\$ 279.5 million from US\$ 368.0 million in the previous year. The decline is attributed to reduced imports from other EAC Partner States despite increased exports. This resulted in increased trade surplus to US\$ 59.5 million in 2007 compared to a trade deficit of US\$ 73.2 million in 2006.

**Figure 4.9: Tanzania's Trade with EAC Partner States**

Source: TRA and NBS

Tanzania's trade balance with Kenya improved to a surplus of US\$ 19.8 million in 2007 compared to a deficit of US\$ 111.5 million in 2006. This was largely due to increased exports of tea, wood, petroleum products, textile articles and maize coupled with a decline in commodity imports particularly oil. However, there was a marginal decline in trade surplus with Uganda from US\$ 39.6 million in 2006 to US\$ 38.3 million in 2007.

#### 4.2.4.1 Imports

The total imports from EAC Partner States declined by 50.1 percent to US\$ 110.1 million in 2007 compared to US\$ 220.6 million in 2006. The decrease was more pronounced on imports from Kenya, which decreased to US\$ 103.6 million in 2007 compared to US\$ 215.6 million recorded in the previous year. The decline could be attributed to reduced imports of petroleum products. On the other hand, Tanzania's imports from Uganda increased marginally from US\$ 5.4 million in 2006 to US\$ 6.5 million in 2007 with cement being the main imported product.

#### 4.2.4.2 Domestic Exports

Tanzania's domestic exports to EAC Partner States increased by 6.6 percent to US\$ 127.2 million in 2007 compared to US\$ 119.4 million in 2006. The increase was largely attributed to the surge in exports to Kenya, as the level of exports to Uganda recorded a marginal fall during the period under review. Overall, Tanzania's exports to Kenya rose by 8.2 percent in 2007 from US\$ 106.9 registered in 2006. The major exports to Kenya included tea, wood and petroleum products as well as fish and fish products. However, it is worth noting that tea exports to Kenya were mostly destined for the Mombasa Auction, while fish and fish products were en route to the European market. Exports to Uganda

declined marginally to US\$ 20.3 million in 2007 from US\$ 20.6 million in 2006, with the major items being palm oil, rice, hot rolled iron/steel products, plastic items, sacks and bags (see appendix Table 7b).

#### 4.2.4.3 Re-Exports

In 2007, Tanzania's re-exports to EAC Partner States increased by 50.7 percent to US\$ 42.2 million in 2007 with Kenya accounting for the largest share. In 2007, re-exports to Kenya increased to US\$ 16.5 million from US\$ 4.9 million in 2006. Among the items re-exported to Kenya included machinery and spares thereof, vehicles and electrical equipment. Likewise, there was an increase in re-exports to Uganda by 11.4 percent to US\$ 25.7 million in 2007 with the main products being cereals (mainly wheat), electrical equipments and vehicles.

**Table 4.3: Tanzania's Intra-EAC Exports, 2004 – 2007 (US\$ million)**

Intra-export flows	2004	2005	2006	2007
Intra-EAC Domestic Exports	96.3	101.3	119.4	125.2
Intra-EAC Re-exports	49.33	40.69	28.02	42.2
Total Intra-EAC Exports	<b>145.67</b>	<b>141.97</b>	<b>147.41</b>	<b>169.5</b>
Percent Share of Intra-EAC Re-exports	33.87	28.66	19.01	25.2

*Source: TRA and NBS*

### 4.3 Uganda's International Trade

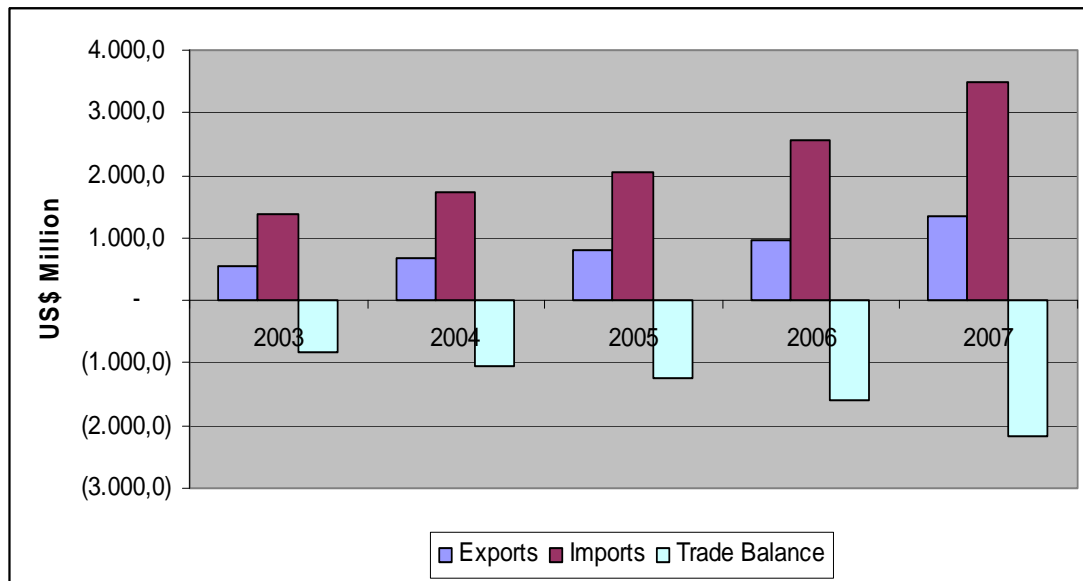

During 2007, Uganda's total trade increased by 37.3 percent to US\$ 4,832.1 million on account of increased exports and imports by 38.9 percent and 36.7 percent respectively. This was in line with the global economy that continued to register robust growth in 2007 despite bouts of financial volatility and rising fuel prices. Exports increased from US\$ 962.3 million in 2006 to US\$ 1,336.7 million on account of improved international commodity prices and favourable macro-economic recovery and stabilization policies undertaken by government that boosted non-traditional exports.

Similarly, imports rose from US\$ 2,557.3 million in 2006 to US\$ 3,495.4 million in 2007. At a regional level, Uganda recorded remarkable increase in total trade with the COMESA and EU by 39.9 percent and 23.0 percent respectively. Notably, imports

increased at a higher rate than exports, widening of the trade deficit by 35.3 percent to US\$ 2,158.7 million in 2007. Apart from COMESA and the Rest of Africa, the trade deficit with the other regional blocs continued to be observed. In 2007, Uganda's trade balance with COMESA (excluding Rwanda, Burundi and Kenya) recorded a surplus of US\$ 223.0 million on account of several factors including: improved peace and security in the COMESA region especially in Sudan and DRC, the signing of favourable bilateral trade protocols and improved the trade environment in the region.

The other trading partners with which Uganda recorded remarkable trade deficits in 2007 were EU and UAE estimated at US\$ 393.1 million and US\$ 234.5 million respectively. The resultant deteriorating trade balance was due to continued export of raw materials, import of highly valued manufactured and consumer goods amid limited penetration and access to the new markets. Figure 4.10 below summarises the developments in Uganda's international trade.

**Figure 4.10: Uganda's Total Exports, Imports and Trade Balance, 2003-2007**

*Source: UBOS and URA*

### 4.3.1 Imports

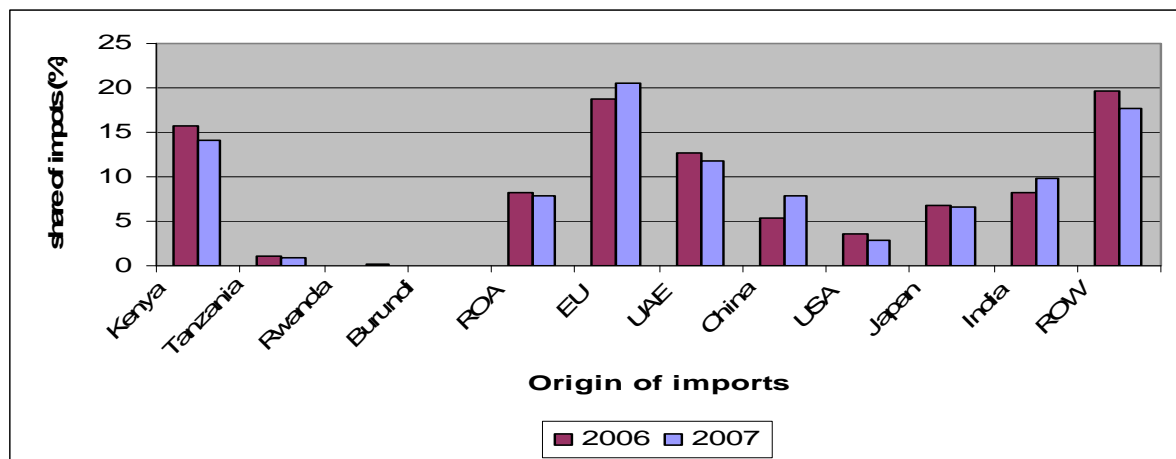

Uganda's imports rose by 36.6 percent to US\$ 3,495.4 million in 2007 on account of growth in private sector imports for capital and consumer goods in response to tax

incentives, particularly to hoteliers in preparation for the November 2007 Common Wealth Heads of Government Meeting (CHOGM).

At a regional level, the rise in total imports was attributed to increased imports from SADC and EU by 26.4 percent and 49.1 percent to US\$ 239.9 million and US\$ 717.6 million, respectively in 2007. The increase was primarily on account of growth in private sector imports for capital and consumer goods such as petroleum products, iron and steel, mineral fuels, electrical machinery, pharmaceutical products and sugars. The import bill on petroleum products increased due to local demand for oil arising from shortage of Hydro power and rising international oil prices. It is worth noting that most of the imports originated from EU, Kenya, China, India, Japan and UAE (see Figure 4.11).

Uganda’s imports from Rwanda and Burundi though low, increased from US\$ 0.50 million and US\$ 0.02 million in 2006 to US\$ 3.80 million and US\$ 0.80 million in 2007, respectively. It is important to note that, some imported products from Rwanda is transacted under informal trade.

**Figure 4.11: Uganda’s Percentage Shares of Imports by Origin**

Source: UBOS, BOU and URA

### 4.3.2 Exports

Uganda’s total exports increased by 38.9 percent to US\$ 1,336.7 million in 2007, compared to an increase of 18.4 percent recorded in 2006. This was as a result of increased exports to COMESA, EU and USA of 33.9 percent, 23.1 percent and 37.9 percent, respectively.

The increase in exports to COMESA was mainly attributed to improved peace and security in the region where exports to Sudan and DRC increased substantially from US\$ 91.7 million and US\$ 44.8 million in 2006 to US\$ 157.1 million and US\$ 100.0 million in 2007, respectively (see Figure 4.12). The substantial increase in exports was driven by high international export prices and increased domestic production.

Exports to Rwanda and Burundi stood at US\$ 83.3 million and US\$ 42.7 million in 2007, accounting for 6.2 percent and 3.2 percent of Uganda’s total exports respectively.

**Figure 4.12: Uganda’s Percentage Shares of exports by Destination,2006-2007**

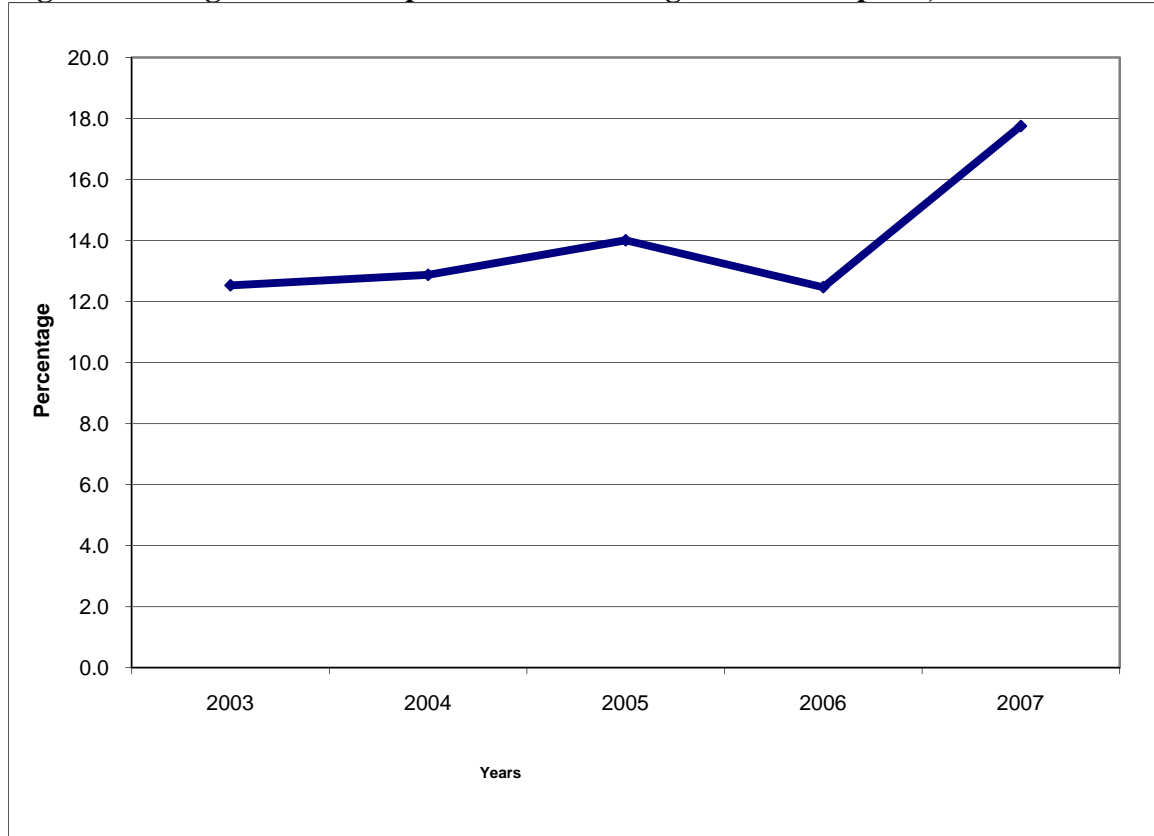

Source: UBOS, BOU and URA

### 4.3.3 Re-Exports

Uganda’s re-exports registered a substantial increase of 97.8 percent to US\$ 237.4 million in 2007 due to increased demand for goods in Sudan and DRC. The items re-exported were mainly beverages, fertilizers, vehicles, chemicals and other pharmaceutical products. The levels of re-exports accounted for 17.8 percent of Uganda’s total exports while domestic exports amounted to US\$ 1,099.3 million in 2007. Figure 4.13 shows the proportion of re-exports to total exports.

**Figure 4.13: Uganda's Re-Exports as a Percentage of Total Exports, 2003-2007**

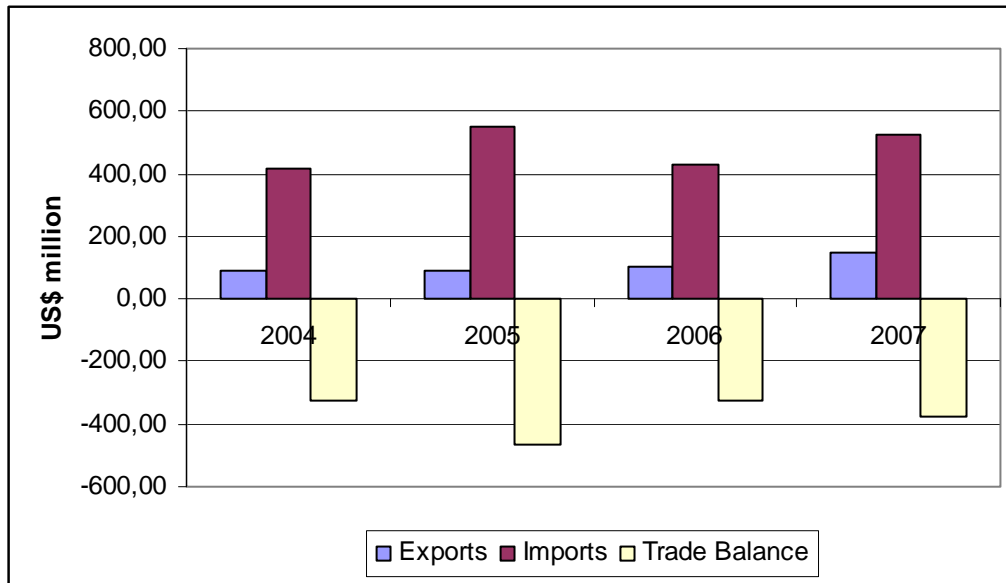

Source: UBOS, BOU and URA

#### **4.3.4 Intra EAC Trade**

Uganda's total trade with EAC Partner States increased by 27.1 percent to US\$ 675.3 million in 2007 compared to the level attained in 2006. The increase in intra-EAC trade was on account of 22.5 percent rise in imports originating from Partner States compared to 22.0 percent decline observed in 2006. Exports to Partner States also increased significantly by 46.2 percent due to substantial exports to Tanzania.

The trade balance with EAC Partner States widened from a deficit of US\$ 327.9 million in 2006 to a deficit of US\$ 377.7 million in 2006. Figure 4.14 summarises the trend of Uganda's intra EAC exports, imports and trade balance.

**Figure 4.14: Uganda's intra-EAC Trade, 2004-2007 (US\$ million)**

Source: UBOS, BOU and URA

#### 4.3.4.1 Imports

Intra-EAC imports increased from US\$ 429.7 million in 2006 to US\$ 526.5 million in 2007. The increase in intra-EAC imports is attributed to high demand for consumer and producer goods. The share of intra-EAC imports to total imports declined marginally from 16.8 percent in 2006 to 15.1 percent in 2007, out of which 94.1 percent originated from Kenya. The main imports from Kenya included petroleum products, cement, cigarettes<sup>7</sup>, beer made from malt, salt, paper and its products, iron and steel, plastics and pharmaceutical products.

The top twenty major imports from Tanzania amounted to US\$ 29.2 million in 2007 compared to US\$ 24.6 million in 2006. These imports comprised of iron & steel, animal fats & oils, sugars, electrical equipments and glass & glassware.

#### 4.3.4.2 Exports

Uganda's domestic exports to the EAC Partner States rose by 42.8 percent to US\$ 137.8 million in 2007, compared to 24.1 percent increase registered in 2006. The rise in exports to Partner States was largely driven by a marked increase in exports to Tanzania from US\$ 13.8 million in 2006 to US\$ 27.3 million in 2007. Similarly, domestic exports to

<sup>7</sup> British American Tobacco relocated its manufacturing plant to Kenya from Jinja, Uganda.

Kenya increased from US\$ 84.1 million in 2006 to US\$ 110.5 million in 2007. These included exports of cotton, soap, fruits, soya beans, unprocessed tobacco and animal fats & oils. The main commodities exported to Tanzania were mineral fuels, salt, cereals, iron & steels and animal fats & products.

#### 4.3.4.3 Re-Exports

Uganda's re-exports to EAC Partner States amounted to US\$ 11.0 million in 2007 compared to US\$ 5.3 million in 2006. Re-exports to Kenya and Tanzania were valued at US\$ 7.7 million and US\$ 3.3 million in 2007 respectively. The major re-exports to Kenya were nuclear reactors & boilers, vehicles & accessories thereof, textile articles, electrical machinery & equipment and plastics & articles thereof. The main re-exports to Tanzania comprised of pharmaceutical products, nuclear reactors & boilers, vehicles & accessories and electrical machinery & equipment (see table 4.4).

**Table 4.4: Uganda's Intra-EAC Exports, 2003-2007 (US\$ million)**

Trade flow	2003	2004	2005	2006	2007
Domestic exports	77.13	79.65	77.77	96.48	137.81
Re-Exports	7.13	9.41	10.11	5.27	10.98
Total Exports	84.26	89.06	87.88	101.75	148.79
Share of re-exports to total exports	8.46	10.57	11.51	5.18	7.38

*Source: UBOS, BOU and URA*

#### 4.4 Rwanda's International Trade

Rwanda's total trade increased substantially from US\$ 629.5 million in 2006 to US\$ 863.7 million in 2007. During the period under review, imports increased at a higher rate than exports thereby widening the trade deficit. The low performance in exports was largely explained by low export diversification coupled with price volatility in international market. Nevertheless, a lot of effort continues to be undertaken to add value on exports through processing, quality improvements and identification of new export products.

Import substitution measures are also being pursued to boost domestic production of food items such as rice and sugar. Figure 4.15 below summarizes trade developments in Rwanda over the period 2004 to 2007.

**Figure 4.15: Rwanda’s imports, exports and trade balances. 2004-2007 (US\$ million)**

Source: Rwanda Revenue Authority

#### 4.4.1 Imports

Rwanda’s imports increased from US\$ 488.6 million in 2006 to US\$ 680.5 million in 2007 with petroleum oils, electric machinery equipments, vehicles, automatic data processing machines and pharmaceutical products accounting for 42.9 percent of the total imports bill.

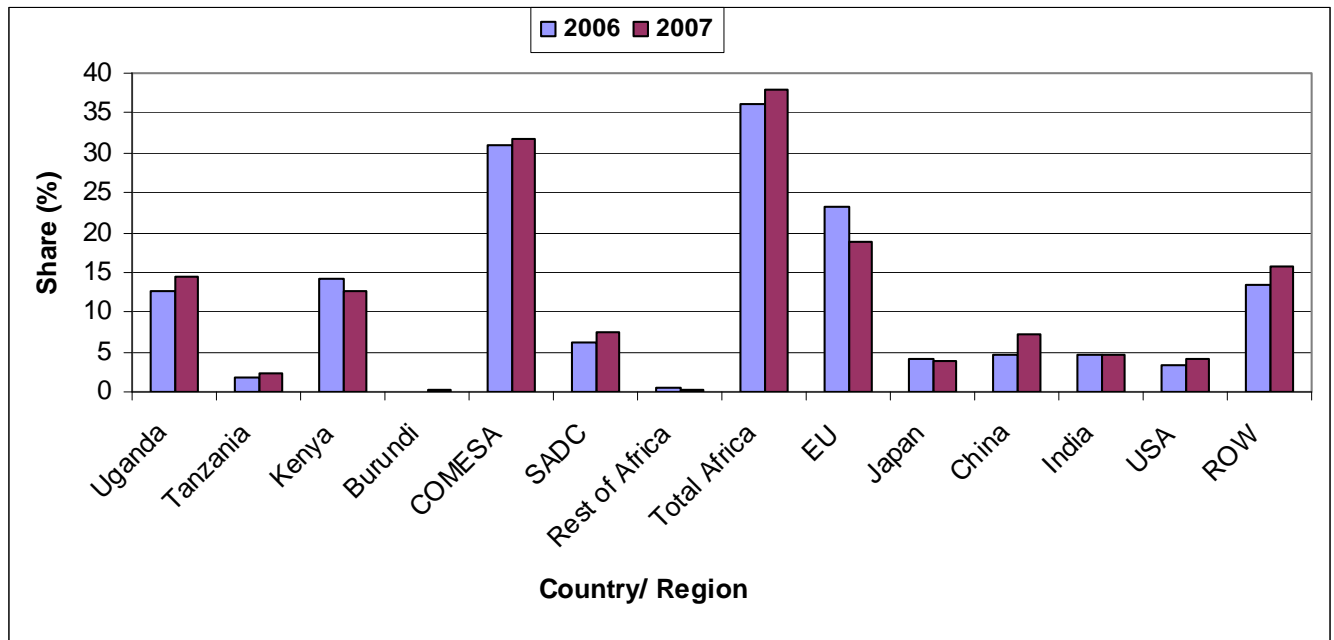

The EAC and European Union blocs remained the main source of Rwanda’s imports accounting for 29.4 percent and 18.7 percent of total imports respectively in 2007.

Imports from African countries<sup>8</sup> increased from US\$ 176.70 million to US\$ 258.5 million accounting for 36.2 percent and 38.0 percent of total imports in 2006 and 2007, respectively. Figure 4.16 below summarizes the trend of Rwanda’s imports between 2006 and 2007.

<sup>8</sup> Includes imports from EAC Partner States

**Figure 4.16: Percentage Share of Rwanda's Imports by Origin, 2006-2007**

Source: Rwanda Revenue Authority

#### 4.4.2 Domestic Exports

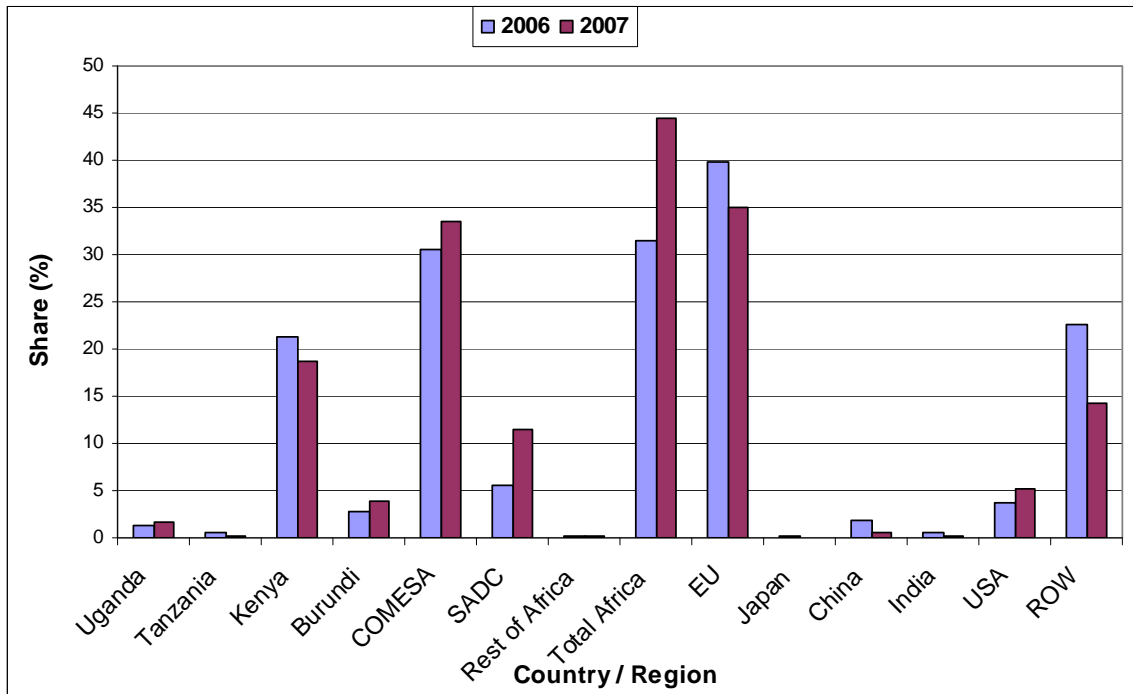

Domestic exports amounted to US\$ 140.9 million in 2006 and US\$ 183.2 million in 2007, representing an increase of 30.0 percent due to sound policies on export promotion. Exports were mainly coffee, tea and minerals<sup>9</sup> that collectively accounted for nearly 80 percent of the total exports.

Coffee sector continued to benefit from reforms geared towards improving the quality of coffee to meet standards in the international market. Despite coffee and tea being the main exports, their level of production continued to be highly affected by weather changes and product cycles like many other agricultural products.

Rwanda's exports were mainly destined to the European Union and COMESA regions. The sale of Rwanda's tea at the Mombasa Auction showed Kenya as the main African destination of Rwanda exports, which may not be the case. Figure 4.17 below summarizes the share of Rwanda's exports by destination in 2006 and 2007.

<sup>9</sup> Comprises of Tin, Colombo Tantalite, and Wolfram.

**Figure 4.17: Percentage Share of Rwanda's Exports by Destination, 2006-2007**

Source: Rwanda Revenue Authority

#### 4.4.3 Re-Exports

Rwanda's re-exports increased from US\$ 18.2 million in 2006 to US\$ 28.8 million in 2007 on account of re-exports of tin ores, coffee, tea, Tantalite and Tungsten ores. Other re-exports included vehicles, raw hides & skins, other ores, live bovine animals and vegetable saps & extracts. The share of re-exports to total exports increased from 12.9 percent in 2006 to 15.7 percent in 2007 (see Figure. 4.18).

**Figure 4.18: Percentage of Rwanda's Re-Exports to Total Exports**

Source: Rwanda Revenue Authority

#### 4.4.4 Rwanda's Trade with EAC Partner States

Rwanda's total trade with EAC increased from US\$ 172.0 million in 2006 to US\$ 237.8 million in 2007. Kenya continued to be Rwanda's major trading partner within the EAC contributing 57.8 percent and 50.5 percent of total EAC trade in 2006 and 2007 respectively. On the other hand, the trade deficit with the EAC Partner States continued to widen, with the worst being recorded in 2007. Figure 4.19 summarizes Rwanda's trade with EAC over the period 2004 to 2007.

**Figure 4.19: Rwanda's Trade with EAC, 2004-2006**

#### **4.4.4.1 Rwanda's Imports from EAC Partner States**

Rwanda's imports from EAC Partner States increased by 43.4 percent to US\$ 199.9 million in 2007. Imports from Kenya increased substantially from US\$ 69.5 million in 2006 to US\$ 85.7 million. The main products imported from Kenya included petroleum products, palm oil, sugar and salt. Imports from Tanzania almost doubled from US\$ 8.3 million in 2006 to US\$ 15.7 million in 2007 with wheat or Meslin flour, tubes, pipes, iron and steel being the main products imported. Similarly, imports from Uganda rose by 59.8 percent to US\$ 98.5 million in 2007 partly due to increased imports of Portland cement, palm oil and its fractions, wheat flour and rolled iron.

#### **4.4.4.2 Rwanda's Exports to EAC Partner States**

Exports to EAC Partner States increased by 16.3 percent to US\$ 37.9 million in 2007. The exports comprised of mainly agricultural products such as coffee and tea. Exports to Kenya and Uganda increased from US\$ 29.9 million and US\$ 1.9 million in 2006 to US\$ 34.4 and 3.2 million in 2007 respectively. Exports to Tanzania however, declined from US\$ 0.9 million in 2006 to US\$ 0.4 million in 2007.

##### **4.4.4.2.1 Re-exports**

Rwanda's re-exports to the Community amounted to US\$ 2.2 million in 2007 compared to US\$ 1.9 million registered in the previous year. Re-exports to Uganda more than doubled to US\$ 1.4 million, while those to Kenya and Tanzania declined by 55.4 percent and 12.8 percent to US\$ 0.4 million and US\$ 0.3 million, respectively. The main re-exports to Uganda comprised of iron & steel, machinery & equipment and motor vehicles & accessories.

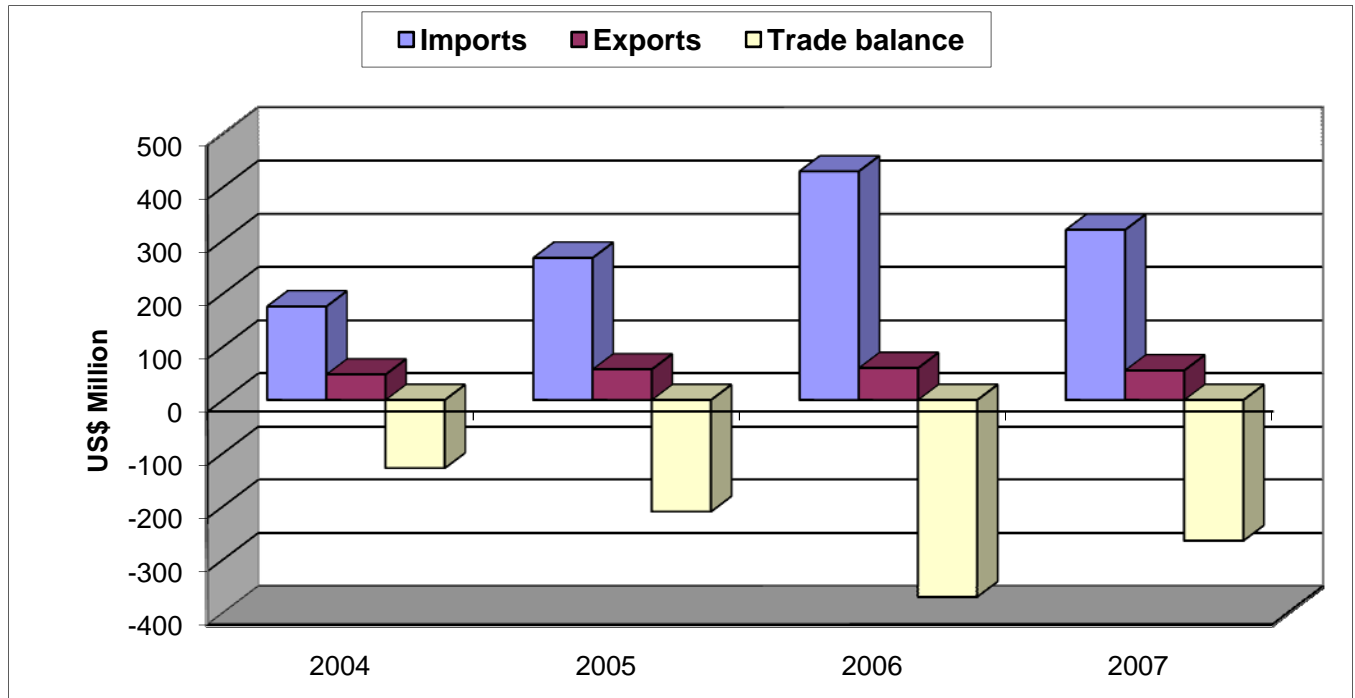

#### **4.5 Burundi's International Trade**

During the period under review, Burundi's total trade decreased by 23.4 percent to US\$ 375.5 million mainly due to decline in both exports and imports by 7.5 percent and 25.6 percent respectively. Consequently, the country's trade deficit reduced from US\$ 370.0 million in 2006 to US\$ 264.3 million. Burundi's trade with the Africa continent rose by 15.0 percent to US\$ 119.4 million mainly on account of growth of imports from Uganda and Rwanda which more than doubled to US\$ 39.6 million and US\$ 3.8 million,

respectively. However, exports to the Africa continent in the period under review remained low.

The share of Burundi's trade with EU decreased from 35.9 percent in 2006 to 31.7 percent mainly due to a 38.4 percent drop in imports to US\$ 83.2 million. Similarly, exports to the EU declined by 13.0 percent to US\$ 35.8 million in 2007 (See figure 4.20).

Figure 4.20: Burundi's imports, exports, and trade balance, 2004-2007

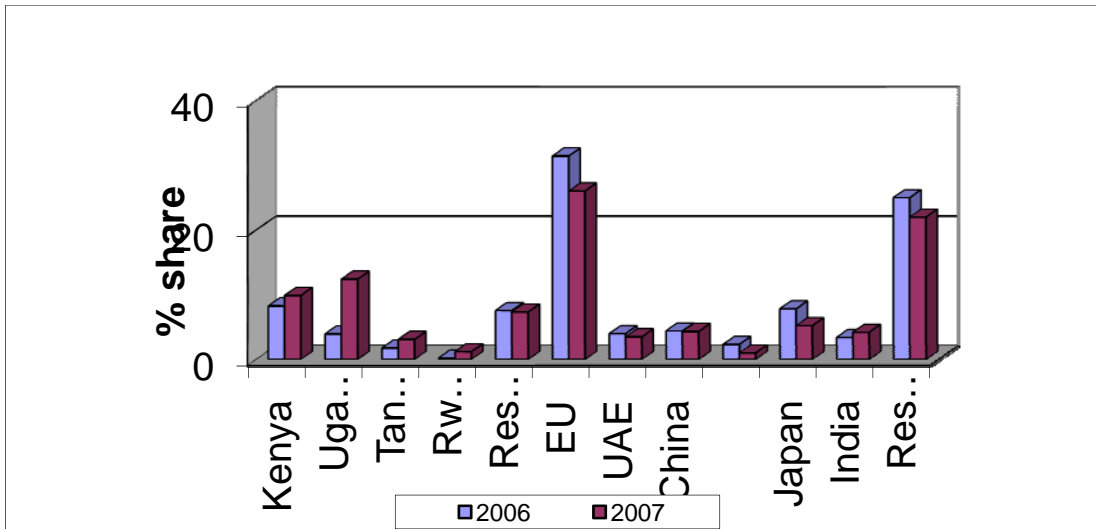

Source: Burundi Central Bank and Customs Department

#### 4.5.2 Imports

In 2007, imports decreased by 25.6 percent to US\$ 319.9 million on account of reduced imports of machinery & equipment and consumer goods, despite an increase in imports of raw materials. The EU bloc was Burundi's main trading partner, taking the largest import share in both 2006 and 2007. In the EAC region, Uganda followed by Kenya were the main source of Burundi's imports accounting for about 20 percent of the imports bill.

Figure 4.21: Percentage Share of Burundi's imports by origin, 2006-2007

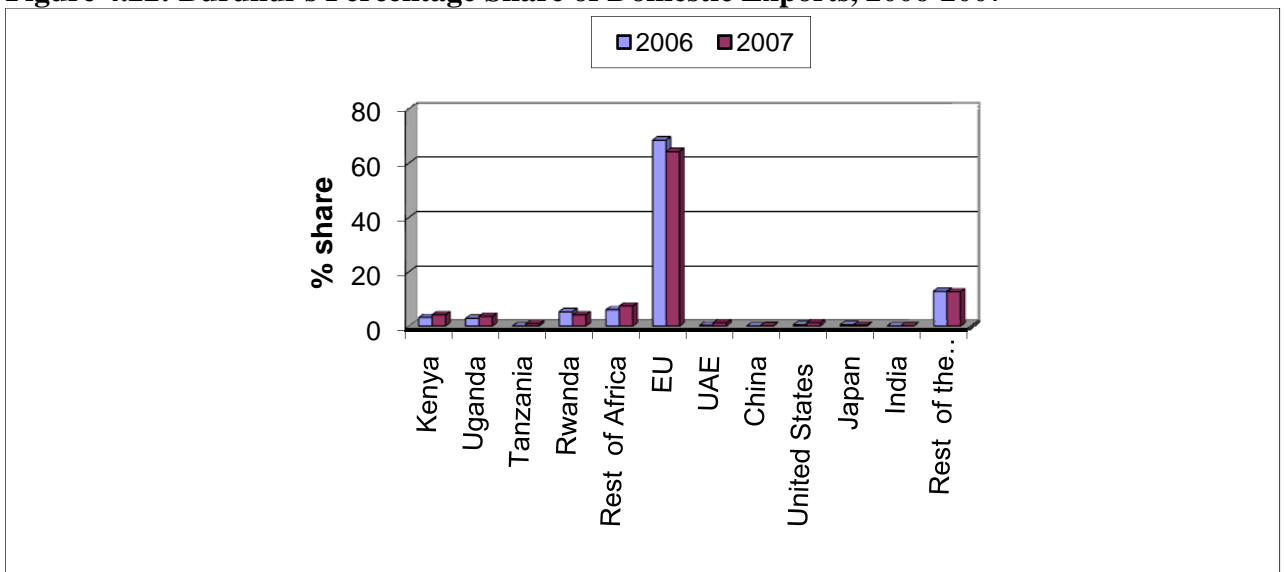

Source: Burundi Central Bank and Customs Department

#### 4.5.1 Domestic Exports

Domestic exports decreased by 13.9 percent to US\$ 50.5 million in 2007. This was as a result of a decline in volumes of coffee exports and a drop in the price of tea in the international market. However, exports of hides & skins and manufactured goods increased from US\$ 2.0 million and US\$ 0.7 million in 2006 to US\$ 3.5 million and US\$ 4.5 million in 2007. Likewise, the EU bloc dominated the share of domestic exports accounting for over 60 percent of the total market share in 2006 and 2007.

**Figure 4.22: Burundi's Percentage Share of Domestic Exports, 2006-2007**

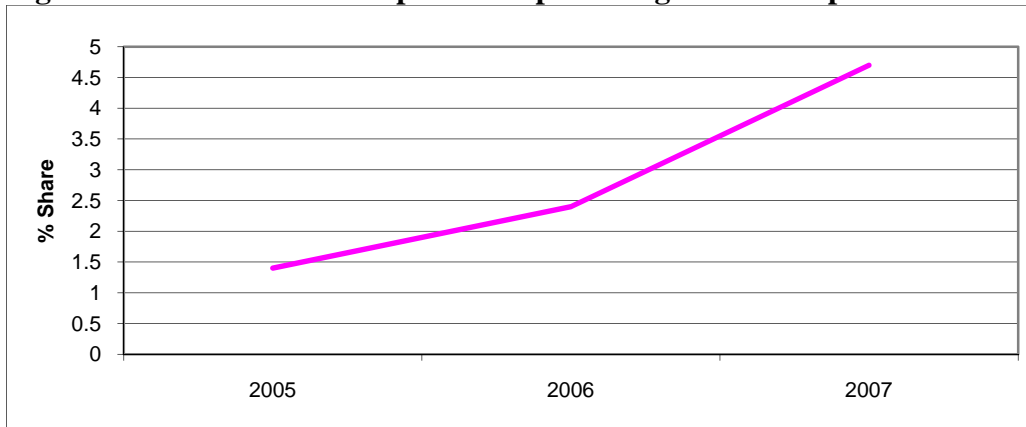

Source: Burundi Central Bank and Customs Department

#### 4.5.3 Re-Exports

In 2007, Burundi's re-exports increased by 86.6 percent to US\$ 2.6 million representing 4.7 percent of total exports (See Figure 4.23). The low levels of re-exports stresses that domestic exports constitute a large portion of Burundi's exports.

**Figure 4.23: Burundi's re-exports as a percentage of total exports**

*Source: Burundi Central Bank and Customs Department*

## **CHAPTER 5: SPECIAL CATEGORY CONSIDERATIONS WITHIN EAC CUSTOMS UNION**

### **5.1 Exemptions and Remissions**

The EAC Customs Management Act of 2004 provides guidance on the modalities of handling of remission and exemption of import duty. There was a general agreement that in the long run, countries should work towards reduction of exemptions and remissions.

Kenya's value of goods that qualified for exemptions and remissions increased by 18.7 percent to US\$ 1,626.7 million in 2007. The resultant foregone revenue therefore increased from US\$ 289.5 million in 2006 to US\$ 430.8 million in 2007 (see Table 5.1).

Similarly, Tanzania's value of imports eligible for exemptions rose by 22.0 percent to US\$ 1,496.2 million. Despite the increase in value of exempted goods, the foregone revenue declined by 33.8 percent to US\$ 268.3 million in 2007. The decline in foregone revenue was partly associated with introduction of controlled exemptions granted through treasury voucher system. Exemptions on investment related imports accounted for about 60 percent of total exemptions granted during the period under review.

Uganda's imports subjected to exemptions increased by 25.0 percent to US\$ 217.5 million in 2007. Revenue foregone thus, increased by 35.9 percent to US\$ 49.4 million, accounting for 5.1 percent share of total trade taxes collected. Increased collections in other non-customs related taxes arising from improved operational efficiency, effectiveness, tax education and awareness initiatives of the Uganda Revenue Authority explain the low percentage of foregone revenue of exemptions and remissions (see Table 5.1).

**Table 5.1: Total Exemptions and Remissions granted by EAC Partner States (US\$ millions)**

Partner States	Heading	2004	2005	2006	2007	Annual percentage change
<b>Uganda</b>						
	Value of Exemptions	109.76	178.8	173.99	217.49	25.01
	Revenue Foregone	27.24	33.08	36.36	49.41	35.88
	Total Trade taxes	503.75	585.98	682.07	919.14	34.76

<b>Kenya</b>						
	Value of Exemptions	588.86	800.88	1,370.84	1,626.69	18.66
	Revenue Foregone	214.12	201.40	289.47	430.77	48.82
	Total Trade taxes	1,535.32	1,529.66	1,748.98	2,273.15	29.97
	<b>percentage Foregone</b>	12.24	11.63	14.20	15.93	

Source: Partner States' Revenue Authorities

Note:

1. Percentage of Tax foregone is calculated from Tax exempted over Gross Tax collection. Gross Tax collection = actual collection + Tax exemptions
2. Monthly revenue collections and tax exemptions are aggregated into calendar year
3. Annual average exchange rate have been applied to convert into US\$

## 5.2 Sensitive Goods

The EAC Partner States agreed on commodities that require extra protection over imports from outside the region. The measure was agreed upon with the objective of protecting local production under the assumption that the region had adequate capacity to meet the demand for the selected commodities. The protected products included sugar, milk, wheat flour, maize, rice, palm oil and textiles, among others.

Kenya's imports of sensitive goods from non-EAC countries increased by 30.8 percent to US\$ 413.4 million in 2007. This was mainly attributed to increased imports of wheat & meslin, sugar & sucrose, worn clothing and cement.

Tanzania's imports of sensitive goods from non EAC Partner States increased from US\$ 197.5 million in 2006 to US\$ 237.8 million in 2007 with wheat, sugar and worn clothing taking the lead. Maize imports which were the major sensitive goods imported in 2006 recorded a huge decline from US\$ 48.9 million to US\$ 0.5 million in 2007 due to favourable weather conditions that increased domestic production to meet food demand.

Uganda's imports of sensitive products from outside the EAC registered an increase of 22.7 percent to US\$ 349.2 million in 2007. During the period under review, Wheat & Meslin, Portland cement, worn clothing and sugars were among the top sensitive imports by Uganda from non-EAC countries.

The rise in imports of sensitive goods from outside EAC underpins the need for Partner States to address the impediments to increased production and productivity of the local industries.

### **5.3 Excisable Products**

EAC Partner States have varying excise duty structures for different reasons.

The value of Kenya's imported excisable products increased by 25.1 percent to US\$ 1,430.7 million in 2007. This was mainly due to increased importation of mineral fuels, mineral oils, vehicles & accessories thereof, plastics, textiles, worn clothing, beverages, spirits & vinegar.

The value of Tanzania's excisable goods increased from US\$ 815.4 million in 2006 to US\$ 977.6 million in 2007, largely dominated by imports of petroleum products and vehicles. In 2007, the petroleum products accounted for about 90 percent of all imported excisable goods.

Uganda's import value of excisable products more than doubled from US\$ 430.4 million in 2006 to US\$ 897.4 million in 2007 largely on account of substantial increase in imports of tobacco<sup>10</sup>, beverages, sugar and petroleum products<sup>11</sup>.

---

<sup>10</sup> One of the major tobacco companies relocated its manufacturing plant to Kenya.

<sup>11</sup> Power shortages in Uganda increased consumption of petroleum imports for thermal power generation

## **5.4 Tariff Reduction Schedule**

Under the Customs Union agreement effective from 2005, Kenya was to immediately eliminate all tariffs on goods originating from Partner States while Uganda and Tanzania were to eliminate tariffs on goods falling under Category A<sup>12</sup> and gradually phase out tariffs on goods falling within Category B<sup>13</sup>.

An evaluation of the third year of implementation of the EAC Customs Union Protocol in Uganda indicated that the total value of imports subjected to a 6 percent tariff were valued at US\$ 135.4 million compared to imports of US\$ 36.0 million that were subjected to an 8 percent tariff in 2006. The top imported items under the schedule in 2007 were cement, tobacco & cigarettes, rice, wheat & meslin, milk & cream, and beer made from malt.

During the period under review, tariff for category B goods imported by Tanzania from Kenya declined by 20 percent and 15 percent in 2006 and 2007 respectively. However, category B imports declined from US\$ 95.1 million in 2006 to US\$ 40.2 million in 2007 on account of ceramic products. It is worthy noting that imports of ceramic products declined from US\$ 58.8 million in 2006 to as low as US\$ 0.5 million in 2007.

## **5.5 Tariff Bands**

Under the Common External Tariff (CET), a three tariff band structure (0 percent, 10 percent and 25 percent) was adopted at the onset of the EAC Customs Union and all Partner States were to adhere to its implementation. Kenya fully implemented the agreed three tariff band structure in 2007 with the exception of sensitive products. Under the zero tariffs, Kenya imported goods worth US\$ 5,616.2 million in 2007 compared with US\$ 4,602.2 million in 2006. The zero tariff imports accounted for 62.5 percent of the

---

<sup>12</sup> Category A includes goods which are zero rated

<sup>13</sup> Category B includes few goods which are exported from Kenya to Uganda and Tanzania attracting tariffs between 2 percent and 10 percent respectively in 2006 and would be reduced to zero rate by January 2010 when customs union is fully operationalized.

total imports in 2007 while imports under the 10 percent and 25 percent accounted for 14.2 percent and 18.6 percent, respectively (see Table 5.2).

**Table 5.2: Kenya's Tariff band status, 2006 and 2007 (US\$ million)**

Tariff band status	2006	2007	Percent change	Percent Share
0	4,602.15	5,616.15	22.03	62.48
10	1,074.84	1,277.89	18.89	14.22
25	1,239.64	1,672.94	34.95	18.61
>25	317.86	421.93	32.74	4.69
<b>Total</b>	<b>7,234.49</b>	<b>8,988.91</b>	<b>24.25</b>	<b>100.00</b>

Source: KRA

During 2007, Tanzania's total imports under the CET increased from US\$ 4,373.1 million in 2006 to US\$ 5,704.8 million, accounting for about 96 percent of total imports. The zero tariff imports by Tanzania represented 58.3 percent of imports subjected to EAC CET and were mainly industrial raw materials and capital goods. The large share of zero tariff imports is partly in response to the on going macroeconomic reforms geared towards attracting investments in manufacturing, mining, communication, and tourism and transportation sectors. In addition, this is in conformity with one of the objectives of EAC of promoting investments and industrial activities in the community.

In Uganda, the value of goods imported under the zero tariff band increased by 35.0 percent to US\$ 2,502.5 million in 2007 accounting for 71.5 percent of total imports. The top three imports in the 0 percent band were Medicaments, Radio/TV transmission apparatus and palm olein.

The value of goods imported under the 10 percent tariff band increased by 37.3 percent to US\$ 232.9 million accounting for 6.7 percent of the total imports. The top three imports in the 10 percent band were new pneumatic tyres for buses and Lorries, vehicle parts and rolled iron & steel. Imports under the 25 percent tariff band accounted for 16.3 percent of the total imports, mainly composed of vehicles of cylinder capacity between 2250cc and 3000cc.

## **5.6 Exemptions and Excisable products in Rwanda and Burundi**

Rwanda's imports subject to exemptions in the period under review increased by 32.9 percent to US\$ 339.3 million in 2007, resulting in increased revenue foregone from US\$

42.4 million in 2006 to US\$ 59.1 million. Exemptions were mainly on imports related to public works, agricultural inputs and NGO projects. Revenue foregone as a share of total revenue rose marginally from 11.8 percent in 2006 to 13.1 percent in 2007 (Table 5.3).

The value of Burundi's imports subject to exemptions decreased from US\$ 569.4 million in 2006 to US\$ 162.6 million in 2007 mainly due withdrawal of the UN Forces from the country. Consequently, the foregone revenue drastically declined from US\$ 88.5 million in 2006 to US\$ 48.5 million (see table 5.3).

**Table 5.3: Total Exemptions and Remissions granted by Rwanda and Burundi US\$ Millions**

Country	Heading	2004	2005	2006	2007	Annual percentage change
<b>Rwanda</b>						
	Value of Exemptions	147.10	197.40	255.28	339.28	32.90
	Revenue Foregone	48.62	32.61	42.40	59.06	39.30
	Total Trade taxes	108.78	138.62	141.95	158.96	11.99
	<b>Percentage Foregone</b>	30.89	19.04	23.00	27.09	
<b>Burundi</b>						
	Value of Exemptions		321.14	569.42	162.61	-71.44
	Revenue Foregone		72.92	88.5	48.46	-45.24
	Total Trade taxes		89.84	97.54	104.42	7.05
	<b>Percentage Foregone</b>		81.17	90.73	46.41	-48.85

*Source: RRA and Burundi Customs Department*

The value of Rwanda's imported excisable products increased by 45.9 percent to US\$ 63.8 million in 2007, mainly due to increased importation of vehicles and sugar. Despite the import value of petroleum products being relatively high, it reduced in 2007 due to increased government subsidy directed to control pump prices.

The value of Burundi's excisable goods rose marginally from US\$ 27.6 million in 2006 to US\$ 28.0 million in 2007 due to increased consumption tax on beer, lemonades and tobacco, and a corresponding removal of consumption tax on sugar.

## CHAPTER 6: CUSTOMS REVENUE PERFORMANCE IN EAC

### 6.1 General Performance of Customs Revenue

Customs revenue was considered as one of the major sources of revenue to EAC Partner States. Despite the challenges of attaining revenue targets during the implementation of the EAC Customs Union, the performance of Partner States over the last two years has been impressive. Table 6.1 summarises customs revenue collected by the EAC Partner States.

**Table 6.1: Customs Revenue collected by EAC Partner States, 2005-2007 (US\$ million)**

Partner state	Tax head	2006		2007		2006	2007	2007
		Target	Actual	Target	Actual	Performance rate	%Change	
<b>Uganda</b>

Source: Partner States Revenue Authorities

Note:

1. Monthly revenue collections and tax exemptions are aggregated into calendar year
2. Annual average exchange rates have been applied to convert into US\$

Kenya's the total customs revenue collected on international trade increased from US\$ 1,765.6 million in 2006 to US\$ 2,273.2 million in 2007, surpassing the set target by 2.5 percent. The good revenue performance during the year 2007 was attributed to improved tax collection and administration measures undertaken by KRA. However, the proportion of international trade taxes to total revenue declined marginally from 39.1 percent in 2006 to 38.6 percent in 2007.

In general, revenue collections for all trade tax heads improved significantly in 2007. For instance, import duty rose by 33.5 percent to US\$ 457.5 million in 2007. Similarly, revenue from excise duty and VAT on imports increased by 16.6 percent and 39.3 percent to US\$ 508.4 million and US\$ 751.6 million in 2007 respectively. Meanwhile the revenue realised on import duty and VAT imports were above their respective targets, except for excise duty that was below the target level. VAT on imports remained the dominant tax head during the period under review.

Tanzania's customs revenue collection increased from US\$ 822.1 million recorded in 2006 to US\$ 1,104.2 million in 2007, surpassing the target by 2.9 percent. The improved performance in tax collection was largely associated with enhanced tax administrative measures following the implementation of TRA's second corporate plan. However, the share of customs revenue to total revenue declined marginally from 44.3 percent to 44.2 percent in 2006. The development was largely attributed to reforms in domestic revenue department and substantial growth in local production.

Uganda's total customs revenue increased by 34.8 percent to US\$ 919.1 million in 2007, exceeding the target of US\$ 851.9 million. All the customs tax heads surpassed their targets in 2007 with improvements of 32.6 percent, 38.9 percent, 32.3 percent and 31.3 percent observed in Import tax, VAT on imports, Excise duty and other customs related duties, respectively. The performance is attributed to increased imports coupled with enhanced administrative efficiencies in URA. The ratio of trade related taxes to total revenue increased from 49.9 percent in 2006 to 50.8 percent in 2007.

Similarly, Rwanda's total customs revenue increased by 12.0 percent to US\$ 159.0 million in 2007, overshooting the target by 11.7 percent (see Table 6.2). Sources of customs revenue included VAT, import duty, excise duty, withholding tax and other taxes which respectively, contributed 41.4 percent 29.0 percent 10.2 percent 3.7 percent and

15.6 percent in 2007. Between 2006 and 2007, customs revenue collections on VAT and import duty increased by 18.0 percent and 12.6 percent respectively.

However, the proportion of customs revenue to total tax revenue declined from 39.5 percent in 2006 to 35.2 percent in 2007 due to increased zero tariff imports originating from COMESA region and a significant increase in domestic tax revenue.

**Table 6.2: Rwanda Customs Revenue 2006-2007 (US\$ million)**

	2006		2007		2006	2007	Percent change
	Target	Actual	Target	Actual	Performance rate

Source: RRA

Burundi's total customs revenue in 2007 amounted to US\$ 100.9 million compared to US\$ 96.5 million recorded in the previous year. The share of customs revenue to total revenue accounted for 55.5 percent and 54.6 percent in 2006 and 2007 respectively (see table 6.3). This underscores the significance of customs taxes as source of government revenue.

The increase was largely attributed to increased revenue from other taxes by 37.5 percent and 9.1 percent on VAT while the imports and excise duties decreased by 6.4 percent and 1.9 percent, respectively. The decrease in imports duty in 2007 was partly due to introduction of exemptions on computer materials and Trucks<sup>14</sup>.

On the other hand, there was a reduction in tariffs on selected foods staffs from 30 percent in 2006 to 5 percent in 2007 and from 12 percent to 10 percent on other goods over the same period. In addition, the abolition of the consumption tax<sup>15</sup> on beer, lemonade products and locally produced sugar resulted in a reduction of revenue from excise duty from US\$ 29.0 million in 2006 to US\$ 28.5 million in 2007.

<sup>14</sup> Trucks with more than 15 tones of a minimal loading capacity and less than 8 years old.

<sup>15</sup> Revenue from consumption tax on beer and lemonade was channelled to the National solidarity Fund.

**Table 6.3: Burundi Customs Revenue 2006-2007 (US\$ million)**

*Source: Burundi Customs Department*

From table 6.3 above, there was general under performance of Burundi's total revenue collections by 2.6 percent and 5.8 percent in 2006 and 2007 respectively. The overall under performance for customs revenue was nearly 10 percent in both years.

## **CHAPTER 7: INVESTMENT FLOWS IN THE COMMUNITY**

### **7.1 Policy Framework**

The EAC Partner States have statutory agencies that promote and facilitate investment in the region. This work is carried out by the Kenya Investment Authority (KenInvest), Tanzania Investment Centre (TIC), Zanzibar Investment Promotion Authority (ZIPA), the Uganda Investment Authority (UIA), and the Rwanda Investment and Export Promotion Agency (RIEPA). These Investment Promotion Agencies (IPAs) were established by respective Acts of Parliament in each Partner State and follow similar basic requirements for approval of investments. The procedure involves of filling in an application form, attaching a business proposal, Certificate of Incorporation, and, Memorandum and Articles of Association. Furthermore, all proposed investment projects have to comply with the necessary conditions concerned with the environment, health, security matters and sectoral requirements as provided for by each Partner State. In Burundi, all investment activities are coordinated by the National Investment Commission under the Vice Ministry of Planning. Currently, the country is in the process of establishing an Investment Promotion Agency which is expected to be operational in 2009.

The role of the IPAs of the Partner States is to promote and facilitate investment activities. Facilitation is carried out by providing a set of incentives as provided for in the countries' respective investment codes. The incentives provided range from waiver of custom duties and VAT on imported capital goods related to the submitted investment proposals, the facilitation for obtaining of administrative formalities to corporate taxes reduction. Since 2001, most EAC countries have established and implemented the One Stop Centre concept which consists of providing almost all needed facilitation under one stop shop.

The harmonization of investment policies, incentives and laws of the Partner States has been going on for some time under the auspices of the EAC Secretariat. Some aspects have been harmonized and include in investment approval requirements, export processing zones and free zones regulations, corporation tax and several other incentives. There still exist some variations on the minimum capital threshold requirement among the Partner States. For instance, in Kenya, the minimum threshold is US\$ 100,000 for foreign investors and US\$ 15,000 for domestic investors, for Tanzania, the minimum

threshold is US\$ 300,000 for foreign investors and US\$ 100,000 for domestic investors; while in Uganda the minimum threshold is US\$ 100,000 for foreign investors and US\$ 50,000 for domestic investors. On the other hand, Zanzibar maintains a different approach that focuses on sectoral thresholds for investment capital per project. For example, investment in hotels requires a minimum capital of US\$ 4 million for foreign investors and US\$ 300,000 for local investors. In Rwanda, the minimum threshold for foreign investors is US\$ 250,000 while for local and COMESA investor is US\$ 100,000. These and other variations related to offered incentives are being identified and further harmonised to bring about a more favourable investment climate in the EAC region.

## **7.2 Investment Climate**

### **7.2.1 Economic and Financial environment**

This involves comparing the local, GDP and Income distribution to investor perceptions on issues such as the Domestic market size, Smuggling, Corruption, Competition with imports, Access to international markets, Corporate tax, Income tax, local taxes, Cesses, and other fees, Customs and excise duty, Interest rates, Inflation, Exchange rate, Investment limit, Insider trading, Access to local business finance/credit, Access to finance, Security and Crime, Land, law and administration.

Most importantly is including an indicator on the number, and size distribution of private investments in a jurisdiction.

### **7.2.2 Physical environment**

This is important in establishing the comparative advantage of the jurisdiction, by observing the location (proximity to the capital or the ocean etc), Topography, Climate, Natural resources and Infrastructure (i.e. Inland Transport, Air Transport Electricity, Supply Water, Supply Roads, Postal Services, Telecommunication, Internet, Customs Services, Internal Revenue Services, Insurance Services, Banking Services, Availability of power, Municipal Services).

### **7.2.3 Legal environment**

This includes licensing, harassment by government agencies and registration of business.

### **7.2.4 Labour**

Labour market regulations offer a mix of flexibility in hiring and firing procedures with significant rigidities in the setting of minimum wages and indirect labour costs. The indicators would include:

- Restrictions regarding hiring expatriates
- Staff turnover
- Wage levels
- Availability of skilled labour locally
- Cost of skilled labour
- Productivity of skilled labour
- Cost of unskilled labour
- NSSF/Pension contribution
- Malaria
- AIDS
- Substance abuse
- Other Diseases

Overall, the general investment climate continued to improve during the period under review. The Government of Uganda started to implement the recommendations agreed by the Presidential Investors Roundtable (PIRT) 2006 which include; revised 17 priority commercial laws including the proposed amendment of the Investment Code 1991, implementation of One-stop-centre at Uganda Investment Authority, reforms and changes at Land Registry, Ministry of Lands, Housing and Urban Development. The proposed additional incentives of ten-year tax holiday for exporters of finished goods has given confidence to both existing and potential investors to reconsider Uganda as an investment destination.

### **7.3 Overall EAC Foreign Direct Investment Position**

The overall investment inflows to the EAC region dropped significantly by 11.8 percent from US\$ 8,021.9 million recorded in 2006 to US\$ 7,118.5 million in 2007. The total approved projects increased marginally by 0.5 percent from 1,028 in 2006 to 1033 in 2007. Overall, Tanzania took the highest share of investment inflows in nominal value terms in the entire EAC region accounting for over 70 percent in both 2006 and 2007. The total jobs created increased significantly by 30.2 percent in 2007 to 163,538 from 125,568 jobs registered in 2006 (refer to table 7.1).

#### **7.3.1 Intra-EAC Investment flows**

Table 7.1 further shows that, Uganda and Tanzania benefited most from intra-EAC investment flows with Kenya being the dominant player. On the other hand, Kenya attracted minimal investment inflows from EAC Partner States in the previous years but virtually recorded no investment inflows in 2006 and 2007. The planned value of investment from Kenya to Tanzania rose by 30 percent from US\$ 35 million in 2006 to US\$ 45 million in 2007. However, there was almost no investment recorded from Tanzania to Kenya leading to a huge gap in investment flows between the two countries. This scenario could be attributed to partial liberalisation of the Tanzania's capital account which restricts residents to invest abroad. Meanwhile, investment inflows from Tanzania to Uganda increased from US\$ 2.17 million in 2006 to US\$ 3.98 million in 2007.

In 2007, the Rwanda Investment and Export Promotion Agency (RIEPA) attracted investments worth US\$ 230.5 million from 44 projects, compared to 31 projects valued at US\$ 119.7 million in the previous year. Rwanda's investment inflows from the EAC Partner States increased significantly from US\$ 12.9 million to US\$ 35.2 million in 2007, with most of it originating from Kenya. The entry of Rwanda into the EAC bloc could have boosted her investment portfolio within the region. The investment inflows from the rest of the world to Rwanda increased by 82.9 percent from US\$ 106.8 million in 2006 to US\$ 195.3 million in 2007. In comparison, Kenyan firms were leading in investment within the EAC region.

#### **7.4 Number of approved projects**

The cross-border investment within the EAC region is represented by the number of projects from the Partner States that are approved by each Partner State. In Kenya, there were no reported approved projects from EAC Partner States in 2006 and 2007. However, the number of projects from the rest of the world increased from 70 in 2006 to 73 projects in 2007, attracting an average investment value of US \$ 2.0 million per project.

In Tanzania, the total number of projects approved slightly rose from 679 in 2006 to 701 in 2007 giving rise to an average investment value per project of about US \$ 8.6 million and US \$ 8.1 million in 2006 and 2007 respectively.

Meanwhile, Uganda recorded a reduction in the number of approved projects from 279 in 2006 to 259 in 2007 although its average investment value per project rose from US \$ 3.7 million in 2006 to US \$ 4.5 million in 2007. For Rwanda, the number of investment projects increased to 44 in 2007 from 31 projects registered in 2006. The ratio of investment portfolio per project stood at US \$ 3.8 million in 2006 and US \$ 5.2 in 2007. Overall, Tanzania had more number of approved projects and a higher value of investment per project compared to other EAC Partner States.

#### **7.5 Individual Country Value of Planned Investment**

For Kenya, the value of planned investment reduced drastically from US\$ 1,115.11 million in 2006 to US\$ 213.9 million in 2007. Conversely, Uganda and Rwanda recorded significant increases in investment inflows valued at US \$ 230.5 million and US \$ 1,189.0 million in 2007 respectively. For Tanzania, there was a slight reduction of 2.8 percent in the value of planned investments from US \$ 5,877.3 million in 2006 to US\$ 5,715.6 million in 2007.

## 7.6 Employment opportunities created

**Table 7.2: Number of jobs created by foreign investment, 2006-2007.**

Country	Year		percent change
	2006	2007	
Kenya	16,940	5,257	(68.97)
Tanzania	74,946	103,956	38.71
Uganda	33,682	54,325	61.29
<b>EAC</b>	<b>125,568</b>	<b>163,538</b>	<b>30.24</b>
Rwanda	5,076	4,144	(18.36)

Source: Partner States Investment Authorities

For the 1,033 projects licensed in 2007 in the EAC region, a combined total of 163,538 jobs were expected to be created compared to 125,682 jobs created in 2006 from 1,028 projects. All the EAC Partner States recorded significant increases in job creation in 2006 and 2007 except for Kenya whose job creation plummeted by nearly 69 percent. For instance, in 2007 the jobs created in Tanzania increased by 38.7 percent from 74,946 jobs in 2006 to 103,956 jobs in 2007. The increase in jobs created could be attributed to a slight rise in the number of new registered projects in 2007. The leading sectors that led in job creation were real estate, followed by telecommunication, manufacturing, transport and tourism sectors.

## 7.7 Challenges to Investment Promotion

Even if East African countries are enjoying some positive strength such as peace and political stability, investor-friendly governments committed to the market economy, as well as the preferential access to several developed country markets, they also are confronted with some challenges.

The common challenges which EAC countries face are mainly related to the high costs of doing business due to inadequate utilities, hard administrative formalities, and negative perception of the region by the rest of the world, especially western countries, poor infrastructure, as well as lack of adequate skilled labour.

Investment Promotion Authorities in the Partner States do not have specific promotion campaigns targeting each other. Furthermore, there are no specific incentives dedicated to attract investors from EAC Partner States.

The global market turbulences also pose a challenge to the regional investment promotion. Increasing prices of fuel coupled with volatility in the capital markets and exchange rates fluctuations have affected the whole region during the year 2007.
